

THE 60TH ANNUAL MEETING OF THE INSTITUTE OF NAVIGATION

TABLE OF CONTENTS

PLENARY SESSION

Future Navigation Needs in Agriculture

T.D. Pickett, John Deere AMS 1

GPS Related Railroad R&D

L.W. Allen III, Federal Railroad Administration 11

Highway Safety – A Future Role for Navigation

J. Arnold, U.S. Department of Transportation 41

A1: GPS and Galileo

Binary Coded Symbol Modulations for GNSS

C. Hegarty, J.W. Betz, A. Saidi, The MITRE Corporation 56

Requirements for Enhancing Trust, Security and Integrity of GNSS Location Services

O. Pozzobon, C. Wullems, QASCOM, Italy; K. Kubik, University of Queensland, Australia 65

On-Orbit Enhancements and the Evolution of GPS Modernization

J.A. Rajan, S. Rajan, M. Policano, ITT Industries, Aerospace/Communication Division 76

Implementation of a GPS Integrity Anomaly Database

J.W. Lavrakas, B.J. Carroll, Overlook Systems Technologies, Inc.; K. Van Dyke, U.S. Department of Transportation Volpe Center; S.A. Hieronymus, Overlook Systems Technologies Inc., 88

Design and Implementation of Local Area DGPS Using GPRS Network for Real Time Data Processing

C.E. Lin, National Changhua University of Education, Taiwan; C-C. Li, National Cheng Kung University, Taiwan; W-J. Kang, Industrial Technology Research Institute, Taiwan 97

Real Time Implementation of Deeply Integrated Software GPS Receiver and Low-Cost IMU for Processing Low CNR GPS Signals

S. Gunawardena, A. Soloviev, F. van Graas, Ohio University 108

A2: Biological Systems Guidance, Navigation, and Control

What Can Biological Systems Tell Us About Guidance, Navigation, and Control?

M.F. Wehling, AFRL/MNG 115

Optic Flow Processing for Motor Control in Flying Insects

H.G. Krapp, Department of Zoology, University of Cambridge, UK 121

Odor-Guided Navigation in Walking and Flying Insects

M.A. Willis, Case Western Reserve University 131

Avian Magnetoreception: A Radical Pair and a Magnetite-Based Mechanism

W. Wiltschko, R. Wiltschko, Goethe-Universität Frankfurt, am Main, Germany 138

Avian Navigation: The Crucial Role of the Compass

R. Wiltschko, W. Wiltschko, Goethe-Universität Frankfurt, am Main, Germany 148

The Use of Optic Flow Information in Insect Vision and Navigation

M. Srinivasan, S. Zhang, Australian National University, Australia 157

A3: Land Navigation

Inertial Aiding of Phase-Tracking Loops for Automotive GPS Attitude Determination

S. Alban, Stanford University; A. Dietrich, Robert Bosch Corporation 166

Error Analysis of a Precision Indoor Positioning System

D. Cyganski, J. Orr, D. Breen, B. Woodacre, Worcester Polytechnic Institute 180

Multiple Antenna GPS Configuration for Enhanced Performance

S. Nair, C. Bartone, Ohio University 188

Navigating Using an ASF Grid for Harbor Entrance and Approach

R. Hartnett, U.S. Coast Guard Academy; G. Johnson, John J. McMullen Associates;
P. Swaszek, University of Rhode Island 200

Design, Fabrication and Characterization of an Integrated Optic Passive Resonator for Optical Gyroscopes

G. Li, K.A. Winick, University of Michigan; B.R. Youmans, E.A.J. Vikjaer, BAE Systems 211

Stop Sign Warning

J. A. Arnold, Federal Highway Administration 217

B1: Navigation Education and Research

GPS Research and Education at the University of Colorado, Boulder

P. Axelrad, D.M. Akos, K.M. Larson, G.H. Born, R.S. Nerem, S. Palo, University of Colorado at Boulder 223

Education and Research in Navigation at University FAF Munich

B. Eissfeller, G.W. Hein, University of Federal Armed Forces (FAF) Munich, Germany 230

Geodetic and Geoinformation Science at The Ohio State University	
D.A. Grejner-Brzezinska, Ohio State University	240

International MSc Study Programme in Nautical Science at the Norwegian University of Science and Technology	
E. Pedersen, Norwegian University of Science and Technology, Norway; T.E. Berg, Norwegian Marine Technology Research Institute, Norway	246

A Hands-On Navigation Technology Workshop to Support the Math Options for Girls Program	
R. Gray, T.L. Hemminger, Penn State Erie, The Behrend College	250

Avionics Education and Research at Ohio University	
M.S. Braasch, F. van Graas, Ohio University	257

Transition of Mental Workload Among Bridge Teammates	
K. Murai, Y. Hayashi, Y. Yano, M. Fuchi, Kobe University, Japan	263

B2: Aviation 1

Multipath Mitigation Using an Electromagnetic Fence for Ground Reference Stations	
Y. Zhang, C. Bartone, Ohio University	271

Derivation of Vertical Alert Limit for LAAS CAT III Autoland Considering Limit Risk Requirement	
C.A. Shively, The MITRE Corporation.....	281

Conspiring Biases in the Local Area Augmentation System	
F. van Graas, V. Krishnan, R. Suddapalli, T. Skidmore, Ohio University	300

Aeronautical Surveys for Airports: Technical Expertise, Precise Procedures Required to Meet FAA Guidelines	
T. Mochty, T. Mackie, Woolpert LLP	308

An Advanced Multipath Model for DGPS Reference Site Analysis	
J.M. Kelly, J.C. Cohenour, M.F. DiBenedetto, Ohio University; D. Lamb, Federal Aviation Administration	315

The Development and Validation of a High-Fidelity Electromagnetic Model of the Integrated Multipath Limiting Antenna	
D.N. Aloj, M. Alsliey, S. Kiran, Oakland University	328

B3: New Technologies for Precision Agriculture

GPS Correction Techniques for Machine Guidance and Auto-Steer in Agriculture	
J.G. Pointon, OmniSTAR, Inc.	340

Experiences with the OmniSTAR HP Differential Correction Service on an Autonomous Agricultural Vehicle S. Pocknee, S. McCarthy, National Environmentally Sound Production Agriculture Laboratory; G. Rains, Biological and Agricultural Engineering/University of Georgia; C. Kvien, National Environmental Sound Production Agriculture Laboratory	346
Evaluation of Recreational GPS Receivers for Use in Precision Farming K. Shannon, C. Ellis, M. Herring, G. Hoette, University of Missouri	354
Field Evaluation of the Percentage of Overlap for Crop Protection Inputs with a Foam Marker System Using Real-Time Kinematic (RTK) GPS M.R. Ehsani, M. Sullivan, T. Zimmerman, Ohio State University	366
B3B: Results of Lawn Mower Competition – ALMC Press Release	
First Annual Autonomous Lawn Mower Competition Dayton Section, Institute of Navigation	372
The Miami Red Blade: An Autonomous Lawn Mower B. McNally, M. Stutzman, C. Korando, J. Macasek, C. Mantz, S. Miller, J. Morton, S. Campbell, J. Leonard, Miami University	390
C1: Geodetic and Geoinformation Science 1 – Remote Sensing	
Precise Vehicle Topology and Road Surface Modeling Derived from Airborne LiDAR Data C.K. Toth, D.A. Grejner-Brzezinska, S. Moafipoor, Ohio State University	401
ICESat Laser Altimetry in the Great Lakes A. Braun, K-C. Cheng, B. Csatho, C.K. Shum, Ohio State University.....	409
Crustal Vertical Motions Inferred by Tide Gauges and Satellite Altimetry C.-Y. Kuo, C.K. Shum, A. Braun, Ohio State University	417
DEM Generation and Tidal Deformation Detection for Sulzberger Ice Shelf, West Antarctica Using SAR Interferometry S. Baek, Ohio State University; O-I. Kwoun, USGS EROS Data Center; M. Bäßler, Technische Universität Dresden, Germany; Z. Lu, USGS EROS Data Center; C.K. Shum, Ohio State University; R. Dietrich, Technische Universität Dresden, Germany	424
Validating Low Earth Orbiting Satellite Altimeter Observed Ionosphere TEC Using Global Ionosphere Map (GIM) S. Ge, Ohio State University; J. Ping, National Astronomical Observatory, Japan; L. Potts, C.K. Shum, Ohio State University; A. Saito, Kyoto University, Japan	431

C2: Aviation 2

Overview of the Safety Analysis of Loran for Aviation

S. Lo, L. Boyce, Per Enge, Stanford University; B. Peterson, Peterson Integrated Geopositioning; R. Wenzel, G.T. Gunther, Booz Allen Hamilton; P. Morris, Northrop Grumman/Defense Enterprise Solutions; K. Carroll, U.S. Coast Guard Loran Support Unit; C. Kee, Seoul National University, South Korea..... 439

Development and Status of Integrated GPS/Loran Prototype for Aviation

G.L. Roth, Locus, Inc.; J.L. Davis, FreeFlight Systems; M.J. Narins, Federal Aviation Administration 448

Integrated GPS/Loran RF Simulator Development

B. Peterson, K. Dykstra, Peterson Integrated Geopositioning LLC..... 455

Modular Program for Evaluating IMU Coast Performance

E. Schiffers, Illgen/Northrop-Grumman; M. Narins, Federal Aviation Administration; R. Lilley, Illgen/Northrop-Grumman; J.L. Farrell, VIGIL, inc. 462

D1: Geodetic and Geoinformation Science 2- Gravimetry

Airborne Gravimetry Using INS/GPS and Gravity Gradiometers

C. Jekeli, Ohio State University..... 476

Gravity Compensation Methods for Precision INS

J.H. Kwon, Ohio State University 483

Improving Resolution of Airborne Gravimetric System by Using of Wavelets Shrinkage De-noising

X.P. Li, C. Jekeli, Ohio State University 491

NGA Gravity Support for Inertial Navigation

P.D. Kopcha, National Geospatial – Intelligence Agency 497

Calibration of CHAMP Accelerometer Observations for Precise Determination of in-situ Gravity Measurements

Y. Chen, S-C. Han, B. Schaffrin, C.K. Shum, Ohio State University 505

Implementation of Parallel Least Square Algorithm for Gravity Field Inversion

J. Xie, S. Ge, S-C. Han, C.K. Shum, Ohio State University 513

D2: Receiver and Antenna Technologies

Angles of Arrival Tracking of GPS Signals with Digital Beamforming Monopulse for Attitude Determination

C. Yang, Sigtem Technology, Inc.; D.M. Lin, Air Force Research Laboratory 521

Indoor Industrial Machine Guidance Using Locata: A Pilot Study at BlueScope Steel
J. Barnes, C. Rizos, M. Kanli, University of New South Wales, Australia; D. Small, G. Voigt, N. Gambale, J. Lamance, Locata Corporation Pty Ltd., Australia; T. Nunan, C. Reid, BlueScope, Steel, Port Kembla Steelworks, Australia 533

Sensitivity Improvement of a Low Cost Commercial GPS Receiver Through Software Approach
D.M. Lin, J.B.Y. Tsui, L. Liou, U.S. Air Force Research Laboratory; J. Schamus, General Dynamics Inc..... 541

Constrained Optimization for Joint Estimation of Channel Biases and Angles of Arrival for Small GPS Antenna Arrays
C. Yang, Sigtem Technology, Inc.; D. M. Lin, Air Force Research Laboratory 548

Time Transfer Between UTC and Local Vehicle Time for the Gravity Probe B Relativity Mission
J. Li, G.M. Keiser, Stanford University; J.M. Lockhart, San Francisco State University/Stanford University; P. Shestopole, Stanford University 560

D3: Military Navigation

Covariance Estimation for Terrain Referenced Navigation with a Comparison Technique
J. Metzger, O. Meister, G.F. Trommer, University of Karlsruhe, ITE, Germany; F. Tumbrägel, B. Taddiken, EADS Military Aircraft, Terrain Data Based Systems 571

Tactical HIGH™ - Solution Separation Methods Applied to the Warfighter Environment
J. Waid, B. Fly, Honeywell Defense & Space Electronic Systems 581

Navigating with Time Difference of Arrival Measurements Obtained from Signals of Opportunity
K.A. Fisher, U.S. Air Force; J.F. Raquet, M. Pachter, U.S. Air Force Institute of Technology 591

New Generation GPS and Radar Aided Inertial Navigation System for Ballistic Missile Interceptors
J.L. Anders, C. Bubar, V. Estrada, C. Johnson, R.S. Ornedo, Raytheon Company 598

Cold Atom Interferometer as Inertial Measurement Unit for Precision Navigation
C. Jekeli, Ohio State University 604

E1: Geodetic and Geoinformation Science 3-Positioning with GPS and IMU

GPS-Network Analysis with BLIMPBE: A Less Biased Alternative to Least-Squares Adjustment
K. Snow, TOPCON Positioning Systems, Inc.; B. Schaffrin, Ohio State University 614

Real-Time GPS Differentiation Through the 2.5G/3G Mobile Communication Media: A Case Study Using GPRS
S.A. Haidar, S.S. Saab, D.M. Issa, A.A. Zein, Lebanese American University 626

E2: Algorithms and Methods

GPS Signal Tracking with Kalman Filter Based on Joint Code Delay and Carrier Phase and Frequency Error Discriminator C. Yang, Sigtem Technology, Inc.	631
Sigma-Point Kalman Filters for Integrated Navigation R. van der Merwe, Eric A. Wan, Oregon Health & Science University.....	641
Fading Multipath Reduction via FLL-Aided Code Tracking in GPS S.K. Kalyanaraman, M.S. Braasch, Ohio University	655
Nearly Orthogonal Codes in GNSS Using Unequal Code Lengths Q. Zhengdi, S. Turunen, The Nokia Corporation, Finland	666
Terrain Reference Navigation Using Airborne LAser SCanner (ALASCA) - Preliminary Flight Test Results J. Campbell, M. Uijt de Haag, F. van Graas, Ohio University	671
Towards Instantaneous Network-Based RTK GPS Over 100 km Distance I. Kashani, Ohio State University and Technion - Israel Institute of Technology; D.A. Grejner-Brzezinska, Ohio State University; P. Wielgosz, Ohio State University & University of Warmia and Mazury, Poland	679
Performance of Receiver Autonomous Integrity Monitoring (RAIM) in the Presence of Simultaneous Multiple Satellite Faults Y.C. Lee, The MITRE Corporation	687

E3: NDGPS Enhancements

Performance of Signal Designs for Improved Data Capacity from DGPS Radio Beacons P. Swaszek, University of Rhode Island; R. Hartnett, K. Gross, U.S. Coast Guard Academy; P. Enge, Stanford University; G. Johnson, John J. McMullen Associates, Inc.....	698
HA-NDGPS RTK Positioning as a Function of Baud Rate: 50 - 1000 bps B.W. Remondi, K. Ferguson, M. Albright, The XYZs of GPS, Inc.....	709
Development of an Antenna Coupler That Fully Compensates the Deficiencies of Electrically Short LF/MF Antennas J.R. Pinks, Nautel, Inc.....	719
NDGPS Reference Station and Integrity Monitor Architecture Modernization K. Ferguson, M. Albright, B.W. Remondi, The XYZs of GPS, Inc.; A. Cleveland, M. Parsons, USCG C2CEN	729
DGPS and WAAS Maritime Accuracy and Availability Studies G. Johnson, John J. McMullen Associates, Inc.; R. Hartnett, U.S. Coast Guard Academy; P. Swaszek, University of Rhode Island.....	741

High-Accuracy DGPS and Precise Point Positioning Based on Ohio CORS Network

P. Wielgosz, Ohio State University & University of Warmia and Mazury, Poland; D.A. Grejner-Brzezinska, Ohio State University; I. Kashani, Ohio State University & Technion - Israel Institute of Technology 754
