

ION GNSS 2004 Proceedings

Table of Contents

A **red paper title** indicates a student paper sponsored by the ION Satellite Division.
A **Yellow highlighted paper title** indicates an **Award for Best Paper Presentation** of Session.

A1: GNSS Receiver Algorithms 1

Turbo DLL: An Innovative Architecture for Multipath Mitigation in GNSS Receivers

F. Dovis, M. Pini, Politecnico di Torino, Italy; P. Mulassano, Istituto Superiore Mario Boella, Italy 1

A New Multipath and Noise Mitigation Technique Using Data/Data-Less Navigation Signals

O. Julien, G. Lachapelle, M.E. Cannon, The University of Calgary, Canada 8

Extended Kalman Filter-Based Tracking of Weak GPS Signals Under High Dynamic Conditions

N.I. Ziedan, J.L. Garrison, Purdue University 20

C/A-Code Synchronization Using Analog Feedback Shift Registers (AFSR)

D.M. Kaegi, H. Mathis, University of Applied Sciences Rapperswil, Switzerland;
P. Flammant, A. Thiel, u-blox ag., Switzerland 32

Performance of Multi-path Mitigation Techniques at Low Signal to Noise Ratios

A.R. Pratt, QinetiQ Ltd., U.K. 43

Monte Carlo Global Search for Bayesian, GPS, Parameter Estimation

M.C. Bromberg, Elected Engineering Inc.; I.F. Progni, California State Polytechnic University Pomona 54

Calibration of a Low Cost Clock Using Wide Area Augmentation System (WAAS) Signals

D.M. Lin, J.B.Y. Tsui, U.S. Air Force Research Laboratory 61

Real Time Fast Acquisition Based on Hardware FFT for a GPS/EGNOS Receiver

O. Otaegui, S. Urquijo, G. Rohmer, Fraunhofer Institut for Integrated Circuits, Germany 66

B1: Unintentional Interference & Jamming

Modulated Signal Interference in GPS Acquisition

S. Deshpande, The University of Calgary, Canada 76

GNSS Interference Localisation Method Employing Inverse Diffraction Integration with Parabolic Wave Equation Propagation	
T.A. Spencer, R.A. Walker, Queensland University of Technology, Australia; R. Hawkes, Defence Science and Technology Organisation- Edinburgh	87
Interference Detection by Means of the Software Defined Radio	
L. Marti, F. van Graas, Ohio University	99
Locating the Jammer Using A/J Software Receiver	
A. Brown, S. Ganguly, A. Jovancevic, N. Bhatia, Y. Lee, Center for Remote Sensing, Inc.	110
The European GNSS L5/E5 Interference Environment and the Performance of Pulsed Interference Mitigation Techniques	
M. Powe, J.I.R. Owen, Defence Science and Technology Laboratory, U.K.	122
Interference Cancellation Using Power Minimization and Self-Coherence Properties of GPS Signals	
Y.T.J. Morton, Miami University; L.L. Liou, D.M. Lin, J.B.Y. Tsui, Air Force Research Laboratory; O. Zhou, Miami University	132
Mitigation of Narrow-Band Interference on Software Receivers Based on Spectrum Analysis	
Z. Jiang, C. Ma, G. Lachapelle, The University of Calgary, Canada	144
GPS Jamming - The Enemy Inside!	
M. Phocas, J. Bickerstaff, CEVA Inc., U.K.; T. Haddrell, Integrated Navigation Systems	156
Performance of Integer Parameter Estimation Algorithm for GPS Signals in Noisy Environment	
M. Shah, Y-C. Lai, Arizona State University	166
C1: GNSS Status & Plans (Institutional Issues, Operation & Control Strategy, Spectrum Management)	
Japanese Experimental GPS Augmentation Using Quasi-Zenith Satellite System (QZSS)	
I. Kawano, M. Mokuno, S. Kogure, M. Kishimoto, Japan Aerospace Exploration Agency, (JAXA), Japan	175
The European Centre for Satellite Navigation Applications	
R. Reclus, C. Carle, Grand Toulouse, France	182
Analysis of Potential CW Interference Effects Caused by UWB Devices on GNSS Receivers	
B. Godefroy, M. Poncelet, J. Chenebault, Pole Star, France	187
The Need for GNSS Market Development	
A. Lyon, R. Kirjner, U. Guida, The European Satellite Services Provider	197

D1: Land Applications 1 (Static Applications)

Great Britain's GPS Height Corrector Surface

M. Ziebart, J. Iliffe, P. Cross, University College London, U.K.; R. Forsberg, G. Strykowski, Kort og Matrikelstyrelsen, Denmark; C. Tscherning, University of Copenhagen, Denmark..... 203

Integration of GPS, Accelerometer and Optical Fiber Sensors for Structural Deformation Monitoring

X. Li, University of New South Wales, Australia..... 211

Using High-Rate GPS Data to Monitor the Dynamic Behavior of a Cable-Stayed Bridge

A.P.C. Larocca, University of Sao Paulo, Brazil..... 225

Bridge Deflection Monitoring and Frequency Identification with Single Frequency GPS Receivers

E. Cosser, University of Nottingham, U.K. 235

GPS Based Map Matching in the Pseudorange Measurement Domain

S. Syed, The University of Calgary, Canada..... 241

Semi-Real-Time Direct Geo-Referencing of Integrated Laser Scanning and CCD Sensor by Combining GPS/IMU and Bundle Block Adjustment of CCD Images

M. Nagai, R. Shibasaki, D. Manandhar, H. Zhao, The University of Tokyo, Japan; H. Kumagai, Tamagawa Seiki Co., Ltd., Japan 253

Improvement of Positioning Accuracy of Landslide Monitoring Systems by GPS

S. Oda, M. Nakamura, K. Yui, M. Genda, H. Toyozumi, T. Fujise, Y. Watanabe, J. Sato, Japan Radio Co., Ltd., Japan..... 261

Mitigation of Multipath Effects Based on GPS Phase Frequency Feature Analysis for Deformation Monitoring Applications

Y.L. Xiong, Hong Kong Polytechnic University, Hong Kong / Southwest Jiaotong University, China; X.L. Ding, W.J. Dai, W. Chen, Hong Kong Polytechnic University, Hong Kong; D.F. Huang, Southwest Jiaotong University, China 268

E1: Aviation Applications 1

GPS Aided Inertial Navigation Avionics (GAIA) Integrated with MSAS and Maritime DGPS Beacon

H. Tomita, M. Harigae, Japan Aerospace Exploration Agency, Japan; K. Kokue, Y. Shiozawa, Tamagawa Seiki Co., Ltd., Japan 277

DC-3 Flying Laboratory - Navigation Sensor and Remote Sensing Flight Test Results

J.L. Campbell, M. Uijt de Haag, F. van Graas, T. Arthur, T.J. Dickman, Ohio University 285

Developing an Automatic Control System of Unmanned Aircrafts with a Single-Antenna GPS Receiver

S. Lee, J. Kim, A. Cho, H. Cheong, C. Kee, Seoul National University, South Korea 296

Design and Test Results of Software Based IF Level GPS Signal Simulator

J.H. Won, S.J. Ko, J.S. Lee, GNSS Laboratory, Ajou University, Korea 305

Measuring Ionospheric Scintillation in the Equatorial Region Over Africa, Including Measurements From SBAS Geostationary Satellite Signals	
A.J. Van Dierendonck, <i>GPS Silicon Valley</i> ; B. Arbesser-Rastburg, <i>ESA-ESTEC</i>	316
Use of Post-Processed GPS Data as a Truth Source for Long Baseline Flight Testing of the Ground-Based Regional Augmentation System (GRAS)	
W.S. Ely, <i>Airservices Australia</i>	325
LAAS Reference Antennas—Key Siting Considerations	
A.R. Lopez, <i>BAE Systems</i>	335
Shipboard-Relative Global Positioning System (SRGPS) Demonstration System Design	
K. Boseley, J. Waid, <i>Honeywell</i>	344
F1: Atmospheric Effects 1 – Ionosphere	
An Enhanced UNB Ionospheric Modeling Technique for SBAS: The Quadratic Approach	
H. Rho, R.B. Langley, <i>University of New Brunswick, Canada</i> ; A. Komjathy, <i>NASA Jet Propulsion Laboratory / California Institute of Technology</i>	354
A New Technique to TEC Regional Modeling Using a Neural Network	
R.F. Leandro, <i>University of New Brunswick, Canada</i>	366
Satellite Navigation vs. the Ionosphere: Where Are We, and Where Are We Going?	
T. Dehel, F. Lorge, J. Warburton, <i>Federal Aviation Administration Technical Center</i> ; D. Nelthropp, <i>Titan Corp.</i>	375
Ionospheric Estimation Using Extended Kriging for a Low Latitude SBAS	
J. Blanch, T. Walter, P. Enge, <i>Stanford University</i>	387
GPS Scintillations in the European Arctic Related to the Large-Scale Ionospheric Convection	
C.N. Mitchell, <i>University of Bath, U.K.</i> ; G. De Franceschi, L. Alfonsi, <i>I.N.G.V., Italy</i> ; M. Lester, <i>University of Leicester, U.K.</i>	392
Analysis of Ionospheric Scintillations Using Wideband GPS L1 C/A Signal Data	
T.E. Humphreys, B.M. Ledvina, M.L. Psiaki, P.M. Kintner, Jr., <i>Cornell University</i>	399
An Ionospheric Forecasting System	
B. Khatatov, M. Murphy, M. Gnedin, B. Cruickshank, J. Boisvert, J. Sheffel, V. Jayaraman, <i>Fusion Numerics Inc.</i> ; V. Yudin, <i>National Center for Atmospheric Research</i> ; T. Fuller-Rowell, <i>NOAA/CIRES</i>	408
Precise Estimation of Absolute Ionospheric Delay Based on GPS Active Network	
W. Chen, C. Hu, S. Gao, Y. Chen, X. Ding, <i>Hong Kong Polytechnic University</i> ; S.C-W. Kowk, <i>Geodetic Survey Section, Lands Department, Hong Kong</i>	420

A2: GNSS Receiver Algorithms 2

FFT Based High Sensitivity Indoor GPS Receiver Technologies Using CDMA Cellular Network

C.-W. Park, S. Choi, J. Yoon, Samsung Electronics, Korea 428

Real-Time Hybrid-Domain WaveSmooth™ Code Processing Using Wavelets

C. Bartone, Y. Zhang, Ohio University 436

DirAc: An Integrated Circuit for Direct Acquisition of the M-Code Signal

J.W. Betz, J.D. Fite, P.T. Capozza, The MITRE Corporation 447

FFT-Based Acquisition of GPS L2 Civilian CM and CL Signals

M.L. Psiaki, Cornell University; 457

Optimum Tracking Loop Design for the New L2 Civil Signal Based on ML Estimation

D. Wang, K. Yamada, T. Okada, O. Arai, Furuno Electric Co., Ltd., Japan 474

Implementation of Correlation Power Peak Ratio Based Signal Detection Method

J. Jung, Trimble Navigation Limited 486

Fast and Parallel Matched Filters in Time Domain

D. Akopian, S. Agaian, The University of Texas at San Antonio 491

Optimum C/A Code Ranging Methods and Performance Evaluation

N.F. Krasner, Qualcomm 501

H-infinity Controller Design for GPS Receiver Tracking Loop

H.-S. Wang, H-S. Wu, National Taiwan Ocean University, Taiwan; S-W. Chen, Industrial Technology Research Institute, Taiwan 510

Comparative Performance Analysis of Aided Carrier Tracking Loop Algorithms in High Noise/High Dynamic Environments

C.R. Hamm, W.S. Flenniken, D.M. Bevly, Auburn University; D.E. Lawrence, Phase IV Systems, Inc. 523

B2: Military Applications

SPS v PPS: - Why Military GPS Applications Require “Military” GPS

J.T. Kelly, Rockwell Collins Inc. 533

Feasible Architectures for Joint Precision Approach and Landing System (JPALS) For Land and Sea

B.R. Peterson, G. Johnson, J. Stevens, ARINC Engineering Services, LLC 544

LOCO GPSI: Detection and Location of GPS Interference/Jamming

K. Simonsen, SPAWAR Systems Center San Diego; M. Suycott, SAIC; R. Crumplar, Whitney, Bradley, & Brown Inc.; S. Sloat, SAIC 555

Direct P(Y)/M-Code Acquisition

A. Jovancevic, S. Ganguly, S. Zigic, Center for Remote Sensing, Inc. 561

Fast Direct-Y GPS Acquisitions with Inaccurate Time	
K. Heckroth, K. Scherrer, J. Nielson, Rockwell Collins Inc.....	573
Effect of Adaptive Array Processing on GPS Signal Crosscorrelation	
R.L. Fante, M.P. Fitzgibbons, K.F. McDonald, The MITRE Corporation	579
Principles of Adaptive Space-Time-Polarization Cancellation of Broadband Interference	
R.L. Fante, The MITRE Corporation	584
GPS Signal Reconstitution	
S. Ganguly, A. Jovancevic, M. Kirchner, J. Noronha, S. Zigic, Center for Remote Sensing, Inc.	592

C2: Galileo System Design

The Galileo Integrity Concept

V. Oehler, F. Luongo, J.-P. Boyero, R. Stalford, H.L. Trautenberg, Galileo Industries GmbH, Germany; J. Hahn, F. Amarillo, M. Crisci, B. Schlarmann, J.F. Flamand, European Space Agency (ESA).....	604
---	-----

Galileo Orbit Selection

R. Zandbergen, ESOC, European Space Agency; S. Dinwiddy, J. Hahn, E. Breeuwer, D. Blonski, ESTEC, European Space Agency	616
--	-----

Assessment of GALILEO Performances Based on the GALILEO System Test Bed Experimentation Results

M. Falcone, F. Amarillo, E. van der Wenden, ESA ESTEC, The Netherlands	624
--	-----

Combined Galileo/GPS Frequency and Signal Performance Analysis

J.-A.A. Rodriguez, M. Irsigler, G.W. Hein, T. Pany, University FAF Munich, Germany.....	632
---	-----

Status of GSTB-V2/A Satellite Programme

E. Rooney, J. Paffett, M. Unwin, Surrey Satellite Technology Ltd., U.K.; A. Garutti, European Space Agency	650
---	-----

Galileo Integrity Monitoring Network Simulation and Optimization

M. van den Bossche, C. Bourga, B. Lobert, Alcatel Space, France.....	654
--	-----

GPS Galileo Time Offset: How It Affects Positioning Accuracy and How to Cope with It

A. A. Moudrak, A. Konovaltsev, J. Furthner, A. Hornbostel, J. Hammesfahr, German Aerospace Center, Germany	660
---	-----

Interoperability Between GPS and Galileo

S. Ganguly, A. Jovancevic, J. Noronha, Center for Remote Sensing, Inc.....	670
--	-----

D2: Land Applications 2 (Dynamic Applications)

GNSS-Based Sensor Fusion for Telematic Applications in Railway Traffic

S. Bedrich, S. Müncheberg, Kayser-Threde GmbH, Germany.....	681
---	-----

Integrated Positioning Algorithms for Transport Telematics Applications

W.Y. Ochieng, M.A. Quddus, R.B. Noland, Imperial College London, U.K. 692

Performance Evaluation of Sensor Combinations on Mobile Robots for Automated Platoon Control

S. Crawford, M.E. Cannon, The University of Calgary, Canada; D. Létourneau, P. Lepage, F. Michaud, *University of Sherbrooke*, Canada 706

The Aiding of a Low-Cost MEMS INS for Land Vehicle Navigation Using Fuzzy Logic Expert System

J.-H. Wang, The University of Calgary, Canada 718

Design and Testing of a Robust High Speed Rail Prototype GPS Locomotive Location System

T. Mueller, D. Dow, J. Brawner, R. Bortins, P. Davis, D. Sweet, Seagull Technology, Inc.; S. Alban, Stanford University; F. Meek, Union Pacific Railroad 729

Automated Traffic Incident Detection with GPS Equipped Probe Vehicles

C. Basnayake, The University of Calgary, Canada 741

Design of an AGV for Improved CDGPS-Based Control Performance

M. Joerger, J. Christ, R. Duncan, B. Pervan, Illinois Institute of Technology 751

High Precision Kinematic GPS Positioning of Ski Jumpers

T. Blumenbach, Geodetic Institute of the Technical University Dresden, Germany 761

GPS/SBAS and Additional Sensor Integration for Pedestrian Applications in Difficult Environments

G. Abwerzger, B. Hofmann-Wellenhof, B. Ott, E. Wasle, TeleConsult Austria GmbH, Austria 766

E2: Inertial Navigation Systems

The Need for Transfer Alignment in a GPS Jamming Environment and Optimisation for MEMS IMUs

P.D. Groves, C.A. Littlefield, D.C. Long, QinetiQ Ltd., U.K. 775

An ANFIS-Based Modeling of Thermal Drift of MEMS-Based Inertial Sensors

W. Abdel-Hamid, The University of Calgary, Canada 784

Attitude/RTK/INS Integrated System: Experimental Results

V.G. Mogilnitsky, L.B. Rapoport, A.V. Khvalkov, A.I. Gribkov, V.I. Stankevich, Topcon Positioning Systems/Javad Navigation Systems 792

On the Use of Redundant Inertial Data for Geodetic Applications

I. Colomina, M. Giménez, J.J. Rosales, M. Wis, Institute of Geomatics and Universitat Politècnica de Catalunya, Spain 801

Improving the Positioning Accuracy of DGPS/MEMS IMU Integrated Systems Utilizing Cascade De-noising Algorithm

K.-W. Chiang, H. Hou, X. Niu, N. El-Sheimy, The University of Calgary, Canada 809

MEMS GPS/INS for Micro Air Vehicle Application	
S. Mizukam, Tamagawa Seiki Co., Ltd., Japan; M. Sugiura, Y. Muramatsu, Fuji Heavy Industries, Ltd. Japan; H. Kumagai, Tamagawa Seiki Co., Ltd., Japan.....	819
Performance Test Results on an Integrated GPS/MEMS Inertial Navigation Package	
A. Brown, Y. Lu, NAVSYS Corporation.....	825
Robust Sensor Fusion for MEMS GPS/IMU in Diverse Flight Environments	
J.A. Rios, D. Liccardo, Crossbow Technology, Inc.	833
Development of a Piezoelectric-Driven Meso-Scale MEMS-Technology Gyroscope	
J.E. Jackson, A.L. Highsmith, R.K. Pandey, L.T. Wurtz, The University of Alabama	845
Miniature MEMS Quartz INS / GPS Description and Performance Attributes	
R. Jaffe, S. Bonomi, A.M. Madni, BEI Technologies, Inc.	852
F2: Atmospheric Effects 2 - Troposphere	
GNSS-Based Measurement of Atmospheric Tides	
T.E. Humphreys, M.C. Kelley, P.M. Kintner, Jr., Cornell University	864
GPS Derived Tropospheric Delay Corrections to Radar Interferometry	
L. Ge, H.-C. Chang, The University of New South Wales, Australia; C. Yonezawa, Remote Sensing Technology Center, of Japan, Japan; C. Rizos, The University of New South Wales, Australia.....	881
4-D Tropospheric Tomography Using a Ground-Based Regional GPS Network and Vertical Profile Constraints	
V.A. Hoyle, S.H. Skone, N.A. Nicholson, The University of Calgary, Canada.....	892
Analysis of Tropospheric Correction Models for Local Events within the GSTB Test Case APAF	
A. Hornbostel, M.M. Hoque, German Aerospace Center, Institute of Communications and Navigation, Germany	902
Interpolating Residual Zenith Tropospheric Delays for Improved Wide Area Differential GPS Positioning	
Y. Zheng, Queensland University of Technology, Australia	915
Improved Tropospheric Delay Estimation for Long Baseline, Carrier-Phase Differential GPS Positioning in a Coastal Environment	
K.M. Cove, M. Santos, University of New Brunswick, Canada; D. Wells, University of New Brunswick, Canada / University of Southern Mississippi; S. Bisnath, Harvard-Smithsonian Center for Astrophysics	925
Precise GPS Atmosphere Sensing Based on Un-Differenced Observations	
M. Abdel-salam, Y. Gao, The University of Calgary, Canada	933
Impacts of Stochastic Modeling on GPS-Derived ZTD Estimations	
S. Jin, J. Wang, The University of New South Wales, Australia	941

A3: GNSS Software Receivers

Architecture of a Reconfigurable Software Receiver

G.W. Heckler, J.L. Garrison, Purdue University 947

Implementation of a Software GPS Receiver

C. Ma, G. Lachapelle, M.E. Cannon, The University of Calgary, Canada 956

Real-Time Processing and Multipath Mitigation of High-Bandwidth L1/L2 GPS Signals with a PC-Based Software Receiver

T. Pany, University FAF Munich, Germany; F. Förster, Fraunhofer Institute for Integrated Circuits Erlangen, Germany; B. Eissfeller, University FAF Munich, Germany 971

A Real-Time GPS Civilian L1/L2 Software Receiver

B.M. Ledvina, M.L. Psiaki, D.J. Sheinfeld, A.P. Cerruti, S.P. Powell, P.M. Kintner, Cornell University 986

DSP & GPS Combination for Mobile Communication Platforms

P. Anderson, G. Whitworth, V. Ashe, T. Carter, CEVA Inc., U.K. 1006

Navigator GPS Receiver for Fast Acquisition and Weak Signal Space Applications

L. Winternitz, M. Moreau, G.J. Boegner, Jr., NASA Goddard Space Flight Center; S. Sirotzky, QSS Group, Inc. 1013

Galileo Receiver Performance Under GPS Interference and Multipath With the GRANADA Software Receiver

A. Fernández, J. Diez, DEIMOS Space, Spain; L. Marradi, Laben SpA; V. Gabaglio, Galileo Joint Undertaking 1027

Acquisition Schemes for a GPS L5 Software Receiver

B. Zheng, G. Lachapelle, The University of Calgary, Canada 1035

Positioning with a Software Receiver Under Weak Tracking Conditions with Software Simulated IF-Signals

R. Kaniuth, A. Posfay, T. Pany, B. Eissfeller, University FAF Munich, Germany 1041

B3: Integrated Navigation Systems 1 (Integrated Multi-Sensor Navigation Systems)

Optimising the Integration of Terrain Referenced Navigation with INS and GPS

P.D. Groves, R.J. Handley, QinetiQ Ltd., U.K.; A.R. Runnalls, Data Fusion Research Limited, U.K./University of Kent, U.K. 1048

A Quaternion-Based Unscented Kalman Filter for the Integration of GPS and MEMS INS

E.H. Shin, The University of Calgary, Canada 1060

Improving Low-Cost GPS/MEMS-Based INS Integration for Autonomous MAV Navigation by Visual Aiding

S. Winkler, H.-W. Schulz, M. Buschmann, T. Kordes, P. Vörsmann, Technical University of Braunschweig, Germany 1069

Multi-Sensor Systems for Pedestrian Navigation G. Retscher, Vienna University of Technology, Austria	1076
An Adaptive Neuro-Fuzzy Model to Bridging GPS Outages in MEMS-IMU/GPS Land Vehicle Navigation N. El-Sheimy, W. Abdel-Hamid, G. Lachapelle, The University of Calgary, Canada	1088
Multiple Model Kalman Filtering for GPS and Low-Cost INS Integration C. Hide, T. Moore, M. Smith, The University of Nottingham, U.K.....	1096
Real-Time Nonlinear Filtering Methods for INS/DGPS In-Motion Alignment M.Tanikawara, Ritsumeikan University, Japan; N. Asaoka, Matsushita Electric Industrial Co., Ltd., Japan; M. Ooiwa, NSK Ltd., Japan; Y. Kubo, S. Sugimoto, Ritsumeikan University, Japan ...	1104
Autonomous Vehicle Navigation with Carrier Phase DGPS and Laser-Scanner Augmentation R. Hirokawa, K. Nakakuki, K. Sato, R. Ishihara, Mitsubishi Electric Corporation Kamakura Works, Japan.....	1115

C3: Multipath

GPS Multipath Mitigation in Measurement Domain and Its Applications for High Accuracy Navigation Y. Yang, R.R. Hatch, R.T. Sharpe, NavCom Technology, Inc.	1124
Fine Delay Estimation Technique Under Multipath Z. Zhen, L.C. Law, E. Gunawan, Nanyang Technological University, Singapore	1131
Analysis of the Multiple DLL Architecture: A Novel Solution for Reducing the Multipath Effect in GNSS Receivers F. Dovis, M. Pini, Politecnico di Torino, Italy; P. Mulassano, Istituto Superiore Mario Boella, Italy; G. Heinrichs, IfEN GmbH, Germany.....	1138
Evaluation of Multipath Error and Signal Propagation in Complex 3D Urban Environments for GPS Multipath Identification Y. Suh, The University of Tokyo, Japan; Y. Konishi, NEC Japan; T. Hakamata, Tokyo University of Marine Science and Technology, Japan; D. Manandhar, R. Shibasaki, The University of Tokyo, Japan; N. Kubo, Tokyo University of Marine Science and Technology, Japan	1147
Measuring the Navigation Multipath Channel – A Statistical Analysis A. Steingass, A. Lehner, German Aerospace Center (DLR), Germany	1157
Anti-Multipath Triangulation (AMT) for Positioning in Dense Urban Environments J. Stone, M. Chansarkar, SiRF Technology, Inc.	1165
Investigations into Multipath Effects on GNSS Multiple-Frequency Single Epoch High Precision Positioning L. Lau, University College London, U.K.	1169

Real-Time Multipath Mitigation with WaveSmooth™ Technique Using Wavelets Y. Zhang, C. Bartone, Ohio University	1181
Channel Estimation Technique for Positioning Accuracy Improvement in Multipath Propagation Scenarios A. Schmid, A. Neubauer, Infineon Technologies AG, Germany.....	1195
Comparison of Multipath Error Elimination Techniques Under Relatively Severe Multipath Environments R. Kumar, M. Ahmad, California State University	1203
D3: Marine Applications & Tools	
Precision Maritime Inshore Navigation with a Tightly-Coupled Sensor System A. Brown, D. Boid, NAVSYS Corporation	1211
Transmitter Effects and Receiver Prototyping for Improved Data Capacity from DGPS Radiobeacons G. Johnson, John J. McMullen Associates, Inc.; P. Swaszek, University of Rhode Island; R. Hartnett, U.S. Coast Guard Academy; P. Enge, Stanford University.....	1218
Naval Oceanographic Office Positioning Systems Upgrades and Intentions to Operationally Geolocate Bathymetric Measurements to a Seamless Reference Frame E.N. Arroyo-Suarez, Naval Oceanographic Office; V. Hsiao, NavCom Technology, Inc.....	1225
Low-Cost GPS Based Wave Height and Direction Sensor for Marine Safety M. Harigae, I. Yamaguchi, T. Kasai, H. Igawa, Japan Aerospace Exploration Agency; H. Nakanishi, T. Murayama, Japan Weather Association; Y. Iwanaka, Zeni Lite Buoy Co., Ltd.; H. Suko, Furuno Electric Co., Ltd., Japan	1234
Tidal Height Retrieval Using Globally Corrected GPS in the Amundsen Gulf Region of the Canadian Arctic T. Wert, Mapping and Charting Establishment, Dept. of National Defence, Canada; P. Dare, J.H. Clarke, University of New Brunswick, Canada	1246
Wide Area Navigation Algorithm for Marine DGPS Users Under Disturbed Ionospheric Conditions S. Skone, R. Yousuf, The University of Calgary, Canada; A. Coster, MIT Haystack Observatory.....	1256
The Need for Range Rate Corrections in DGPS Correction Messages B. Park, J. Kim, S. Jun, C. Kee, Seoul National University, South Korea; R. Kalafus, Trimble Navigation.....	1266
Development and Evaluation of a Precision Coordinate Transfer System for SRGPS I.S. Ahn, Bradley University; R. Breslau, Titan Systems Inc.; J. Sennott, Tracking and Imaging Systems Inc.....	1277

Analysis of the Utility of NOAA-Generated Tropospheric Refraction Corrections for the Next Generation Nationwide DGPS Service

S.B. Bisnath, Harvard-Smithsonian Center for Astrophysics; D. Dodd, University of Southern Mississippi; A. Cleveland, M. Parsons, United States Coast Guard..... 1288

E3: Space-Based Augmentation Systems

The Ionospheric Impact of the October Storm Event on WAAS

A. Komjathy, L. Sparks, A.J. Mannucci, Jet Propulsion Laboratory/California Institute of Technology; A. Coster, MIT Haystack Laboratory..... 1298

Ionospheric Threats to Space-Based Augmentation System Development

S. Datta-Barua, Stanford University 1308

Evaluating Ionospheric Effects on SBAS in the Low Magnetic Latitude Region

T. Sakai, K. Matsunaga, K. Hoshinoo, Electronic Navigation Research Institute, Japan; T. Walter, Stanford University 1318

Performance Analysis of Korean WADGPS Algorithms with Korean NDGPS Data

Y. Yun, D. Kim, C. Pyong, C. Kee, Seoul National University, Korea 1329

Analysis of the Effects of GPS Receiver Acquisition Parameters

S.M. Deshpande, M.E. Cannon, The University of Calgary, Canada 1340

Performance Enhancements for the Next Phases of WAAS

H. Habereeder, T. Schempp, M. Bailey, Raytheon Company..... 1350

Prototype Test Results of L1/L5 Signals of Future GEO Satellites

P-H. Hsu, L. Cheung, Raytheon Company; M.S. Grewal, California State University, Fullerton..... 1359

F3: Carrier-Phase Positioning

Relevance of Dual Frequency Surveying System Tests for Real Time Field Performance

B. Richter, A. Green, Leica Geosystems AG, Switzerland..... 1367

Using Cubic Splines to Mitigate Systematic Errors in GPS Relative Positioning

D.B.M. Alves, Sao Paulo State University, Brazil..... 1374

High Precision Kinematic GNSS Observations Up to 50 S/s for Airborne Gravimetry

A. Stürze, G. Boedecker, Bavarian Academy of Sciences and Humanities, Germany 1382

Traffic Flow Parameter Estimation and Road Surface Modeling From Airborne LiDAR Data

D. Grejner-Brzezinska, C. Toth, E. Paska, S. Moafipoor, The Ohio State University..... 1392

Monitoring the Deflections of Suspension Bridges Using a 100 Hz GPS Receivers

G.W. Roberts, E. Cosser, X. Meng, A. Dodson, The University of Nottingham, U.K..... 1403

Performance of Long-Baseline Real-Time Kinematic Applications by Improving Tropospheric Delay Modeling

D. Kim, University of New Brunswick, Canada; S. Bisnath, Harvard-Smithsonian Center for Astrophysics; R.B. Langley, P. Dare, University of New Brunswick, Canada 1414

Evaluation of Precise, Kinematic GPS Point Positioning

O.L. Colombo, GEST/NASA GSFC; A.W. Sutter, A.G. Evans, NSWCCD 1423

An Innovative Algorithm for Carrier-Phase Navigation

R.R. Hatch, R.T. Sharpe, Y. Yang, NavCom Technology, Inc. 1431

Cycle Slip Detection and Correction for Kinematic GPS Based on Statistical Tests of Innovation Processes

Y. Kubo, K. Sone, S. Sugimoto, Ritsumeikan University, Japan 1438

Failure Scenarios to be Considered with Kinematic High Precision Relative GNSS Positioning

A. Wieser, M.G. Petovello, G. Lachapelle, The University of Calgary, Canada 1448

Budget Analysis and Realization of Precise RTK-GPS via Compact Correction Messages Applied to Commercial GPS Receivers

J. Kim, B. Park, C. Kee, Seoul National University, Korea; A. Cleveland, M. Parsons, D. Wolfe, USCG Command & Control Engineering Center..... 1460

A4: GNSS ASICs, Chipsets, & Antennas

Enabling Location Based Services with a Combined Galileo/GPS Receiver Architecture

A. Schmid, A. Neubauer, Infineon Technologies AG, Germany; H. Ehm, R. Weigel, University Erlangen-Nuremberg, Germany; N. Lemke, G. Heinrichs, J. Winkel, IfEN GmbH, Germany; J.A. Avila-Rodriguez, R. Kaniuth, T. Pany, B. Eissfeller, University FAF Munich, Germany; G. Rohmer, B. Niemann, M. Overbeck, Fraunhofer Institute of Integrated Circuits, Germany..... 1468

AGGA-3: A Next Generation GNSS Baseband ASIC

S. Berberich, S. Fischer, Astrium GmbH; F. Griesauer, Austrian Aerospace; P. Silvestrin, R. Weigand, ESA-ESTEC..... 1480

NAVAJO GPS ASIC - The Ultimate Single Chip Baseband

G. Ffoulkes-Jones, CEVA Inc.; D. Belton, Integrated Navigation Systems Ltd.; D. Nolan, R. Frayling-Cork, CEVA Inc., 1488

PALINURO... A Single Chip GPS Receiver -RF, DSP, CPU, ROM, RAM All on One Piece of Silicon

P.G. Mattos, STMicroelectronics (R&D) Ltd., U.K.; G. Gramegna, STMicroelectronics, Catania, Italy 1501

Autonomous High Sensitivity and High Positioning Accuracy GPS Receiver

M. Hada, M. Shoji, Y. Uchida, K. Sorita, Y. Aiga, N. Tsuda, M. Nakamura, K. Washizu, T. Okamura, Japan Radio Co.,Ltd., Japan..... 1507

Integrated GNSS and Mobile Communication Terminal (NAVCOM)

G. Rohmer, M. Overbeck, Fraunhofer IIS, Germany; J. Seybold, TeleConsult Austria;
M. Restle, G. Heinrichs, IfEN GmbH, Germany; S. Haas, IMST GmbH, Germany;
J.-M. Sevrin, EADS-TELECOM, France..... 1515

Multiband L5 Capable GPS Antenna with Reduced Backlobes

Y. Lee, M. Kirchner, S. Ganguly, Center for Remote Sensing, Inc..... 1523

Phase Effects Analysis of Patch Antenna CRPAs for JPALS

U.S. Kim, D. De Lorenzo, J. Gautier, P. Enge, Stanford University; J.A. Orr,
Worcester Polytechnic Institute..... 1531

High Integrity GPS-SBAS Receiver Using Innovative Correlator and Software Approach for Avionics Applications

J.K. Ray, R.A. Nayak, S. Muralikrishna, S.S. Kiran, K.R. Shashidhara, M.R. Shenoy,
Accord Software & Systems Private Ltd., India..... 1539

Software-Aided Sequential Multi-Tap Correlator for Fast Acquisition

C.S. Nagaraj, Accord Software & Systems Pvt. Ltd., India; H.S. Jamadagni,
Indian Institute of Science, India; S. Muralikrishna, C. Vimala,
Accord Software & Systems Pvt. Ltd., India 1547

B4: Integrated Navigation Systems 2 Coupled GPS/Inertial Navigation Systems

Development of a Low-Cost Integrated Multi-Sensor System Using GPS Attitudes

H. Hoffmann, Y. Hoffmeister-Han, D. Gondy, Aerodata AG, Germany..... 1555

Mitigating the Correlations in INS-Aided GPS Tracking Loop Measurements: A Kalman Filter Based Approach

R. Babu, University of New South Wales, Australia..... 1566

Ultra Tight Coupling Implementation Using Real Time Software Receiver

A. Jovancevic, A. Brown, S. Ganguly, J. Noronha, B. Sirpatil,
Center for Remote Sensing, Inc..... 1575

GPS/MEMS Inertial Integration Methodology and Results

T. Ford, J. Hamilton, M. Bobye, NovAtel Inc., Canada; L. Day, BAE Systems Inc..... 1587

Deeply Integrated GPS/Low-Cost IMU for Low CNR Signal Processing: Flight Test Results and Real-Time Implementation

A. Soloviev, S. Gunawardena, F. van Graas, Ohio University..... 1598

Performance Analysis and Experimental Validation of a Doppler-Aided GPS/INS Receiver for JPALS Applications

T.-Y. Chiou, S. Alban, S. Atwater, J. Gautier, S. Pullen, P. Enge, Stanford University; D. Akos,
University of Colorado, Boulder; D. Gebre-Egziabher, University of Minnesota, Twin Cities;
B.S. Pervan, Illinois Institute of Technology..... 1609

Particle Filtering to Improve GPS/INS Integration

H.L. Dyckman, SPAWAR Systems Center San Diego; S. Sloat, Science Applications International Corporation; B. Pettus, U.S. Army CERDEC..... 1619

A Cost Effective Synchronization System for Multisensor Integration

B. Li, The University of New South Wales, Australia 1627

C4: Galileo Integrity & Augmentations

GNSS Local Augmentation Integrity Standards - Future Communications

Links to Users

C.S. Dixon, R.G. Morrison, EADS Astrium Ltd., U.K..... 1636

User Integrity Risk Calculation at the Alert Limit without Fixed Allocations

V. Oehler, H.L. Trautenberg, EADS Astrium GmbH; F. Luongo, Alenia Spazio; J.P. Boyero, GMV S.A.; B. Lobert, Alcatel Space 1645

Integrity Testcase Experimentation Results Within GSTB-V1

W. Werner, I. Deuster, IfEN GmbH, Germany; F.A. Fernandez, European Space Agency, The Netherlands 1653

Galileo and GPS Differential Integrity Performance for Area Coverage

Terrestrial Networks

A. Schmitz-Peiffer, M. Abele, EADS Astrium GmbH, Germany; C.S. Dixon, R. Morrison, EADS Astrium Ltd., U.K. 1663

Satellite Integrity Monitoring Concepts for GPS/Galileo Augmentation Systems

S. Pullen, P. Enge, Department of Aeronautics and Astronautics, Stanford University..... 1674

Modernizing WAAS

T. Walter, P. Enge, Stanford University; P. Reddan, Zeta Associates Inc. 1683

Investigation of Extending Receiver Autonomous Integrity Monitoring (RAIM) to Combined Use of Galileo and Modernized GPS

Y.C. Lee, The MITRE Corporation 1691

On the Role of HAP as Support System to Galileo Regional/Local Components

F. Dovis, L.L. Presti, Politecnico di Torino, Italy; P. Mulassano, Istituto Superiore Mario Boella, Italy 1699

D4: Scientific/Timing Applications

Monitoring the Neapolitan Volcanic Area Using an Advanced Multiple Reference Station RTK DGPS Technique

G. Pugliano, Parthenope University of Naples, Italy; F. Obrizzo, F. Pingue, V. Sepe, Osservatorio Vesuviano-INGV, Italy; P. Alves, G. Lachapelle, The University of Calgary, Canada 1703

Airborne GPS Down-Looking Occultation Experiments

T. Yoshihara, N. Fujii, K. Hoshinoo, K. Matsunaga, S. Saitoh, T. Sakai, Electronic Navigation Research Institute, Japan; T. Tsuda, Y. Aoyama, S. Danno, Kyoto University, Japan 1713

High Gain Antenna Measurements and Signal Characterization of the GPS Satellites D.M. Akos, S. Esterhuizen, University of Colorado; A. Mitelman, R.E. Phelts, P. Enge, Stanford University	1724
Thermal Modelling of GPS Block IIR Satellites for Precise Orbit Prediction S. Adhya, University College London, U.K.	1732
The International GPS Service - What's Next? 10th Anniversary Assembly Charts Future Directions J.M. Dow, European Space Operations Center, Germany; G. Gendt, GeoForschungsZentrum, Germany; A.W. Moore, R. Neilan, NASA/Jet Propulsion Laboratory; R. Weber, Technical University of Vienna, Austria.....	1740
The IGS GLONASS Pilot Project - Transitioning an Experiment into an Operational GNSS Service J.A. Slater, National Geospatial-Intelligence Agency; R. Weber, E. Fragner, University of Technology, Vienna, Austria.....	1749
Space Borne Hydrogen Maser and Time Management System for the Quasi-Zenith Satellite System (QZSS) S. Hama, K. Kimura, T. Morikawa, Y. Takahashi, H. Ito, H. Ishida, M. Fujieda, National Institute of Information and Communications Technology, Japan; M. Imae, National Institute of Advanced Industrial Science and Technology, Japan.....	1758
High Precision GPS IIR Orbit Prediction Using Analytical Non-conservative Force Models M. Ziebart, S. Edwards, S. Adhya, A. Sibthorpe, P. Arrowsmith, P. Cross, University College London, U.K.....	1764
E4: Aviation Applications 2	
Loran Additional Secondary Factor Correction Study for Aviation G. L. Roth, Locus, Inc.; D. Diggle, Ohio University; M.J. Narins, Federal Aviation Administration	1771
GPS Sensor Model for Modern Avionics System Simulation R. Malla, C. Behre, Raytheon Space and Airborne Systems	1777
LDGPS Performance Assessment Using the JPALS Availability Model J.R.A. Stevens, C. Varner, S.M. Boettcher, J.M. Glaeser, ARINC Engineering Services; J.E. Weir, J.F. Taylor Inc.	1786
A Sequential Probability Test for RAIM S. Chan, J.L. Speyer, University of California, Los Angeles.....	1798
Ultra-Tight Coupling (UTC) Technique in GPS RAIM Y. Ding, J. Sennott, Tracking and Imaging Systems Inc.	1803
Assessment of APL Error Model Components in Unfavorable Environments A. Teuber, University FAF Munich, Germany.....	1813

Airborne Multipath Investigation via a GPS Software Receiver

D.M. Akos, J.P. Weiss, University of Colorado, Boulder; T. Murphy, The Boeing Company; S. Pullen, Stanford University 1822

F4: Precise Point Positioning

Products and Applications for Precise Point Positioning Moving Towards Real-Time

P. Héroux, Natural Resources Canada; Y. Gao, The University of Calgary, Canada; J. Kouba, F. Lahaye, Y. Mireault, P. Collins, K. Macleod, P. Tétreault, Natural Resources, Canada; K. Chen, University of Calgary, Canada 1832

Real-Time Precise Point Positioning and Its Potential Applications

K. Chen, The University of Calgary, Canada 1844

Precise Point Positioning Method for a Static Survey in a High Multipath Environment

J.M. Strus, J.W. Sinko, SRI International 1855

Comparison of the Two Alternate Methods of the Wide Area Carrier Phase Positioning

D. Lapucha, R. Barker, Fugro Chance Inc.; H. Zwaan, Fugro Intersite B.V., The Netherlands 1864

Real-Time Point Positioning Performance Evaluation of Single-Frequency Receivers Using NASA's Global Differential GPS System

R.J. Muellerschoen, B. Iijima, R. Meyer, Y. Bar-Sever, Jet Propulsion Laboratory, California Institute of Technology; E. Accad, Raytheon ITSS 1872

Achieving Decimetre Accuracy with Single Frequency Standalone GPS Positioning

A.Q. Le, Delft University of Technology, The Netherlands 1881

Evaluation of High-Precision, Single-Frequency GPS Point Positioning Models

T. Beran, University of New Brunswick, Canada; S.B. Bisnath, Harvard-Smithsonian Center for Astrophysics; R.B. Langley, University of New Brunswick, Canada 1893

A Study on Improvement of Error in GPS Standard Positioning Service

T. Tanaka, J. Takamura, Keio University, Japan 1902

A5: Indoor Positioning

Performance Evaluation of the RF Receiver for Precision Positioning System

H.K. Parikh, W.R. Michalson, R.J. Duckworth, Worcester Polytechnic Institute 1908

Hybrid Positioning Using GPS and GSM Ranging Measurements

E. Favey, D. Ammann, C. Bürgi, u-blox AG, Switzerland 1918

The Next Generation of a Super Sensitive GPS System

L.R. Weill, California State University; N. Kishimoto, S. Hirata, Magellan Systems Japan, Inc., Japan; K.X. Chin, Galileo Positioning 1924

Indoor Positioning Using Wireless LAN Radio Signals

B. Eissfeller, D. Gänsch, S. Müller, A. Teuber, University FAF Munich, Germany 1936

Outdoor Navigation System Using Pseudolites	
T. Lee, H. Jun, D. Yun, C. Kee, Seoul National University, Korea	1948
UPGRADE RnS Indoor Positioning System in an Office Building	
J. Caratori, GET/INT Evry & IUT Cachan, France; M. Francois, N. Samama, A. Vervisch-Picois GET/INT Evry, France.....	1959
Indoor Positioning Using TDOA Measurements from Switching GPS Repeater	
G.-I. Jee, J.-H. Choi, S.-C. Bu, Konkuk University, Korea.....	1970
Right Hand Circularly Polarized (RHCP) Effects on the Measurements and Solutions of the Pseudolite-Based Indoor Navigation Systems	
H. Jun, Seoul National University, South Korea.....	1977
Two New Algorithms for Indoors Wireless Positioning System (WPS)	
Y. Wang, X. Jia, C. Rizos, The University of New South Wales, Australia	1988
B5: Algorithms & Methods 1	
Algorithm Performance & Carrier-Phase Processing	
Performance Evaluation of Differential Correlation for Single Shot Measurement Positioning	
A. Schmid, A. Neubauer, Infineon Technologies AG, Germany.....	1998
GPS Receiver Architecture Effects on Controlled Reception Pattern Antennas for JPALS	
D.S. De Lorenzo, J. Gautier, P. Enge, Stanford University; D. Akos, University of Colorado at Boulder	2010
A Single GPS Receiver as a Real-Time, Accurate Velocity and Acceleration Sensor	
L. Serrano, D. Kim, R.B. Langley, University of New Brunswick, Canada	2021
Advanced Techniques for Processing GPS Carrier Measurements in Space Applications	
A. Draganov, L. Haas, ITT Industries.....	2035
The GPS Toolkit – Open Source GPS Software	
B.W. Tolman, R.B. Harris, T. Gaussiran, D. Munton, J. Little, R. Mach, S. Nelsen, B. Renfro, The University of Texas at Austin; D. Schlossberg, The University of California at Berkeley.....	2044
Theoretical Analysis of S-curve for GNSS System	
M. Musso, G. Gera, C.S. Regazzoni, University of Genoa, Italy	2054
Seamless Handover of Combined GPS/Pseudolite Navigation	
J.-C. Juang, National Cheng Kung University, Taiwan	2059
Performance Enhancement of Attitude Determination System by Combining Single and Multiple Antennas	
J. Jang, S. Lee, C. Kee, Seoul National University, South Korea	2066
GPS and Digital Terrain Elevation Data (DTED) Integration	
M. Phatak, G. Cox, L. Garin, SiRF Technology, Inc.....	2074

Improvement on Integrity and Reliability of Vehicle Positioning by a New Map Matching Method

M. Yu, W. Chen, Z. Li, Y.Q. Chen, The Hong Kong Polytechnic University, Hong Kong 2086

C5: GNSS Interoperability & Systems Performance Validation, Modeling & Testing

A Long-Term Statistical Analysis of the Accuracy of GPS and GLONASS Broadcast Orbit and Clock Models

M.S.B. Starr, M.D. Powe, J.I.R. Owen, Defence Science and Technology Laboratory, U.K. 2095

Assessing SATNAV Performance Using the Navigation Tool Kit

J.W. Lavrakas, Overlook Systems Technologies, Inc.; T. Driver, *Analytical Graphics, Inc.*;
R. Conley, S.A. Hieronymus, D. Knezha, Overlook Systems Technologies, Inc. 2104

Estimating Continuity of GNSS

J.P. Fernow, D. O'Laughlin, The MITRE Corporation 2113

The Impact of Future Global Navigation Satellite Systems on Precise Carrier Phase Positioning

T. Richert, N. El-Sheimy, The University of Calgary, Canada 2124

Probabilistic Approach of Frequency Diversity as an Interference Mitigation Means

J.-L. Issler, L. Ries, J-M. Bourgeade, L. Lestarquit, CNES, France;
C. Macabiau, ENAC, France 2136

A Complete Software-Based IF GNSS Signal Generator for Software Receiver Development

O. Julien, B. Zheng, L. Dong, G. Lachapelle, The University of Calgary, Canada 2146

GNSS/Galileo Global and Regional Integrity Performance Analysis

H. Blomenhofer, W. Ehret, A. Leonard, Thales ATM GmbH, Germany; E. Blomenhofer, NavPos Systems GmbH, Germany 2158

GNSS - Coordinating the GPS-Galileo-GLONASS Constellations

C.W. Kelley, K.F. Davis, D.M. Nguyen, Boeing Integrated Defense Systems 2169

D5: GPS Modernization/GPS III

Acquisition of GPS L5 Signal Using Coherent Combining of I5 and Q5

C. Yang, Sigtem Technology, Inc.; C. Hegarty, M. Tran, The MITRE Corporation 2184

M-Code: Using Software Receiver

A. Brown, S. Ganguly, A. Jovancevic, M. Kirchner, Center for Remote Sensing, Inc. 2196

Study of Signal Combining Methodologies for GPS III's Flexible Navigation Payload

G.H. Wang, V.S. Lin, T. Fan, K.P. Maine, P.A. Dafesh, The Aerospace Corporation;
B. Myers, USAF, Joint Program Office 2207

LADO (Launch, Anomaly, and Disposal Operations), A New Challenge for GPS

S.K. Gupta, Boeing Integrated Defense Systems; B.M. Louie, GPS-Joint Program Office 2219

Hybrid Galileo/W-CDMA Receiver Prototype for Mass-Market Applications

G. Heinrichs, E. Wittmann, IfEN GmbH, Germany; R. Kronberger, C. Drewes, Infineon Technologies AG, Germany; T. Ostermann, A. Springer, University of Linz, Germany; L. Maurer, DICE GmbH & Co KG, Germany 2228

GPS Signal Quality Monitoring System

J.R.I. Christie, P.B. Bentley, J.W. Ciboci, C.A. Gellrich, J.M. Gondek, B.K. Knoth, M.B. Ressler, G.N. Oetzel, SRI International 2239

Joint Code Acquisition and Frequency Offset Estimation for GPS L5 Receivers

M. Wang, S.-W. Chen, Industrial Technology Research Institute, Taiwan 2246

Correcting Burst-Errors for Wide Area Augmentation System Applications

K.R. Holmes Sr., Warner Robins Air Logistic Center/ AFRL/SNRP; B. Kamali, Mercer University 2254

E5: Ground-Based Augmentation Systems 1

Experimental Observations and Integrity Monitor Applications of LAAS IMLA Carrier Phase Measurements

L. Gratton, S. Khanafseh, B. Pervan, Illinois Institute of Technology; S. Pullen, Stanford University; J. Warburton, William J. Hughes FAA Technical Center 2259

A GPS Multipath Simulator with Beam-Steering Antenna Modeling for JPALS LDGPS

S. Anderson, J.P. Weiss, P. Axelrad, University of Colorado, Boulder; R.P. Pennline, Arinc Engineering Services, LLC. 2271

Evaluation of a Tropospheric Correction Model for Airport Pseudolite

S. Fukushima, T. Yoshihara, Electronic Navigation Research Institute, Independent Administrative Institution, Japan; S. Suga, Toshiba Corporation Social Network Infrastructures Company, Japan 2283

Impact of Radiometric Water Vapor Measurements on Troposphere and Height Estimates by GPS

P. Haefele, University of the Bundeswehr, Germany; L. Martin, University of Bern, Switzerland; M. Becker, University of the Bundeswehr, Germany; E. Brockmann, Swiss Federal Office of Topography, Switzerland; J. Morland, S. Nyeki, C. Matzler, University of Bern, Switzerland; M. Kirchner, University of the Bundeswehr, Germany 2289

Failure Analysis of LAAS Integrated Multipath Limiting Antennas Using High-Fidelity Electromagnetic Models

D.N. Aloji, S. Kiran, Oakland University 2303

Representing GPS Orbits and Corrections Efficiently for Precise Wide Area Differential Positioning

Y. Feng, Y. Zheng, Z. Bai, Queensland University of Technology, Australia 2316

Multi-Mode Receivers for Verification of Ground- and Space-Based Augmentation Systems

D.A. Stratton, Rockwell Collins Inc.; J. Warburton, M. Magrogan, FAA Technical Center 2324

Detection of Anomaly Signal by Signal Quality Monitoring Receiver S. Saitoh, T. Yoshihara, S. Fukushima, N. Fujii, Electronic Navigation Research Institute, Japan	2331
---	------

F5: GPS Meteorology

Assessment of Impact of the Assimilation of GPS Radio Occultation Observations J.M. Aparicio, G. Deblonde, Meteorological Service of Canada.....	2337
--	------

Real-Time Sensing Atmospheric Water Vapor Using GPS Precise Orbit and Clock Products Y. Gao, S. Skone, K. Chen, N.A. Nicholson, The University of Calgary, Canada; R. Muellerschoen, Jet Propulsion Laboratory	2343
---	------

Precipitable Water Vapour Monitoring Using the Global Positioning System in Atlantic Canada C. Wang, P. Dare, University of New Brunswick, Canada	2353
---	------

GPS Performance in the Quantification of Integrated Water Vapor in Amazonian Regions L.F. Sapucci, UNESP, Brazil; J.F.G. Monico, FCT/UNESP, Brazil; A. Plana-Fattori, IAG-USP, Brazil; L.A.T. Machado, W.F.A. Lima, CPTEC-INPE, Brazil	2362
---	------

Ground-Based Radio Occultation Measurements Using the GRAS Receiver L. Olsen, Aalborg University, Denmark; A. Carlström, Saab Ericsson Space AB; P. Høeg, Aalborg University, Denmark	2370
--	------

Construction of 4D Water Vapor Field with Ground-based GPS Observations in Hong Kong Region Wang Xiaoya, Chen Yong-qi, The Hong Kong Polytechnic University, Li Ping Wah, The Hong Kong Observatory	2378
--	------

Validation of a Tropospheric Voxel Tomography Model in a Regional GPS Network N.A. Nicholson, V.A. Hoyle, S. Skone, M.E. Cannon, The University of Calgary, Canada	2386
--	------

Production of Regional 1 km x 1 km Water Vapor Fields Through the Integration of GPS and MODIS Data Z. Li, University College London, U.K.	2396
---	------

A6: Location Based Services

Three Dimensional Fuzzy Logic-Based Map Matching Algorithm for Location Based Service Applications in Urban Canyons S. Syed, M.E. Cannon, The University of Calgary, Canada	2404
---	------

Evaluation of Assisted GPS (AGPS) in Weak Signal Environments Using a Hardware Simulator M.D. Karunanayake, M.E. Cannon, G. Lachapelle, The University of Calgary, Canada; G. Cox, SiRF Technology Inc.....	2416
--	------

FURLONG: How to Test Future Location Based Services

T. Moore, C.J. Hill, C.J. Noakes, C.D. Hide, The University of Nottingham, U.K.; R. Saull, G. Close, SciSys Space and Defence Ltd.; R.V. Moore, Centre for Ecology and Hydrology 2427

Evaluating the Navigation Potential of the NTSC Analog Television Broadcast Signal

R.J. Eggert, J.F. Raquet, Air Force Institute of Technology 2436

Design, Simulation, & Testing of a Pedestrian Alert System (PAS)

C. Rodgers, D. Greenlee, R. Nelsen, G. Likakis, OPTIMUS Corporation; R. Blomberg, Dunlap and Associates 2447

Performance Analysis of Mobile Station Location Using Hybrid GNSS and Cellular Network Measurements

C. Botteron, E. Firouzi, P.-A. Farine, University of Neuchâtel, Switzerland 2458

Self-Contained Sensor Aided Kinematic HSGPS Positioning Algorithm

O.A. Mezentsev, The University of Calgary, Canada 2468

The Assisted GNSS, Technology and Applications

M. Monnerat, R. Couty, N. Vincent, Alcatel Space, France; O. Huez, France Telecom R&D, France; E. Chatre, Galileo Joint Undertaking 2479

B6: Algorithms & Methods 2 - Ambiguity Resolution, Multipath Mitigation & Stochastic Modeling

GPS Signal Analysis Using LHCP/RHCP Antenna and Software GPS Receiver

D. Manandhar, R. Shibasaki, The University of Tokyo, Japan; P.L. Normark, Nordnav Technologies, Sweden 2489

The Factorized Multi-Carrier Ambiguity Resolution (FAMCAR) Approach for Efficient Carrier-Phase Ambiguity Estimation

U. Vollath, Trimble Terrasat GmbH, Germany 2499

Baseline Precision Results Using Triple Frequency Partial Ambiguity Sets

A. Mowlam, University of Melbourne, Australia 2509

New Dynamical Models for Kinematic GPS Positioning

Y. Muto, Y. Kubo, Ritsumeikan University, Japan; C. Uratani, NEC Aerospace Systems, Ltd., Japan; S. Sugimoto, Ritsumeikan University, Japan 2519

On the Foundation of the Popular Ratio Test for GNSS Ambiguity Resolution

P.J.G. Teunissen, S. Verhagen, Delft University of Technology, The Netherlands 2529

Wide Area Real Time Kinematics with Galileo and GPS Signals

M. Hernandez-Pajares, J.M. Juan, J. Sanz, R. Orús, gAGE/UPC, Spain; A. Garcia-Rodriguez, ESTEC/ESA, The Netherlands; O.L. Colombo, GEST/NASA 2541

A Hybrid Solution to Reduce the Long Convergence Time in Precise Point Positioning

M. Abdel-salam, The University of Calgary, Canada 2555

**Multipath Reduction from GPS Double Differences Using Wavelets:
How Far Can We Go?**

E. Menezes de Souza, Sao Paulo State University, Brazil 2563

C6: Galileo & GPS/Galileo Receivers

Description of the Galileo Receiver Development Plan and of the Used Methodology

C. Filotico, Booz Allen Hamilton; D. Fossati, Alenia Spazio-Laben, Italy; V. Gabaglio,
Galileo Joint Undertaking 2572

Combined GPS/Galileo Highly- Configurable High-Accuracy Receiver

L.E. Aguado, G.J. Brodin, J.A. Cooper, The University of Leeds, U.K.; I.D. Alston,
Raytheon Systems Limited, U.K. 2584

**A New Signal Simulation Tool for Testing of Receivers with Controlled Reception
Pattern Antennas**

A. Hornbostel, A. Schroth, H. Denks, DLR, Institute of Communications and Navigation,
Germany; M. Holbrow, Spirent Communications, U.K. 2595

Galileo BOC(1,1) Prototype Receiver Development

N. Gerein, M. Olynik, M. Clayton, NovAtel Inc., Canada 2604

Analysis of Non Ambiguous BOC Signal Acquisition Performance

V. Heiries, D. Roviras, TéSA, France; L. Ries, CNES, France;
V. Calmettes, ENSAE, France 2611

**Galileo E5a/E5b and GPS L5 Acquisition Time Statistical Characterization and
Application to Civil Aviation**

F. Bastide, ENAC/STNA/TeSA, France 2623

An Innovations Approach to False-Lock Mitigation for GPS/Galileo BOC Signals

F. Nunes, F. Sousa, J. Leitão, Instituto Superior Técnico, Portugal 2636

**A First-of-a-Kind Galileo Receiver Breadboard to Demonstrate Galileo Tracking
Algorithms and Performances**

W. De Wilde, J.-M. Sleewaegen, K. Van Wassenhove,
F. Wilms, Septentrio NV, Belgium 2645

Open Architecture Real Time Development System for GPS and Galileo

S. Ganguly, A. Jovancevic, D.A. Saxena, B. Sirpatil, S. Zigic,
Center for Remote Sensing, Inc. 2655

D6: Space Applications

**Kinematic Point Positioning of a LEO with Simultaneous Reduce-Dynamic
Orbit Estimation**

O.L. Colombo, GEST/NASA Goddard SFC; S.B. Luthcke, NASA Goddard SFC 2667

Gravity Probe B GPS Receivers

P. Shestopole, J. Li, A. Ndili, Stanford University; K. Schrock, NASA 2676

A New Miniaturised GPS Receiver for Space Applications	
M. Unwin, C. Underwood, Surrey Space Centre, U.K.; A. Frydland, P. Jameson, QinetiQ, U.K.; R. Harboe Sorensen, European Space Agency.....	2682
Flexible Satellite Borne GNSS Receivers	
S. Ganguly, A. Jovancevic, M. Kirchner, D. Saxena, Center for Remote Sensing, Inc.	2687
Performance Evaluation and Analysis of a Hybrid Version of a Software Defined GPS/Galileo GNSS Receiver for Dynamic Scenarios	
A. Constantinescu, R. Landry, Jr., I. Ilie, Ecole de Technologie Superieure, Canada.....	2697
GPS/IMU Navigation and Simulation for Higher-Than-GPS Orbits	
K. Gold, A. Brown, NAVSYS Corporation	2709
GEO GPS Receiver Demonstration on a Galileo System Test Bed Satellite	
T. Ebinuma, University of Surrey, U.K.; M. Unwin, R. Myatt, E. Rooney, Y. Hashida, Surrey Satellite Technology Ltd., U.K.; A. Garutti, ESA Galileo Project Office, ESTEC, The Netherlands	2721
E6: Ground-Based Augmentation Systems 2	
Analysis of P(Y) Code Multipath for JPALS LDGPS Ground Station and Airborne Receivers	
J.P. Weiss, S. Anderson, P. Axelrad, University of Colorado, Boulder; R.L. Brinkley, R.P. Pennline, Arinc Engineering Services, LLC.....	2728
Evaluation of GPS Anti-Jam System Effects on Pseudorange and Carrier Phase Measurements for Precision Approach and Landing	
G.A. McGraw, S.Y.R. Young, K. Reichenauer, Rockwell Collins	2742
An Investigation of Tropospheric Errors on Differential GNSS Accuracy and Integrity	
T.A. Skidmore, F. van Graas, Ohio University	2752
Budget Analysis of the Minimum Size of the Correction Message and Baudrate for USCG NDGPS:	
B. Park, J. Kim, C. Kee, Seoul National University, South Korea.....	2761
Ionosphere Threat to LAAS: Updated Threat Model, User Impact, and Mitigations	
M. Luo, S. Pullen, A. Ene, D. Qiu, T. Walter, P. Enge, Stanford University	2771
LAAS Position Domain Monitor Analysis and Test Results for CAT II/III Operations	
J. Lee, Stanford University.....	2786
A Method of Over Bounding Ground-Based Augmentation System (GBAS) Heavy Tail Error Distributions	
R. Braff, C. Shively, The MITRE Corporation.....	2797
Core Overbounding and Its Implications for LAAS Integrity	
J. Rife, S. Pullen, Stanford University; B. Pervan, Illinois Institute of Technology.....	2810

F6: Network-Based Techniques for RTK

Influence of Diverse Biases on Network RTK

H.-J. Euler, S. Seeger, F. Takac, Leica Geosystems AG, Switzerland 2822

Testing a New Network RTK Software System

C. Rocken, L. Mervart, Z. Lukes, J. Johnson, GPS Solutions Inc.; M. Kanzaki,
H. Kakimoto, Y. Iotake, Nippon GPS Solutions Corporation, Japan 2831

In-Receiver Multiple Reference Station RTK Solution

P. Alves, G. Lachapelle, M.E. Cannon, The University of Calgary, Canada 2840

Ionospheric Disturbance Indices for RTK and Network RTK Positioning

L. Wanninger, Dresden University of Technology, Germany 2849

GALILEO/Modernized GPS: A New Challenge to Network RTK

U. Vollath, R. Patra, X. Chen, H. Landau, Trimble Terrasat GmbH, German;
T. Allison, Trimble Navigation Europe Limited, England 2855

Evaluation of Network Topologies for Post-Mission Multiple Reference Station Positioning

P.R. Alves, A. Huang, M.E. Cannon, The University of Calgary, Canada;
B. Scherzinger, Applanix Corporation, Canada..... 2864

The New RTK System Which Applied Network Technology in Japan

M. Kanzaki, Y. Iotake, H. Kakimoto, M. Hayashi, H. Yamada, H. Obata, S. Kano, K. Maeda,
H. Obata, Nippon GPS Solutions Corporation, Japan; H. Yoshida, S. Takamatsu, T. Saeki,
Hitachi Zosen Corporation, Japan; C. Rocken, J. Johnson, K. Key, GPS Solutions Inc. 2874

The Double Difference Effect of Ionospheric Correction Latency on Instantaneous Ambiguity Resolution in Long-Range RTK

I. Kashani, Ohio State University / Technion - Israel Institute of Technology; P. Wielgosz,
Ohio State University / University of Warmia and Mazury in Olsztyn, Poland;
D.A. Grejner-Brzezinska, Ohio State University..... 2881
