

THE 61ST ANNUAL MEETING OF THE INSTITUTE OF NAVIGATION

TABLE OF CONTENTS

A1: Positioning, Navigation and Timing Engineering

Integrity: A Key Enabler for Liability Critical Applications

T.W. Beech, *GMV Space Systems Inc.*; M.A. Martinez-Olagüe,
J. Cosmen-Schortmann, *GMV S.A.* ----- 1

The Use of High Precision GPS in Agricultural Field Operations

T. Sharpe, R. Hatch, *NavCom Technology, Inc.*; F. Nelson, *John Deere and Co.* ----- 11

A Methodology to Map Airport ASF's for Enhanced Loran

R. Hartnett, *U.S. Coast Guard Academy*; K. Bridges, *Federal Aviation Administration*; G. Johnson,
C. Oates, M. Kuhn, *Alion Science and Technology*; P. Swaszek, *University of Rhode Island* ----- 17

Airframe Effects on Loran H-field Antenna Performance

G. Johnson, K. Dykstra, R. Shalaev, *Alion, JJMA Maritime Sector*; P. Swaszek, *University of Rhode Island*; R. Hartnett, *U.S. Coast Guard Academy*----- 26

Session A2: GNSS Modernization Workshop

GPS Modernization Global Positioning System Planned Improvements

K. McDonald, *Navtech Seminars & GPS Supply* ----- 36

Development and Design of Galileo

G.W. Hein, S. Wallner, *University of FAF Munich, Germany* ----- 94

Satellite-Based Augmentation Systems

P. Reddan, *Zeta Associates* -----143

GNSS User Assessment of the Plans and the Benefits of GNSS Modernized Signals and Services

A.J. Van Dierendonck, *AJ Systems* -----201

Session A3: Super Storms of 2003 Workshop

Super Storms of 2003 —Workshop Goals

T. Walter, *Stanford University*; P. Doherty, *Boston College* -----210

The Impact of Ionospheric Storms on WAAS	
T. Walter, S. Datta-Barua, <i>Stanford University</i> -----	222
Degradation of DGPS and WADGPS Performance During the 2003 Super Storms	
S. Skone, <i>University of Calgary, Canada</i> -----	251
Observations of Ionospheric Walls of TEC During Geomagnetic Storms	
T.F. Dehel, <i>Federal Aviation Administration</i> -----	264
Comparison of GUVI Data and CORS Data to Examine Auroral Trough	
S. Datta-Barua, <i>Stanford University</i> -----	300
SED Events During Magnetic Storms	
A. Coster, M. Colerico, J. Foster, B. Rideout, F. Rich, H.C. Yeh, M. Ruohoniemi -----	306
Ionospheric SuperStorms (ISS) and Effects on WAAS	
X. Pi, A.J. Mannucci, A. Komjathy, L. Sparks, <i>Jet Propulsion Laboratory, California Institute of Technology</i> -----	316
Ionospheric Modeling with the Quadratic Approach: Results for the Super Storms	
H. Rho, R.B. Langley, <i>University of New Brunswick, Canada</i> -----	334
Super Storms of 2003 Workshop Summary -----	351
Session B1: CNS Applications Enabled by Radionavigation	
Use of an Integrated GPS/Loran Tracking System in the Urban Environment	
J. Carroll, H. Wychorski, K. Chin, D. Phinney, B. Long, <i>U.S. DOT Volpe National Transportation Systems Center</i> -----	354
DGPS Directional Signal Strength Meter	
L. Hartshorn, P. Swaszek, <i>University of Rhode Island</i> ; K. Gross, R. Hartnett, <i>U.S. Coast Guard Academy</i> ; G. Johnson, C. Oates, R. Shalaev, <i>Alion Science & Technology, JJMA Marine Sector</i> -----	362
746 Test Squadron Multi-Element Antenna Wavefront Simulator with Embedded Jammers	
M. Alsleben, L. Smith, <i>746th Test Squadron</i> -----	371
Enhanced LORAN Implementation and Evaluation for Timing and Frequency	
K. Shmihluk, <i>U.S. Coast Guard Loran Support Unit</i> ; K. Carroll, <i>U.S. Coast Guard</i> ; T. Celano, C. Biggs, <i>Timing Solutions Corp.</i> ; E. Powers, <i>U.S. Naval Observatory</i> -----	379
Session B2: Autonomous Vehicle Guidance Navigation and Control	
The TerraMax OSU/Oshkosh Team at the DARPA Grand Challenge	
C.K. Toth, D.A. Grejner-Brzezinska, <i>The Ohio State University</i> -----	386
A Next-Generation Machine Guidance and Control System	
J.A. Flinn, <i>Carlson Software</i> -----	392

MAV Attitude Estimation Using Low-Cost MEMS Inertial Sensors and GPS
J. Wendel, O. Meister, R. Mönikes, C. Schlaile, G.F. Trommer, *University of Karlsruhe, Germany*-----397

Implementing Civil Monitoring in Wake of the New Policy on GPS
J.W. Lavrakas, *Overlook Systems Technologies, Inc.* -----404

Gaining Operational Approval for use for GPS III in the National Airspace System
M. Hecht, K. Maine, C. Yinger, *The Aerospace Corporation* -----408

Session B3: Atmospheric Effects

GPS Imaging Showing the Vertical Dynamics of the Storm-time Ionosphere Over Europe and the USA
P. Yin, C. Mitchell, *University of Bath, U.K.* -----417

Ionospheric Variations at Midlatitude Detected by a Dense GPS Receiver Array in Japan
A. Saito, *Kyoto University, Japan*; Y. Otsuka, T. Tsugawa, *Nagoya University, Japan*; K. Matsunaga, K. Hoshinoo, *Electronic Research Institute, Japan* -----425

Verification of Low Latitude Ionosphere Effects on WAAS During October 2003 Geomagnetic Storm
S. Datta-Barua, T. Walter, K. Konno, J. Blanch, P. Enge, *Stanford University*; A. Komjathy, *Jet Propulsion Laboratory* -----429

Analysis of the Effect Upon GPS Measurements Arising From Deviations From Hydrostatic Equilibrium in Areas Affected by Severe Weather
F. Sciré Scappuzzo, B. Buerki, H-G. Kahle, *Swiss Federal Institute of Technology*; B.T. Anderson, *Boston University* -----440

Analysis of Network RTK with Weighted Ionospheric Corrections Under Severe Ionospheric Storm
P. Wielgosz, *The Ohio State University / University of Warmia and Mazury, Poland*;
I. Kashani, D.A. Grejner-Brzezinska, *The Ohio State University* -----449

Session C1: Space Applications

On-Orbit Time Transfer Performance of Gravity Probe B Relativity Mission
J. Li, G.M. Keiser, *Stanford University*; J.M. Lockhart, *San Francisco State University / Stanford University*; P. Shestople, *Stanford University*-----457

Recursive Estimation of Spacecraft Position Using X-ray Pulsar Time of Arrival Measurements
S.I. Sheikh, D.J. Pines, *The University of Maryland* -----464

Use of X-Ray Pulsars for Aiding GPS Satellite Orbit Determination
D.W. Woodfork, J.F. Raquet, *Air Force Institute of Technology*; R.A. Racca, *Air Force Space Command* -----476

A Regenerative Pseudonoise Range Tracking System for the New Horizons Spacecraft
R.J. DeBolt, D.J. Duven, C.B. Haskins, C.C. DeBoy, T.W. LeFevere, *The Johns Hopkins University*-----487

Improving Multipath Mitigation in GPS/Galileo BOC Signals with Gating Functions F.D. Nunes, <i>Instituto de Telecomunicações/Instituto Superior Technico</i> ; F.M.G. Sousa, <i>Instituto de Telecomunicações/Instituto Superior de Engenharia de Lisboa</i> ; J.M.N. Leitão, <i>Instituto de Telecomunicações/Instituto Superior Technico, Portugal</i>	-----498
--	----------

Session C2: GNSS Software Receivers for Science or Navigation

Multipath-Desensitized Delay Estimation with GPS Signal Channel Transfer Function Filtering C. Yang, <i>Sigtem Technology, Inc.</i> ; A. Porter, <i>AFRL/SNRP</i>	-----508
---	----------

Wideband Dual-Frequency Transform-Domain GPS Instrumentation Receiver for Signal Quality and Anomalous Event Monitoring S. Gunawardena, A. Soloviev, F. van Graas, <i>Ohio University</i>	-----516
---	----------

GPS Bistatic Radar Measurements of Aircraft Altitude and Ground Objects with a Software Receiver E. Vinande, D. Akos, D. Masters, P. Axelrad, S. Esterhuizen, <i>University of Colorado, Boulder</i>	-----528
--	----------

A New Method to Enhance GPS SNR and its Application in Fast Signal Acquisition Y. Lu, J. Cheng, J.A. Farrell, <i>University of California –Riverside</i>	-----535
--	----------

Partial Correlation Technique for the Acquisition of Weak GPS/Galileo Signals F.M.G. Sousa, <i>Instituto de Telecomunicações/Instituto Superior de Engenharia de Lisboa, Portugal</i> ; F.D. Nunes, J.M.N. Leitão, <i>Instituto de Telecomunicações/Instituto Superior Technico, Portugal</i>	-----543
---	----------

Joint Acquisition of CM and CL Codes for GPS L2 Civil (L2C) Signals C. Yang, <i>Sigtem Technology, Inc.</i>	-----553
---	----------

A Fast Acquisition Algorithm for Indoor Software Receivers P.K. Sagiraju, D. Akopian, <i>University of Texas at San Antonio</i> ; D. Magee, <i>Texas Instruments</i>	-----563
--	----------

Session C3: Atmospheric Models Workshop

Atmospheric Models Works — Introduction J. Arnold, <i>FHWA/RD&T</i> ; S. Gutman, <i>NOAA/FSL</i>	-----574
--	----------

Analysis of the Utility of NOAA-Generated Tropospheric Refraction Corrections for the Next Generation Nationwide DGPS Service S. Bisnath, <i>Harward-Smithsonian Center for Astrophysics</i> ; D. Dodd, <i>The University of Southern Mississippi</i>	-----579
---	----------

The Effect of the Ionosphere on Rapid Ambiguity Resolution G. Mader, <i>National Geodetic Survey</i>	-----611
--	----------

Ionospheric Modeling P. Doherty, <i>Boston College</i> ; A. Coster, <i>MIT Haystack Observatory</i>	-----633
---	----------

Ionospheric Limitations and Mitigation of Errors
S. Skone, *The University of Calgary, Canada* -----658

Atmospheric Models Workshop Summary -----684

Session D2: GNSS Software and Signal Processing

Nonlinear Filtering Techniques for GNSS Data Processing
C. Yang, *Sigtem Technology, Inc.*; M. Miller, *AFRL/SNRP* -----690

C/A Code Differential GPS for a Cat.II ILS Flight Inspection
M.F.B. Nunes, *Portuguese Air Force Academy, Portugal*; I. Osorio,
University of Porto, Portugal -----704

Application of Inertial Technique for Railway Track Measurements
N. Atamanov, V.Troitskiy, *Navteco, Russia*; M. Glazkov, I. Gusev, P. Koulechov,
PIC Progress AG, Russia-----712

Linear Time-of-Arrival Estimation in a Multipath Environment by Inverse Correlation Method
J-Y. Do, M. Rabinowitz, P. Enge, *Stanford University*-----720

Ultra Low-Power GPS Recorder (TrackTag®)
A.K. Brown, P. Brown, *NAVSYS Corporation* -----726

GPS/GALILEO/GLONASS Hybrid Satellite Constellation Simulator - GPS Constellation Validation and Analysis
A. Constantinescu, R. Landry, *Ecole de Technologie Supérieure, Canada* -----733

Session D3: Earth and Space Based Augmentation Systems

Vertical Protection Levels for a Local Airport Monitor for WAAS
J. Rife, S. Pullen, T. Walter, P. Enge, *Stanford University* -----745

The Impact of Measurement Biases on Availability for CAT III LAAS
J. Rife, S. Pullen, *Stanford University* -----759

On EGNOS and WAAS Performance
I. Alcantarilla, N. Zarraoa, J. Caro, *GMV, S.A., Spain*-----774

Analysis of GPS and DGPS Performance at Sea
L.S. Monteiro, *University of Nottingham, U.K. / Portuguese Hydrographic Office*; T. Moore,
C. Hill, *University of Nottingham, U.K.*-----783

Detecting RFI Through Integrity Monitoring at a DGPS Reference Station
Y. Yun, C. Kee, *Seoul National University, South Korea*; J. Rife, M. Luo, S. Pullen,
P. Enge, *Stanford University*-----795

What is the Accuracy of DGPS?
L.S. Monteiro, *The University of Nottingham, U.K./ Portuguese Hydrographic Office*;
T. Moore, C. Hill, *University of Nottingham, U.K.* -----805

Development and Validation of an Aircraft Multipath Model for Land-Based JPALS	
J.P. Weiss, S. Anderson, C. Fenwick, L. Song, P. Axelrad, <i>University of Colorado, Boulder</i> ; P. Belay, R.L. Brinkley, <i>ARINC Engineering Services, LLC</i>	818

Session E1: Vulnerability Mitigation Technologies and Techniques

Reducing Navigation and Timing Risks in the Maritime Domain Environment	
G.K. Weeks, Jr., <i>U.S. Coast Guard</i> ; B. Peterson, <i>Peterson Integrated Geopositioning</i> ; J.F. Ryan, <i>The Skip'r LLC</i> ; G.T. Gunther, <i>Booz Allen Hamilton</i>	830

Maritime Differential Loran's Major Step Towards System Integration	
A. Hawes, K. Carroll, <i>U.S. Coast Guard Loran Support Unit</i> ; B. Peterson, K. Dykstra, <i>Peterson Integrated Geopositioning</i>	838

Noise Assessment and Mitigation for Loran for Aviation	
L. Boyce, S. Lo, J.D. Powell, P. Enge, <i>Stanford University</i>	848

Integrated GPS/WAAS/eLoran Prototype System	
G.L. Roth, P. Schick, J. Jacoby, C. Schweitzer, D. Gervasi, E. Wiley, R. Ferrier, <i>Locus, Inc.</i>	855

Loran C Additional Secondary Factors: Implications for Meeting Required Navigation Performance (RNP) 0.3	
D.W. Diggle, C. Cutright, <i>Ohio University</i> ; G.L. Roth, C. Schweitzer, <i>Locus, Inc.</i> ; M. Narins, <i>Federal Aviation Administration</i>	865

Performance Trials of an Integrated Loran/GPS/IMU Navigation System, Part II	
G. Johnson, R. Shalaev, C. Oates, <i>John J. McMullen Associates</i> ; R. Hartnett, H. Atherton, M. Teixeira, <i>U.S. Coast Guard Academy</i> ; P. Swaszek, <i>University of Rhode Island</i>	875

Session E2: Carrier-Phase Positioning

The Impact of Severe Ionospheric Conditions on the Accuracy of RTK Position Estimation: Performance Analysis of Various Ionospheric Modeling Techniques	
D.A. Grejner-Brzezinska, P. Wielgosz, I. Kashani, <i>The Ohio State University</i> ; D.A. Smith, P.S.J. Spencer, D.S. Robertson, G.L. Mader, <i>National Geodetic Survey, NGS/NOAA</i> ; A. Komjathy, <i>NASA, Jet Propulsion Laboratory</i>	887

Range-Extended GPS Kinematic Positioning Using Numerical Weather Prediction Model	
F. Nievinski, K. Cove, M. Santos, <i>University of New Brunswick, Canada</i> ; D. Wells, <i>University of New Brunswick, Canada / University of Southern Mississippi</i> ; R. Kingdon, <i>University of New Brunswick, Canada</i>	902

Performance Improvement of Code-Carrier DGPS with a Scalar Adaptive Filter	
Y.S. Shin, C.G. Park, <i>Seoul National University, South Korea</i>	912

Evaluation of Several Double-differencing Strategies for Reduction of Unmodeled Correlated Errors in Carrier Phase GNSS Processing	
K. O'Keefe, K. Johnson, P. Alves, <i>The University of Calgary, Canada</i>	917

A New Network-Based Rapid-Static Module for the NGS Online Positioning User Service - OPUS-RS	
I. Kashani, P. Wielgosz, D.A. Grejner-Brzezinska, <i>The Ohio State University</i> ; G.L. Mader, <i>National Geodetic Survey, NOS/NOAA</i> -----	928

Kinematic Relative GPS Positioning Using State-Space Models: Computational Aspects	
X-W. Chang, M. Huang, <i>McGill University, Canada</i> -----	937

Nullification of Differential Ionospheric Delay for Long-Baseline Real-Time Kinematic Applications	
D. Kim, R.B. Langley, <i>University of New Brunswick, Canada</i> -----	949

Session E3: Multisensor Navigation and Mapping 1

Attitude From Combined GPS and Imaging System Data	
S.C. Rosengren, <i>Dynetics Inc.</i> ; E. Sutton, <i>The Boeing Company</i> -----	961

Acquisition and Tracking Improvement by an Enhanced Comparison Based Terrain Referenced Navigation Method	
J. Metzger, G.F. Trommer, <i>University of Karlsruhe, Germany</i> ; P. Kreutz, B. Taddiken, <i>EADS-M, Terrain Data Based Systems</i> -----	970

Terrain-Referenced Navigation Using the IGMAP Data Fusion Algorithm	
A.R. Runnalls, <i>Data Fusion Research Ltd, U.K.</i> ; P.D. Groves, R.J. Handley, <i>QinetiQ Ltd, U.K.</i> -----	976

The Assessment of the Impact of Stochastic Error Modeling, Signal Denoising and Improved Gravity Compensation on the Navigation Performance of the Multi-IMU/GPS Sensor Assembly	
D.A. Grejner-Brzezinska, Y. Yi, C. Toth, <i>The Ohio State University</i> -----	988

Attitude Performance Comparison Between Turret-mounted and Airframe-mounted INS Installations	
W.D. Morris, D.C. Campion, L.R. Sorrell, I.N. Cyr, D.M. Kane, J.P. Dugan, <i>Areté Associates</i> -----	1000

Assessment of User Performances of Current and Future Navigation Systems and Sensors Using Computer Simulations	
A.J. Gavin-Alarcon, A.J. Muñoz, <i>GMV, S.A.</i> ; T.W. Beech, <i>GMV Space Systems Inc.</i> -----	1010

Session F1: Precision Inertial Navigation with MEMS and Beyond

Inertial Instrument Error Characterization	
J.L. Farrell, <i>VIGIL, Inc.</i> -----	1020

Performance Analysis of a Low Cost MEMS IMU and GPS Integration	
Y. Yi, D.A. Grejner-Brzezinska, C.K. Toth, <i>The Ohio State University</i> -----	1026

MEMS Inertial Performance in Challenging Environments	
J.G. Hanse, <i>Honeywell Defense & Space Electronic Systems</i> -----	1037

The Silicon Oscillating Accelerometer: A High-Performance MEMS Accelerometer for Precision Navigation and Strategic Guidance Applications
R. Hopkins, J. Miola, R. Setterlund, B. Dow, W Sawyer, *Draper Laboratory* -----1043

Web-Based MEMS Inertial Navigation Simulator
Z. Bennour, R. Landry, R. Giroux, A. Constantinescu, G. Gavidia, *École de Technologie Supérieure, Canada* -----1053

Session F2: Precise Positioning: Algorithms and Methods

A GPS Orbit and Clock Correction Analysis for Long Baseline High Performance DGPS
Y. Zhang, C. Bartone, *Ohio University* -----1062

Quantifying Ambiguity Resolution Performance in the Presence of Time-Correlated Measurement Errors Using Geometric-Based Techniques
M.G. Petovello, K. O'Keefe, G. Lachapelle, M.E. Cannon, *University of Calgary, Canada* -----1073

MLAMBDA: A Modified LAMBDA Method for Integer Ambiguity Determination
X-W. Chang, X. Yang, T. Zhou, *McGill University, Canada*-----1086

An Empirical Approach for the Estimation of GPS Covariance Matrix of Observations
R. Leandro, M. Santos, K. Cove, *University of New Brunswick, Canada* -----1098

A New Carrier-Phase Multipath Observable for GPS Real-Time Kinematics, Based on Between Receiver Dynamics
L. Serrano, D. Kim, R.B. Langley, *University of New Brunswick, Canada* -----1105

Antenna Performance Analysis for a High Performance NDGPS Architecture
C. Bartone, I. Barton, Y. Zhang, *Ohio University*; A. Cleveland, M. Parsons, *U.S.Coast Guard* -----1116

Session F3: Multisensor Navigation and Mapping 2

Urban/Indoor Navigation Using Network Assisted GPS
A.K. Brown, *NAVSYS Corporation*; P. Olson, *U.S. ARMY RDECOM/CERDEC/C2D* -----1131

On Attitude Bias Compensation in GPS/DR System for Land Vehicle Applications
B.P. Phuyal, *Navigation Technologies* -----1137

An Intelligent MEMS IMU-Based Land Vehicle Navigation System Enhanced by Dynamics Knowledge
J-H. Wang, Y. Gao, Y. Zhang, *University of Calgary, Canada* -----1141

UK Rail Network Achieves Geospatial Visual Integration
L. Rohter, *Illinois Institute of Technology*; S. Kimkeran, *Omnicom Engineering Ltd.* -----1151

Session F4: Interference and Spectrum Management

Analysis of Mean-Time to Lose Lock in a First-Order Digital DLL for NRZ and BOC Signals in the Presence of Single-Tone Interferer

A.R. Golshan, S.N. Lu, T.H. Dang, *ARINC Engineering Services, LLC* -----1163

INS/GPS Deep Integration Navigation Hardware Testbed

K. Flueckiger, D. Gustafson, J. Dowdle, *Draper Laboratory, Inc.* -----1171

Performance Analysis of GPS Pseudolite Interference Mitigation Using Adaptive Spatial Beamforming

J-C. Juang, C-L. Chang, *National Cheng Kung University, Taiwan* -----1179
