

ION GNSS 2006 Proceedings

Table of Contents

Plenary Session

NAVSTAR – Global Positioning System

M. Hamel, *USAF, Space and Missile Systems Center*1

Galileo – The European Global Navigation Satellite System

R. Grohe, *Galileo Joint Undertaking, Belgium*9

We Live in Interesting Times

D. Last, *Royal Institute of Navigation, U.K.*18

Locations Because Life Moves!

K. Chadha, *SiRF*30

Finding Time and Place: From Chronometers to GPS

C.E. Stephens, *The Smithsonian Institution*39

Three Critical Issues for GPtS

B. Parkinson, *Stanford University*50

A1: Alternatives and Backups to GNSS

Integrated GPS, LORAN-C and INS for Land Navigation Applications

C. Hide, C. Hill, T. Moore, C. Noakes, D. Park, *University of Nottingham, U.K.*59

A Zenith Delay Model for Precise Kinematic Aircraft Navigation

O.L. Colombo, *GEST/NASA Goddard Space Flight Center*68

Mitigating Atmospheric Noise for Loran

C.O. Lee Boyce, S.C. Lo, J.D. Powell, P.K. Enge, *Stanford University*77

Long-Range High-Accuracy UWB Ranging for Precise Positioning	
H. Yu, <i>University of Leeds, U.K.</i>	83
A Flying Demonstrator for Future Missile and UAV Navigation Systems	
B. Gabrielsson, F. Neregård, N.K. Johansson, N.P. Johansson, K. Lundberg, P. Jonsson, <i>Saab Bofors Dynamics, AB Sweden</i>	95
Field Test Results of a Flexible Pseudolite Based Navigation System	
J. Noronha, A. Jovancevic, N. Bhatia, B. Sirpatil, M. Kirchner, D. Saxena, <i>Center for Remote Sensing, Inc.</i>	102
A Feasibility Study on the Regional Navigation Transceiver System Using a Transceiver Position Estimation Algorithm	
B. Park, D. Kim, T. Lee, C. Kee, <i>Seoul National University, South Korea</i> ; B. Paik, K. Lee, <i>Agency for Defense Development, Korea</i>	114
Use of a Software Radio to Evaluate Signals of Opportunity for Navigation	
J.A. McEllroy, J.F. Raquet, M.A. Temple, <i>Air Force Institute of Technology</i>	126
A High Integrity Positioning Method for Ad-Hoc Networks	
R. Mautz, S. Feng, W. Ochieng, <i>Imperial College London, U.K.</i> ; A. Kemp, B. Peng, <i>The University of Leeds, U.K.</i>	134
A Passive Regional Hybrid Positioning System: TGSNS/Barometer	
R. Li, Y. Wang, <i>BeiHang University, China</i>	145
B1: Military Applications	
Vertical-sensing Effectiveness & CONOPS Tool for Operational Requirements: (VECTOR)	
J. Catanzarite, G. Green, <i>General Dynamics</i> ; D. Jacobs, <i>AFRL\SNR</i>	152
Theory and Test Results of Antenna Advanced Inertial Reference for Enhanced Sensors (ANTARES) Lever Arm Flexure Estimation and Compensation for Ultra-Tightly Coupled GPS-INS and RF Emitter Geo-Location Systems Using Auxiliary Antenna-Mounted Inertial Measurement Units	
P. Quinn, D. Lewis, <i>Raytheon Company</i> ; M. Berarducci, M. Miller, J. Campbell, P. Howe, <i>Wright Patterson AFB</i>	157
Survivability Testing of a Gun Hard MEMS IMU/GPS Navigation System	
K. Sheard, J. Tidd, I. Scaysbrook, <i>BAE Systems E&IS, U.K.</i> ; T. Keynan, <i>BAE Systems Rokar International</i> ; K.C. Fong, <i>Singapore Technologies Kinetics, Singapore</i>	168
Software Defined Navigation Signal Generator	
M.F. Ryba, <i>BAE Systems, Electronics & Integrated Solutions</i>	176

Handheld, Low Cost Situational Awareness Using Existing Military Fielded Equipment
J.T. Kelly, M.D. Chapman, B. Barton, *Rockwell Collins Inc.*182

Flexible GPS Receiver for Jammer Detection, Characterization and Mitigation Using a 3D CRPA
D. Wilson, S. Ganguly, *Center for Remote Sensing, Inc.*.....189

Theoretical Approach to Determining the 95% Probability of TTFF for the P(Y) Code Utilizing Active Code Acquisition
J.K. Holmes, N. Morgan, P. Dafesh, *The Aerospace Corporation*201

C1: New Product Announcements

Low Cost Sub-meter Accuracy Anytime, Anywhere
C. Ray, *Fusion Numerics Inc.*212

Leica System 1200 – High Performance GNSS Technology for RTK Applications
F. Takac, J. Walford, *Leica Geosystems, Switzerland*.....217

Highly-Integrated Solution for Ultra-fast Acquisition and Precise Tracking of Weak GPS and Galileo L1 Signals
C. Bürgi, E. De Mey, A. Orzati, A. Thiel, *u-blox AG, Switzerland*.....226

A Novel Development Environment for GNSS Receivers to Close the Model-to-Product Gap
O. Otaegui, N. Lucas, G. Rohmer, *Fraunhofer Institut IIS, Germany*.....236

The Merlin Signal Generator - A Powerful, Low-Cost Constellation Galileo/GPS Signal Simulator
J. Winkel, R. Wolf, *IfEN GmbH, Germany*; G. Prokoph, G. Mocker, *Work GmbH, Germany*246

Highly Integrated GPS/EGNOS Receiver Chipset
M. Overbeck, *Fraunhofer IIS, Germany*; G. Wistuba, *IMST GmbH*; O. Otaegui, *Fraunhofer IIS, Germany*; S. Haas, *IMST GmbH*; B. Niemann, *Fraunhofer IIS, Germany*;
F. Henkel, *IMST GmbH*; G. Rohmer, *Fraunhofer IIS, Germany*251

The iSuite™ MP, a True MultiPlatform Development Environment
K-K. Högström, H. Kuusniemi, S. Söderholm, M. Rätty, T. Ylhäinen, S. Kakarlapudi, *Fastrax Ltd., Finland*.....259

Evaluation of the GRACE Inter-Satellite Ranging Instrument With GPS Measurements
J. Kim, *Hankuk Aviation University, South Korea*; U-D. Ko, *University of Texas at Austin*;
W. Bertiger, *Jet Propulsion Laboratory*; F. Flechtner, *GeoForschungsZentrum Potsdam, Germany*.....267

D1: Algorithms and Methods 1

A New Signal-to-Noise-Ratio Based Stochastic Model for GNSS High-Precision Carrier Phase Data Processing Algorithms in the Presence of Multipath Errors L. Lau, P. Cross, <i>University College London, U.K.</i>	276
Fast Ambiguity Resolution by a Combined System of Multiple-Baseline Equations T. Kashiwayanagi, Y. Koura, K. Ogawa, H. Suzuki, M. Nakamura, <i>Japan Radio Co., Ltd., Japan</i>	286
GPS Un-Differenced Ambiguity Resolution and Validation M. Wang, Y. Gao, <i>The University of Calgary, Canada</i>	292
Standalone Real-time Navigation Algorithm for Single-frequency Ionosphere-free Positioning Based on Dynamic Ambiguities (DARTS-SF) A. Simsky, <i>Septentrio Satellite Navigation, Belgium</i>	301
A New Three-Frequency, Geometry-Free, Technique for Ambiguity Resolution R.R. Hatch, <i>NavCom Technology, Inc.</i>	309
Investigation of Ambiguity Resolution Performance of Short-, Medium- and Long-distance Baselines Based on Four Galileo Frequencies S. Ji, W. Chen, <i>The Hong Kong Polytechnic University</i> ; C. Zhao, Chinese Academy of Surveying and Mapping, China; X. Ding, Y. Chen, <i>The Hong Kong Polytechnic University</i>	317
A Three-Step Method to Separate Real-Time Systematic Errors Suitable for GPS Medium-Long Baselines X. Luo, <i>Chinese Academy of Sciences, China</i>	327
Integer Ambiguity Estimation and Validation in Attitude Determination Environments Y. Moon, S. Verhagen, <i>Delft Institute of Earth Observation and Space Systems, The Netherlands</i>	335
Unified Methods of Point and Relative Positioning Based on GNSS Regression Equations S. Sugimoto, Y. Kubo, <i>Ritsumeikan University, Japan</i>	345

E1: GNSS Ground Based Augmentation Systems

Carrier Phase Airborne and Ground Monitors for Ionospheric Front Detection for Category III LAAS L. Gratton, B. Pervan, <i>Illinois Institute of Technology</i>	359
Signal Deformation Monitoring Scheme Implemented in a Prototype Local Area Augmentation System Ground Installation F. Liu, M. Brenner, C.Y. Tang, <i>Honeywell International</i>	367

Remote Controlled, Continuously Operating GPS Anomalous Event Monitor S. Gunawardena, M. Uijt de Haag, F. van Graas, Z. Zhu, <i>Ohio University</i>	381
Position-Domain Geometry Screening to Maximize LAAS Availability in the Presence of Ionosphere Anomalies J. Lee, M. Luo, S. Pullen, Y.S. Park, P. Enge, <i>Stanford University</i> ; M. Brenner, <i>Honeywell Aerospace</i>	393
Ionosphere Monitoring Methodology for Hybrid Dual-Frequency LAAS H. Konno, S. Pullen, J. Rife, P. Enge, <i>Stanford University</i>	409
A Statistical Analysis of Bailed Landing Approaches for the Airbus A-380 Under GBAS Guidance J.G. Higuera, H.J. Kumin, J.E.Fagan, <i>University of Oklahoma</i> ; G. McCartor, <i>Federal Aviation Administration</i>	425
Gate-to-Gate with Modernized GPS, GALILEO and GBAS - Harmonization of Precision Approach Performance Requirements W. Schuster , W. Ochieng; Imperial College London, U.K.	437
Mitigation of Ionospheric Gradient Threats for GBAS to Support CAT II/III T. Murphy, M. Harris, <i>Boeing Commercial Airplanes</i>	449
Symmetric Overbounding of Time-Correlated Errors J. Rife, <i>Stanford University</i> ; D. Gebre-Egziabher, <i>University of Minnesota</i>	462
Treatment of Faulted Navigation Sensor Error when Assessing Risk of Unsafe Landing for CAT IIIB LAAS C.A. Shively, <i>CAASD The MITRE Corporation</i>	477
F1: Galileo System Design and Services	
Galileo System Design & Performance V. Oehler, H.L. Trautenberg, J. Krueger, T. Rang, <i>EADS Astrium, Germany</i> ; F. Luongo, <i>Alcatel Alenia Space, Italy</i> ; J.P. Boyereo, <i>GMV, Spain</i> ; J. Hahn, D. Blonski, <i>European Space Agency</i>	492
Producing the Galileo Services From the Ground Mission Segment (GMS) S. Journo, J. Poumailloux, J-M. Piéplu, P. Gouni, <i>Alcatel-Alenia Space, France</i>	504
Galileo Mission Segment Processing Chain: Algorithm Design, Performance and Verification C. Bourga, S. Lannelongue, F. Bauer, H. Delfour, M. van den Bossche, B. Lobert, <i>Alcatel Alenia Space, France</i>	520
Galileo Integrity Processing Facility: Preliminary Design E. Sardón, E. Mora, C. Hernández, J.R. Martín, <i>GMV S.A., Spain</i>	531

Timing Performance of Galileo Mission Segment (GMS) A. Moudrak, J. Furthner, J. Hammesfahr, <i>German Aerospace Center (DLR), Germany</i> ; C. Bourga, <i>Alcatel Alenia Space, France</i>	540
--	-----

The Galileo System Test Bed V2 for Orbit and Clock Modeling R. Píriz, V. Fernández, A. Auz, <i>GMV S.A., Spain</i> ; P. Tavella, I. Sesia, G. Cerretto, <i>Istituto Nazionale di Ricerca Metrologica (INRiM)</i> ; M. Falcone, D. Navarro, J. Hahn, F. González, M. Tossaint, <i>European Space Agency</i> ; M. Gandara, <i>Alcatel Alenia Space</i>	549
--	-----

CDF Overbounding in the Galileo Experimental Off-Line Analysis Tool (E-OATp) M. Sánchez-Gestido, J.F. Martín-Albo, J. Arranz-Richart, <i>Deimos Space, S.L., Spain</i>	563
--	-----

Galileo Orbitography and Synchronisation Processing Facility (OSPF): Preliminary Design J.R. Martín, I. Castrillo, A.B. Martín, S. Cilla, E. Mora, <i>GMV S.A., Spain</i>	575
---	-----

A2: Remote Sensing with GPS and Integrated Sensors

Real-Time Web-based Image Distribution Using an Airborne GPS/Inertial Image Server A. Brown, H. Holland, Y. Lu, <i>NAVSYS Corporation</i>	584
---	-----

Combined GPS/Acoustic Seafloor Geodetic Observation System for Monitoring Off-shore Active Seismic Regions Near Japan M. Fujita, Y. Matsumoto, T. Ishikawa, <i>Hydrographic & Oceanographic Dept., Japan</i> ; M. Mochizuki, <i>University of Tokyo, Japan</i> ; M. Sato, S-I. Toyama, K. Kawai, T. Yabuki, <i>Hydrographic & Oceanographic Dept., Japan</i> ; A. Asada, <i>University of Tokyo, Japan</i> ; O.L. Colombo, <i>NASA Goddard Space Flight Center</i>	592
--	-----

Photogrammetric Bridging of GPS/INS in Urban Centers for Mobile Mapping Applications T. Hassan, C. Ellum, S. Nassar, W. Cheng, N. El-Sheimy, <i>The University of Calgary, Canada</i>	604
---	-----

Mapping Brazil with Advanced Land Observing Satellite (ALOS) G. Gelli, L.P.S. Fortes, M.J.C. Augusto, L.B. Gomes, A.L. Coelho, L.F. Oliveira, <i>Brazilian Institute of Geography and Statistics, Brazil</i> ; N. La Belle-Hamer, J. Nicoll, S. Arko, D. Atwood, <i>University of Alaska</i>	611
--	-----

Implementation and Testing of Open-loop Tracking for Airborne GPS Occultation Measurements B. Ventre, <i>Purdue University / The Johns Hopkins University</i> ; J.L. Garrison, <i>Purdue University</i> ; M.H. Boehme, <i>The Johns Hopkins University</i> ; J.S. Haase, <i>Purdue University</i>	620
---	-----

A Modular GPS Remote Sensing Software Receiver for Small Platforms
M. Junered, *Luleå University of Technology, Sweden*; S. Esterhuizen, D. Akos,
P. Axelrad, *University of Colorado*.....634

Prototype Software-based Receiver for Remote Sensing Using Reflected GPS Signals
D. Manandhar, *The University of Tokyo / GNSS Technologies Inc., Japan*; R. Shibasaki,
The University of Tokyo, Japan; H. Torimoto, *GNSS Technologies Inc., Japan*.....643

Performance Requirement of Velocity Estimation for Airborne-based Downward-looking GPS Occultation
T. Yoshihara, N. Fujii, S. Saitoh, T. Sakai, K. Hoshinoo, K. Matsunaga, *Electronic Navigation Research Institute, Japan*; T. Tsuda, *Kyoto University, Japan*; Y. Aoyama, *National Institute of Polar Research, Japan*653

B2: Military Aviation Systems

A Close Formation Flight Test for Automated Air Refueling
S.M. Ross, *U.S. Air Force*; M. Pachter, D.R. Jacques, J. Raquet, *Air Force Institute of Technology*662

DARPA Autonomous Airborne Refueling Demonstration Program With Initial Results
J. Hansen, G. Romrell, N. Nabaa, R. Andersen, *Sierra Nevada Corporation*;
L. Myers, *NASA*; J. McCormick, *DARPA*674

Development and Testing of a High-Rate Air-to-Air Relative Navigation System for UAV Refueling
C. Spinelli, J. Raquet, *Air Force Institute of Technology*;
B. Kish, *Air Force Test Pilot School*686

Land Based JPALS Guidance Quality
E.E. Lagimoniere Jr, D. Rudy, *Sierra Nevada Corporation*; B.R. Peterson, *ARINC Engineering Services, LLC*696

GPS Anti-Jam Antenna System Measurement Error Characterization and Compensation
G.A. McGraw, C. McDowell, J.M. Kelly, *Rockwell Collins*.....705

A Robust GPS/INS Kinematic Integrity Algorithm for Aircraft Landing
A. Brown, B. Matthews, *NAVSYS Corporation*715

Use of Inertial Integration to Enhance Availability for Shipboard Relative GPS (SRGPS)
C.R. Offer, P.D. Groves, A.A. Macaulay, D.L.J. Nash, C.J. Mather,
QinetiQ, Ltd., U.K.726

JPALS Tactical System Performance Evaluation Using a Controlled Reception Pattern Antenna

T.A. Skidmore, C. Cohenour, F. van Graas, M. DiBenedetto, *Ohio University*; B. Peterson, *ARINC Engineering Services*.....738

C2: GNSS Antenna and Radio Technology

Antenna-based Multipath and Interference Mitigation for Aeronautical Applications: Present and Future

O. Esbri-Rodriguez, *DLR German Aerospace Center, Germany*; M. Philipakkis, *ERA Technology, U.K.*; A. Konovaltsev, F. Antreich, *DLR German Aerospace Center, Germany*; C. Martel, *Onera, France*; D. Moore, *ERA Technology, U.K.*754

Navigation Accuracy and Interference Rejection for an Adaptive GPS Antenna Array

D.S. De Lorenzo, J. Rife, P. Enge, *Stanford University*; D.M. Akos, *University of Colorado at Boulder*.....763

Non-Planar Controlled Reception Pattern Antennas for GPS Receivers

I.J. Gupta, *The Ohio State University*; J.A. Ulrey, *Northrop Grumman Corporation*; C.J. Reddy, C.B. Ravipati, *Applied EM Inc.*.....774

First Results of Baseband Wavefront Generation With a Digital Channel Matrix for Testing of CRPA

A. Hornbostel, H. Denks, *German Aerospace Center (DLR), Germany*; H. Venus, *German Aerospace Center (DLR)/Optical Information Systems, Germany*.....780

A Frequency Domain Quasi-Open Tracking Loop for GNSS Receivers

E. Anyaegbu, *University of Leeds, U.K.*.....790

The Development of a Professional Antenna for Galileo

R. Granger, P. Readman, S. Simpson, *Roke Manor Research Ltd., U.K.*.....799

Test and Evaluation of a Digital Receiver in a Simulated Digital Antenna Electronics Environment

C.E. Pinkelman, R.A. Bixler, *SPAWAR Systems Center, San Diego*807

D2: Algorithms and Methods 2

Clock Errors Simulation and Characterisation

J. Diez, P. D'Angelo, A. Fernández, *Deimos Space S.L., Spain*815

Characterizing the Impact of Incorporating Two-Way Time Transfer Measurements on Network Differential GPS Position Solutions

K.L.B. Cook, J.F. Raquet, R. Beckman, *Air Force Institute of Technology*822

A New Fine Tracking Algorithm for Binary Offset Carrier Modulated Signals

M. Musso, A.F. Cattoni, C.S. Regazzoni, *University of Genova, Italy*.....834

Digital Spectral Separation Coefficient (SSC) for GNSS Signal to Noise Measurements and Interference Detection	
D. Borio, L. Lo Presti, <i>Politecnico di Torino, Italy</i> ; P. Mulassano, <i>Istituto Superiore Mario Boella, Italy</i>	841
Estimation and Mitigation of Unmodeled Errors for a Pseudolite Based Reference System	
J. Shockley, J. Raquet, <i>Air Force Institute of Technology</i>	853
Near Real-Time Carrier-Phase Multipath Mitigation in Kinematic Applications, Using a Dual-Antenna System and Effective Close Range Reflectors	
L. Serrano, <i>University of New Brunswick, Canada/Leica Geosystems AG, Switzerland</i> ; D. Kim, R.B. Langlely, <i>University of New Brunswick, Canada</i>	863
Particle Filtering Approach To Fault Detection and Isolation for GPS Integrity Monitoring	
R. Rosihan, A. Indriyatmoko, S. Chun, D.H. Won, Y.J. Lee, T.S. Kang, <i>Konkuk University, South Korea</i> ; J. Kim, <i>Hankuk Aviation University, South Korea</i> ; H-s. Jun, <i>Korea Aerospace Research Institute, Korea</i>	873
E2: GNSS Space Based Augmentation	
An Integrity, Availability and Continuity Test Method for EGNOS/WAAS	
H. Kannemans, <i>National Aerospace Laboratory, The Netherlands</i>	882
The Stanford - ESA Integrity Diagram: Focusing on SBAS Integrity	
M. Tossaint, J. Samson, F. Toran, J. Ventura-Traveset, <i>European Space Agency, The Netherlands</i> ; J. Sanz, M. Hernandez-Pajares, J.M. Juan, <i>Technical University of Catalonia gAGE/UPC Spain</i>	894
EGNOS: A Step Closer to Operational Qualification	
A.W. Lyon, U. Guida, J.L. Fernandez, <i>the European Satellite Services Provider, Belgium</i> ; O. Perrin, <i>Skyguide</i>	906
Performance Assessment of Time Difference Between EGNOS-Network-Time and UTC	
J. Delporte, F. Mercier, J. Maréchal, M. Jeannot, <i>CNES, France</i> ; J-Y. Richard, P. Uhrich, <i>Paris, Observatory, France</i>	913
WAAS Performance Improvements as a Result of WAAS Expansion	
T. Schempp, S. Peck, W. Chou, E. Lopez, R. Hendrich, <i>Raytheon</i>	921
The Benefits of Multi-constellation GNSS Augmentations	
I. Alcantarilla, D. Porrás, A. Tajdine, N. Zarraoa, <i>GMV S.A., Spain</i> ; D. Flament, J.C. Lévy, <i>Alcatel Alenia Space, France</i>	930

A Single Frequency Approach to Mitigation of Ionospheric Depletion Events for SBAS in Equatorial Regions

S. Wu, S. Peck, T. Schempp, P. Shloss, H. Wan, P. Buckner, *Raytheon Company*;
P. Doherty, *Boston College*; J. Angus, *Claremont Graduate University*939

Development and Preliminary Test Results of Korean WADGPS Test Bed Using NDGPS Infrastructure in Korea

D. Kim, Y. Yun, B. Park, S. Jeon, Y. Sohn, C. Kee,
Seoul National University, South Korea953

Optimizing WAAS Accuracy/Stability for a Single Frequency Receiver

E. Kim, T. Walter, J.D. Powell, *Stanford University*962

Analysis and Quality Study of GNSS Monitoring Stations' Pseudorange and Carrier-Phase Measurements

O. Julien, C. Macabiau, *ENAC, France*; J-L. Issler, *CNES, France*; O. Nouvel,
W. Vigneau, *M3Systems, France*971

F2: Galileo and GPS/Galileo Reference and User Receivers

GIOVE-A Signal in Space Test Activity at ESTEC

M. Spelat, *Politecnico di Torino, Italy*; M. Hollreiser, *Galileo Project Office, ESA*;
M. Crisici, *Radionavigation Engineering, ESA*; M. Falcone,
Galileo Project Office, ESA981

Galileo Reference Receiver

S. Binda, G. Pinelli, *Alcatel Alenia Space Italy*; N. Gerein, *NovAtel Inc., Canada*994

Solving the Correlation Ambiguity Issue of BOC Modulated Signal by a Nonlinear Quadratic Operator

V. Heiries, *TéSA/Supaero, France*; C. Rendon, V. Calmettes, *Supaero, France*1001

The GATE Receiver - A Full-Scale Galileo/GPS Monitor Receiver

T. Lück, E. Göhler, M. Bodenbach, J. Winkel, *IfEN GmbH, Germany*; F. Förster,
Fraunhofer Institute for Integrated Circuits, Germany1011

The Galileo Mass Market Receiver - Progress of the GR-Poster Project

P.G. Mattos, *ST Microelectronics, UK*1021

GAMMA - Assisted GALILEO/GPS/EGNOS Mass Market Receiver

G. Rohmer, O. Otaegui, S. Köhler, C. Fiermann, *Fraunhofer IIS, Germany*;
G. Abwerzger, *Teleconsult Austria*; S. Haas, *IMST GmbH*; S. Corazza,
Alcatel Alenia Space; W. Cresens, T. Vandeplass, *Agilent Technologies*;
M. Villanti, *University of Bologna*1026

Achieving Theoretical Bounds for Receiver-Based Multipath Mitigation Using Galileo OS Signals

L.R. Weill, *California State University, Fullerton / Comm Sciences Corporation / Magellan Systems Japan, Inc.* 1035

UERE Budget Results for the Galileo Test User Receiver

A. Fernández, J. Diez, *Deimos Space, Spain*; C. Griffin, T. Sturman, *QinetiQ*;
P. Joosten, *Delft University of Technology*; F. Boon, *Septentrio Satellite Navigation*;
M. Hollreiser, *ESTEC - European Space Agency* 1048

Results of the GARDA Galileo Receiver Development and Evolution to Safety-of-Life Receiver Applications

L. Marradi, G. Franzoni, D. Fossati, L. Foglia, *Alcatel Alenia Space, Italy*; V. Gabaglio, *Galileo Joint Undertaking* 1060

A Galileo E1b,c RF Front-end Optimized for Narrowband Interferers Mitigation

F. Chastellain, C. Botteron, G. Waelchli, G. Zamuner, D. Manetti, P-A. Farine, *University of Neuchatel, Switzerland*; P. Brault, *Martec Serpe-Lesm, France* 1069

A3: Multi-sensor Navigation, Guidance and Control Systems

Highway Lane Tracking Using GPS in Conjunction With Onboard IMU and Vision-based Lane Tracking Measurements

J.M. Clanton, D.M. Bevely, A.S. Hodel, *Auburn University* 1076

Updating the Navigation Parameters by Direct Feedback From the Image Sensor in a Multi-sensor System

S. Moafipoor, *The Ohio State University* 1085

Fusion of Low-Cost Imaging and Inertial Sensors for Navigation

M. Veth, J. Raquet, *Air Force Institute of Technology* 1093

Use of Laser Range Scanners for Precise Navigation in Unknown Environments

A.K. Vadlamani, M. Uijt de Haag, *Ohio University* 1104

Range-Domain Integration of GPS and Laser-scanner Measurements for Outdoor Navigation

M. Joerger, B. Pervan, *Illinois Institute of Technology* 1115

MetaSensor: Development of a Low-Cost, High Quality Attitude Heading Reference System

G.H. Elkaim, C. Foster, *University of California - Santa Cruz* 1124

Saab TERNAV, an Algorithm for Real Time Terrain Navigation and Results From Flight Trials Using a Laser Altimeter

F. Neregård, N.K. Johansson, N.P. Johansson, K. Lundberg, B. Gabrielsson, *Saab Bofors Dynamics, Sweden* 1136

Dual Thread - Automatic Takeoff and Landing System (DT-ATLS)
R. Harker, J. Gilligan, *Sierra Nevada Corporation*1146

B3: Network-Based RTK

Atmospheric Models Applied to DGPS and RTK Network in Brazil: Preliminary Results
J.F.Galera-Monico, D.B. Marra-Alves, L.F.A. Dalbelo, P.O. Camargo, *Sao Paulo State University, Brazil*; L.F. Sapucci, *CPTEC/INPE, Brazil*, L.P. Souto Fortes, *IBGE, Brazil*.1151

Network-Based RTK-GPS Positioning System With Data Dissemination via Satellite Communication Link
H. Namie, *National Defence Academy, Japan*; O. Okamoto, *Ibaraki College of Technology, Japan*; C. Fan, A. Yasuda, *Tokyo University of Marine Science and Technology, Japan*1159

Development of a 3-D Tomography Approach to Provide Tropospheric Corrections for Use in Network RTK Positioning
N. Nicholson, S. Skone, M.E. Cannon, *The University of Calgary, Canada*1167

Custom GPS-Correction Server for Real-Time Trajectory
H. Gontran, *Ecole Polytechnique Federale de Lausanne, Switzerland*1180

Tropospheric Bias Interpolation for Network Real-Time Kinematic GPS
P.M. Grgich, A. Kealy, C. Gordini, M. Hale, *The University of Melbourne, Australia*1186

A Performance Analysis of Sparse GNSS CORS Network for Real Time Centimetric Level Positioning: A Case Study in Victoria, Australia
C. Gordini, A.N. Kealy, P.M. Grgich, *The University of Melbourne, Australia*;
M. Hale, SII, Department of Sustainability and Environment, Australia1196

Real-time Ionospheric and Atmospheric Corrections for Wide Area Single Frequency Carrier Phase Ambiguity Resolution
C. Rocken, Z. Lukes, L. Mervart, J. Johnson, T. Iwabuchi, *GPS Solutions Inc.*; M. Kanzaki, *Nippon GPS Solutions Corp., Japan*1208

Alternatives to Current GPS-RTK Services
C. Rizos, University of New South Wales, Australia; J. van Cranenbroeck, *Leica Geosystems, Switzerland*1219

The Use of a GPS Test Network for Real Time Application in Italy: First Results Based on Regional Field Test
M. Barbarella, S. Gandolfi, E. Ronci, *Università di Bologna, Italy*1226

C3: GNSS Receiver Algorithms 1 (Acquisition)

Exploiting the Orthogonality of L2C Code Delays for a Fast Acquisition
A.R.A. Moghaddam, R. Watson, G. Lachapelle, J. Nielsen,
The University of Calgary, Canada1233

Code Acquisition Techniques for Galileo Safety-of-Life Receivers

J.S. Silva, *Deimos Engenharia, S.A., Portugal*; J. Diez, A. Fernández, *Deimos Space S.L.*; L. Marradi, G. Franzoni, I. Palmiero, *Alcatel Alenia Space*;
V. Gabaglio, *Galileo Joint Undertaking*..... 1242

Coherent Integration of Future GNSS Signals

R.T. Ioannides, L.E. Aguado, *University of Leeds, U.K.*; G. Brodin, *Pathtrack Ltd.* 1253

An Initial Synchronization Method for DGPS Reference Receivers in Noisy Environment

S.H. Park, D.J. Cho, S. Oh, S.H. Suh, *Korea Ocean Research & Development Institute, South Korea*..... 1269

General Framework for Acquisition Performance Analysis With Application to GALILEO Signals

A. Konovaltsev, H. Denks, A. Hornbostel, *German Aerospace Center, (DLR), Germany*;
M. Soellner, M. Witzke, *EADS Astrium, Germany* 1276

A New Three Dimensional Signal Search & Acquisition Algorithm Based on Cross-correlation Sequence with 0.1 Seconds' Signal Receiving Time

H. So, *Seoul National University, South Korea*; H. Jun, *Samsung, South Korea*; C. Kee, *Seoul National University, South Korea*..... 1288

Pre-Correlation Noise and Interference Suppression for Use in Direct-Sequence Spread Spectrum Systems With Periodic PRN Codes

S.K. Shanmugam, J. Nielsen, G. Lachapelle, R. Watson,
The University of Calgary, Canada..... 1297

Experimental Tests of Unaided Weak Signal Acquisition Methods Using a Software Receiver

G.W. Heckler, J.L. Garrison, *Purdue University*..... 1309

A Rapid Code State Computing Algorithm for L2C Code Phase Control

D. Wang, H. Kondo, O. Arai, *Furuno Electric Co., Ltd., Japan* 1321

GPS Acquisition Solution for use Cases in all Types of Environments

H. El-Natour, *ENAC/TéSA, France*; A-C. Escher, C. Macabiau, O. Julien, *ENAC, France*; M. Monnerat, *Alcatel Alenia Space, France* 1327

D3: Atmospheric Effects 1

Statistics of Occurrence of Ionospheric Scintillation and TEC Depletions Over Indian Region and its Effect on Satellite Navigation

S.M. Regar, S. Sunda, *Airports Authority of India*; M.R. Sivaraman, K. Bandyopadhyay, *Space Applications Centre, India*..... 1336

PLL Performance for Signals in the Presence of Thermal Noise, Phase Noise, and Ionospheric Scintillation	
W. Yu, G. Lachapelle, S. Skone, <i>The University of Calgary, Canada</i>	1341
Real Time MSTIDs Modelling and Application to Improve the Precise GPS and GALILEO Navigation	
M. Hernández-Pajares, J.M. Juan, J. Sanz, <i>Technical University of Catalonia, Spain</i>	1358
Observed GPS and WAAS Signal-to-Noise Degradation Due to Solar Radio Bursts	
A. Cerruti, <i>Cornell University</i>	1369
Bounding Higher Order Ionosphere Errors for the Dual Frequency GPS User	
S. Datta-Barua, T. Walter, J. Blanch, P. Enge, <i>Stanford University</i>	1377
Detection and Mitigation of Geomagnetic Pulsation Effects Using GPS	
S. Skone, N. Nicholson, <i>The University of Calgary, Canada</i>	1393
Performance Analysis of Software Based GPS Receiver Using a Generic Ionospheric Scintillation Model	
L. Dyrud, N. Bhatia, S. Ganguly, A. Jovancevic, <i>Center for Remote Sensing, Inc.</i>	1402
Ambiguity Resolution Under Known Base Vector Length	
A.A. Povalyaev, <i>Javad GNSS, Russia</i> ; I.A. Sorokina, <i>Risde, Russia</i> ; P.B. Glukhov, <i>Moscow Aviation Institute, Russia</i>	1413
The Ionospheric Impact on GPS Performance in Southern Polar Region	
C-K. Hong, D.A. Grejner-Brzezinska, N. Arslan, M. Willis, <i>The Ohio State University</i> ; L. Hothem, <i>United States Geological Survey</i>	1418
E3: Land Applications	
GPS/INS/G Sensors/Yaw Rate Sensor/Wheel Speed Sensors Integrated Vehicular Positioning System	
J. Gao, <i>The University of Calgary, Canada</i>	1427
Analysis of Improvement to Two-Wheel Robot Navigation Using Low-Cost GPS/INS Aids	
B.J. Clark, D.M. Bevly, <i>Auburn University</i> ; S. Farritor, <i>Auburn University/University of Nebraska-Lincoln</i>	1440
The Overbot: An Off-Road Autonomous Ground Vehicle Testbed	
G.H. Elkaim, J. Connors, <i>University of California - Santa Cruz</i> ; J. Nagle, <i>Team Overbot</i>	1449
GPS-Based Relative Positioning Test Platform for Automotive Active Safety Systems	
C. Basnayake, C.C. Kellum, <i>General Motors Research and Development</i> ; J. Sinko, J. Strus, <i>SRI International</i>	1457

Phase Ambiguity Resolution Based on Linear Modeling of DD Carrier Phase	
M. Saeki, T. Kosaka, S. Kaneko, Tokyo University of Science, Japan	1468
Analyzing the Dynamic Behavior of Suspension Bridge Towers Using GPS

First Test Results of the German Galileo Test and Development Environment – GATE	
G. Heinrichs, E. Loehnert, E. Wittmann, <i>IfEN GmbH, Germany</i>	1576

Impact of the Spreading Codes onto the S-Curve Bias for the Galileo E5 Signals
F. Soualle, *EADS Astrium GmbH, Germany*.....1583

Signal Distortions at GNSS Payload Level
E. Rebeyrol, C. Macabiau, O. Julien, *ENAC/TeSA, France*; L. Ries, J-L. Issler, *CNES, France*; M. Bousquet, *SUPAERO, France*; M-L. Boucheret, *ENSEEIH, France*1595

A4: Algorithms for Multi-sensor Fusion

Adaptive Particle Filter for INS/GPS Integration
P. Aggarwal, D. Gu, N. El-Sheimy, *The University of Calgary, Canada*1606

A Numerical Procedure for Approximating Overbounds on Navigation Systems Error Distributions
G. Phanomchoeng, D. Gebre-Egziabher, *University of Minnesota, Twin Cities*; J.H. Rife, *Stanford University*.....1614

GPS/INS Integration Based on Recursive Least Square Lattice
M. El-Gizawy, *University of Calgary, Canada*; A. Noureldin, *Royal Military College of Canada*; N. El-Sheimy, *University of Calgary, Canada*.....1620

Comparison of the Extended and Sigma-point Kalman Filters on Inertial Sensor Bias Estimation Through Tight Integration of GPS and INS
Y. Li, J. Wang, C. Rizos, *University of New South Wales, Australia*1625

Development of a Multi-sensor Navigation Filter for High Accuracy Positioning in all Environments
C. Hide, T. Moore, C. Hill, *University of Nottingham, U.K.*1635

An ANFIS-KF Hybrid Scheme for Faster IMU Alignment
Y-W. Huang, *National Cheng Kung University, Taiwan*.....1645

New Developments in State Estimation for INS/GPS Integrated Systems
M. El-Diasty, *York University, Canada*; A. El-Rabbany, *Ryerson University, Canada*; S. Pagiatakis, *York University, Canada*1653

Intelligent Integration of a MEMS IMU With GPS Using a Reliable Weighting Scheme
C. Goodall, *The University of Calgary, Canada*1661

Fuzzy Enhancement of GPS - INS Synergy
A. Hiliuta, R. Landry, F. Gagnon, *Ecole de Technologie Superieure, Canada*.....1671

A Modified Kalman Filter for Hybrid Positioning
S. Ali-Löytty, N. Sirola, *Tampere University of Technology, Finland*.....1679

B4: Multipath

New Findings on Land Mobile Satellite Multipath Navigation Performance

A. Steingass, A. Lehner, *German Aerospace Center, (DLR) Germany* 1687

Capture, Analysis and Mitigation of Multipath in a High Sensitivity GPS Receiver

J. Bickerstaff, R. Frayling-Cork, T. Haddrell, *Glonav UK Ltd., U.K.* 1696

On the Multifractal Nature of Pseudorange Local Errors

M. van den Bossche, *Alcatel Alenia Space, France* 1706

Bounds on Signal Performance Regarding Multipath-estimating Discriminators

J.A. Avila-Rodriguez, T. Pany, G.W. Hein, *University FAF Munich, Germany* 1710

Performance Limits of Multi-path Mitigation for Short Delay

A. Pratt, *QinetiQ Ltd., U.K.* 1723

Multipath Mitigation Using Particle Filtering

P. Closas, *Universitat Politècnica de Catalunya, Spain*; C. Fernández-Prades, *Centre Tecnològic de Telecomunicacions de Catalunya, Spain*; J.A. Fernández-Rubio, *Universitat Politècnica de Catalunya, Spain*; A. Ramírez-González, *Technological University of the Mixteca, Mexico* 1733

Maximum Likelihood Multipath Estimation in Comparison with Conventional Delay Lock Loops

M. Lentmaier, B. Krach, *German Aerospace Center (DLR), Germany* 1741

Neural Networks Algorithms Prototyping to Mitigate GNSS Multipath for LEO Positioning Applications

W. Vigneau, O. Nouvel, *M3 Systems, France*; M. Manzano-Jurado, C. Carrascosa Sanz, *GMV S.A. Spain*; H. Abdulkader, D. Roviras, *TeSA, France*; J.M. Juan, *Universitat Politècnica de Catalunya, Spain*; C. Macabiau, *ENAC, France*; P. Holsters, *ESA, The Netherlands* 1752

Particle Filter for Reduced Multipath Error Parameters Estimation

A. Indriyamoko, Rosihan, D.H. Won, S. Chun, T. Kang, Y.J. Lee, *Konkuk University, South Korea*; E. Lee, *University of California, Los Angeles*; J.R. Kim, *Hankuk Aviation University, South Korea*; H-S. Jun, *Korea Aerospace Research Institute, South Korea* 1763

Statistical Determination of the PR Error Due to NLOS-Multipath in Urban Canyons

R. Ercek, P. De Doncker, F. Grenez, *Université Libre de Bruxelles, Belgium* 1771

Simulation-based Estimation of Multipath Mitigation Using 3D-GIS and Spatial Statistics

Y-W. Lee, *The University of Tokyo, Japan*; Y. Suh, *Pukyong National University, Korea*; R. Shibasaki, *The University of Tokyo, Japan* 1778

Two-element Vertical Antenna for Multipath Mitigation in Field Conditions

M. Vorobiev, A. Veitsel, S. Pushkarev, *Topcon Positioning Systems, Russia* 1784

C4: GNSS Receiver Algorithms 2 Tracking & Navigation

Comparison of Vector-Based Software Receiver Implementations With Application to Ultra-Tight GPS/INS Integration

M.G. Petovello, G. Lachapelle, *University of Calgary, Canada*.....1790

On the Maximum Likelihood Estimation of Position

P. Closas, *Universitat Politècnica de Catalunya, Spain*; C. Fernández-Prades, *Centre Tecnològic de Telecomunicacions de Catalunya, Spain*; J.A. Fernández-Rubio, *Universitat Politècnica de Catalunya, Spain*; A. Ramírez-González, *Technological University of the Mixteca, Mexico*.....1800

Cross Correlation Mitigation by Adaptive Orthogonalization Using Constraints - New Results

E. P. Glennon, *SigNav Pty Ltd., Australia*; A.G. Dempster, *University of New South Wales, Australia*.....1811

Implementation and Analysis of Acquisition and Tracking Algorithms for BOC Signals

S. Chen, K-H. Thiel, A. Kleusberg, *University of Stuttgart, Germany*1821

A New Unambiguous Low-Complexity BOC Tracking Technique

D. de Castro, J. Diez, A. Fernández, *Deimos Space, S.L., Spain*; J-M. Sleewaegen, *Septentrio Satellite Navigation*.....1830

An Algorithm for Bit Synchronization And Signal Tracking In Software GNSS Receivers

M. Anghileri, T. Pany, J-H. Won, G. Hein, *University FAF Munich, Germany*.....1836

Analysis of the One-Pole Notch Filter for Interference Mitigation: Wiener Solution and Loss Estimations

D. Borio, *Politecnico di Torino, Italy*; L. Camoriano, P. Mulassano, *Istituto Superiore Mario Boella, Italy*;1849

The Implications of Simultaneous Processing of the Galileo L1b/c Signals

P.G. Mattos, *ST Microelectronics, U.K.*1861

Coherent Processing Techniques for YMCA++ Receivers in Different Environments

N. Bhatia, A. Jovancevic, A. Brown, S. Ganguly, *Center for Remote Sensing, Inc*.....1866

Is It Really Necessary for GPS Receivers to Store Both Satellite Ephemerides and Almanacs?

G. Xie, R. Vohra, X. Yuan, *SiRF Technology, Inc*.....1878

D4: Atmospheric Effects 2

- Influence Analysis of Tropospheric Model and Mapping Function on Precise Tropospheric Delay Estimation Using PPP**
Y. Zhang, Y. Gao, *University of Calgary, Canada* 1884
- Atmospheric Moisture Estimation Using GPS on a Moving Platform**
S. Skone, Y. Gao, O. Al-Fanek, W. Tao, Y. Zhang, *The University of Calgary, Canada*;
P. Héroux, P. Collins, *Natural Resources, Canada* 1891
- PPP and Network True Real-time 30 sec Estimation of ZTD in Dense and Giant Regional GPS Network and the Application of ZTD for Nowcasting of Heavy Rainfall**
T. Iwabuchi, C. Rocken, Z. Lukes, L. Mervart, J. Johnson, *GPS Solutions Inc.*;
M. Kanzaki, *Nippon GPS Solutions Corp., Japan* 1902
- Wide Area Neutral Atmosphere Models for GNSS Applications**
R.F. Leandro, M.C. Santos, R.B. Langley, *University of New Brunswick Canada* 1910
- Local Tropospheric Anomaly Effects on GPS RTK Performance**
Y.W. Ahn, D. Kim, P. Dare, *University of New Brunswick, Canada* 1925
- Comparison of IGS and Radiosonde Determination of ZTD in the Canadian Arctic**
R. Ghoddousi-Fard, *University of New Brunswick, Canada* 1936
- Comparing Various GPS Neutral Atmospheric Delay Mitigation Strategies: A High Latitude Experiment**
R. Ghoddousi-Fard, P. Dare, *University of New Brunswick, Canada* 1945
- ## E4: Marine Applications
- Monitoring of Vessels Using a GNSS Receiver Network**
F.M. Bélanger, A.R.L. Tatnall, *University of Southampton, U.K.* 1954
- Experimental Evaluation of Maritime Position Communication System Using Low Power Radio Synchronized by PPS Signal of a GPS Receiver**
M. Yoshida, *Salesian Polytechnic, Japan*; H. Hojo, C. Fan, A. Yasuda,
Tokyo University of Marine Science and Technology, Japan 1965
- Direct Measurement Based H-infinity Controller Synthesis for an Autonomous Surface Vehicle**
G.H. Elkaim, R. Kelbley, *University of California - Santa Cruz* 1973
- Monitor and User Receivers for Differential Loran**
B. Peterson, K. Dykstra, *Peterson Integrated Geopositioning, LLC* 1983

Ionospheric Warning System for Marine DGPS Users
S. Skone, *University of Calgary, Canada*.....1992

Implementation of Ionosphere and Troposphere Models for High-Precision GPS Positioning of a Buoy During Hurricane Katrina
D. Dodd, *University of Southern Mississippi*; S.B. Bisnath, *York University, Canada*;
S. Howden, *University of Southern Mississippi*.....2006

Numerical Weather Models for Tropospheric Mitigation in Marine Kinematic GPS: a Daylong Analysis
F.G. Nievinski, *University of New Brunswick, Canada*.....2017

A Procedure for Creating Optimal ASF Grids for Harbor Entrance & Approach
G.W. Johnson, R. Shalae, C. Oates, *Alion Science & Technology*; P.F. Swaszek, *University of Rhode Island*; R. Hartnett, *US Coast Guard Academy*; D. Lown, K. Shmihluk, *USCG Loran Support Unit*2027

Simulation Result of Measurement for Oceanic Wavelength by Sea Surface Reflected GPS Signal
S. Okuda, Y. Arai, *Marine Technical College, Japan*; N. Kouguchi, *Kobe University, Japan*.....2039

Analysis of Pseudolite Augmented Precise Positioning Performance for Vessel Berthing
D-J. Cho, S-H. Park, S. Oh, S-H. Suh, *Korea Ocean Research & Development Institute, South Korea*.....2044

Maritime Demonstration Testbed for Galileo
C.S. Dixon, R.G. Morrison, *EADS Astrium Ltd., U.K.*2050

A Study on the System of Vessel Identification and Field Experiment
S. Oh, D. Cho, S.H. Park, S. Suh, *Korea Ocean Research & Development Institute, South Korea*.....2058

F4: GPS and GLONASS Modernization, QZSS

High-accurate GLONASS Orbit and Clock Determination for the Assessment of System Performance
E.G. Oleynik, V.V. Mitrikas, S.G. Revniviykh, A.I. Serdukov, E.N. Dutov, V.F. Shiriaev, *Central Research Institute of Machine Building (TSNIIMash), Russia*.....2065

Description of the L1C Signal
J. Betz, M.A. Blanco, *The MITRE Corporation*; C.R. Cahn, *Independent Consultant*; P.A. Dafesh, *The Aerospace Corporation*; C.J. Hegarty, *The MITRE Corporation*; K.W. Hudnut, *United States Geological Survey*; V. Kasemsri, *The MITRE Corporation*; R. Keegan, *Independent Consultant*; K. Kovach, *ARINC Engineering Services*; L.S. Lenahan, *USAF, Global Positioning Systems Wing*; H.H. Ma, J.J. Rushanan, *The MITRE Corporation*; D. Sklar, *The Aerospace Corporation*; T.A. Stansell, *Stansell Consulting*;
C.C. Wang, *The Aerospace Corporation*; S.K. Yi, *ARINC Engineering Services*2080

Status of QZSS Navigation System in Japan
S. Kogure, M. Sawabe, M. Kishimoto, *Japan Aerospace Exploration Agency, Japan*2092

Russian System for Differential Correction and Monitoring: A Concept and Results of the First Phase of Development
S. Averin, V. Dvorkin, S. Karutin, V. Kurshin, Y. Urlichich, *Russian Institute of Space Device Engineering, Russia*; V. Klimov, *Federal Space Agency, Russia*2103

NGA's Role in GPS
B. Wiley, D. Craig, D. Manning, J. Novak, R. Taylor, L. Weingarh, *National Geospatial-Intelligence Agency*2111

Remote Clock Synchronization System Using Geostationary Satellite for Japanese Quasi-Zenith Satellite System
N. Takasaki, A. Iwasaki, *The University of Tokyo, Japan*; T. Iwata, M. Imae, T. Suzuyama, *National Institute of Advanced Industrial Science and Technology, Japan*....2120

Performance Analysis of GPS Augmentation Using Quasi-Zenith Satellite System in Local Japan Area
Y. Zhang, *GEOSURF Corporation/Tokyo University of Marine Science and Technology, Japan*2131

A Comprehensive Trade Study on GPS Constellation Size and Number of Orbit Planes
P.D. Massatt, F.E. Fritzen, S.R. Scuro, K.M. O'Neill, *The Aerospace Corporation*.....2139

A5: GNSS-Inertial Navigation Systems 1

Integrated GPS/INS System for Pedestrian Navigation in a Signal Degraded Environment
S. Godha, G. Lachapelle, M.E. Cannon, *The University of Calgary, Canada*2151

An Intelligent Real-Time MEMS IMU/HSGPS Integrated Vehicular Navigation System and Road Test Results
J-H. Wang, Y. Gao, *The University of Calgary, Canada*2165

A Neural-KF Hybrid Sensor Fusion Scheme for INS/GPS/Odometer Integrated Land Vehicular Navigation System
Y-C. Lin, Y-W. Huang, K-W. Chiang, *National Cheng Kung University, Taiwan*2174

Tightly-coupled GPS/INS Integration Using Unscented Kalman Filter and Particle Filter
Y. Yi, D.A. Grejner-Brzezinska, *The Ohio State University*2182

Improving GPS Receiver Tracking Performance of PLL by MEMS IMU Aiding
Y. Yang, N. El-Sheimy, *University of Calgary, Canada*2192

Multi-sensor Inertial Navigation Systems Employing Skewed Redundant Inertial Sensors

A. Osman, B. Wright, *The University of Calgary, Canada*; A. Noureldin, *Royal Military College of Canada*; N. El-Sheimy, *The University of Calgary, Canada*.....2202

Filter Designed for GPS-Aided Inertial Navigation System Based on Linear Accelerometers

W. Junwei, L. Jinfeng, Z. Yunan, Y. Na, *Harbin Engineering University, China*.....2208

Control of Wheeled Robots Using GNSS and Inertial Navigation: Control Law Synthesis and Experimental Results

L. Rapoport, M. Gribkov, A. Khvalkov, I. Matrosov, A. Pesterev, M. Tkachenko, *Javad GNSS, Russia*.....2214

Development of a GPS/INS Integrated System on the Field Programmable Gate Array Platform

Y. Li, P. Mumford, J. Wang, C. Rizos, *University of New South Wales, Australia*2222

B5a: GNSS Civil Interference and Spectrum Aspects

Statistical Inference Technique in Pre-Correlation Interference Detection in GPS Receivers

A.T. Balaei, *University of New South Wales, Australia*2232

A Technique of Interference Monitoring in GNSS Applications, Based on ACF and Prony Methods

L. Lo Presti, B. Motella, *Politecnico Di Torino, Italy*; M. Leonardi, *Tor Vergara University, Italy*2241

Mitigating Pulsed Interference Using Frequency Domain Adaptive Filtering

M. Raimondi, O. Julien, C. Macabiau, *ENAC, France*; F. Bastide, *SOFREAVIA/DTI, France*2251

Satellite-to-Satellite Interference Effects Observed in High-Rate C/A-Code Power Measurements

T.L. Beach, C.A. Baragona, *Air Force Research Laboratory*.....2261

B5b: Precise Point Positioning

Wide Area Based Precise Point Positioning

R.F. Leandro, M.C. Santos, *University of New Brunswick, Canada*2272

Handling of the Tropospheric Delay in Kinematic Precise Point Positioning

N.S. Kjörsvik, *TerraTec AS, Norway*; J.G.O. Gjevestad, O. Øvstedal, *Norwegian University of Life Sciences, Norway*2279

StarFire™: A Global SBAS for Sub-Decimeter Precise Point Positioning
K. Dixon, *NavCom Technology Inc.*2286

Development of a Real-Time Single-Frequency Precise Point Positioning System and Road Test Results
Y. Gao, Y. Zhang, K. Chen, *The University of Calgary, Canada*2297

A Single Frequency PPP Algorithm Based on GR Models
S. Fujita, Y. Kubo, S. Sugimoto, *Ritsumeikan University, Japan*2304

C5: Software Receivers 1 (GNSS)

Performance Testing of a Real-Time Software-Based GPS Receiver for x86 Processors
S. Charkhandeh, M.G. Petovello, G. Lachapelle, *The University of Calgary, Canada*2313

A Real-Time Software Receiver for the GPS and Galileo L1 Signals
B.M. Ledvina, *Virginia Polytechnic Institute and State University*; M.L. Psiaki, T.E. Humphreys, S.P. Powell, P.M. Kintner, Jr., *Cornell University*2321

Implementing a GPS Waveform Under the Software Communications Architecture
A. Brown, D. Babich, *NAVSYS Corporation*2334

Generalized Frequency-Domain Correlator for Software GPS Receiver: Preliminary Test Results and Analysis
C. Yang, *Sigtem Technology, Inc.*; M. Miller, T. Nguyen, *AFRL/SNRN*; D. Akos, *University of Colorado*2346

A Hybrid Architecture for High Sensitivity Standalone and Assisted Galileo/GPS Receivers
O. Otaegui, N. Lucas, G. Rohmer, *Fraunhofer IIS, Germany*2361

GNSS Receiver Implementation on a DSP: Status, Challenges, and Prospects
T.E. Humphreys, M.L. Psiaki, P.M. Kintner, *Cornell University*; B.M. Ledvina, *University of Texas at Austin*2370

A Flexible Galileo E1 Receiver Platform for the Validation of Low Power and Rapid Acquisition Schemes
C. Botteron, G. Wälchli, G. Zamuner, M. Frei, D. Manetti, F. Chastellain, P-A. Farine, *University of Neuchatel, Switzerland*; P. Brault, *Martec Serpe-Iesm, France*2383

Design of a Unified MLE Tracking for GPS/Galileo Software Receivers
J-H. Won, T. Pany, B. Eissfeller, *University FAF Munich, Germany*2396

An Efficient New Method of Doppler Removal and Correlation with Application to Software-Based GNSS Receivers
M.G. Petovello, G. Lachapelle, *University of Calgary, Canada*2407

D5: Indoor Positioning 1

How to Optimize GNSS Signals and Codes for Indoor Positioning

J.A. Avila-Rodriguez, S. Wallner, G.W. Hein, *University FAF Munich, Germany*.....2418

Block-Accumulating Coherent Integration Over Extended Interval (BACIX) for Weak GPS Signal Acquisition

C. Yang, *Sigtem Technology, Inc.*; S. Han, *Centrality Communications, Inc.*2427

Performance Evaluation of a Differential Approach Based Detector

W. Yu, *The University of Calgary, Canada*2441

Improving GPS L1 C/A Code Correlation Properties Using a Novel Multi-correlator Differential Detection Technique

S.K. Shanmugam, *The University of Calgary, Canada*2453

The Performance and Simulation of a C-CDMA Pseudolite Indoor Geolocation System

I.F. Proгри, J. Maynard, *California State Polytechnic University*; W.R. Michalson, *Worcester Polytechnic Institute*; J. Wang, *University of New South Wales, Australia*2465

An Indoor Positioning System Using Time-Delayed GPS Repeater

S-H. Im, G-I. Jee, Y.B. Cho, *Konkuk University, South Korea*2478

2D Indoor Dynamic Positioning Using GNSS Based Repeaters

A. Vervisch-Picois, A. Bideau, *GET/INT, Evry, France*; M. Jeannot, *CNES, France*; N. Samama, *GET/INT Evry, France*2484

The Nordnav Indoor GNSS Reference Receiver

A. Mitelman, P-L. Normark, M. Reidevall, J. Thor, *Nordnav Technologies AB, Sweden*; O. Grönqvist, L. Magnusson, *TeliaSonera AB, Sweden*2494

E5: Space and Satellite Applications

The GPS Space Service Volume

F.H. Bauer, M.C. Moreau, *NASA Goddard Space Flight Center*, M.E. Dahle-Melsaether, W.P. Petrofski, B.J. Stanton, S. Thomason, *SI International, Inc., / HQ Air Force Space Command*; G.A Harris, R.P. Sena, L. Parker Temple III, *The Aerospace Corporation*2503

Real-Time Sub-cm Differential Orbit Determination of Two Low-Earth Orbiters With GPS Bias Fixing

S-C. Wu, Y.E. Bar-Sever, *Jet Propulsion Laboratory*2515

Land and Ice Remote Sensing From Low Earth Orbit Using GNSS Bistatic Radar

S. Gleason, *Surrey Satellite Technology Ltd.*2523

Analysis of Signal Availability in the GPS Space Service Volume
B.J. Stanton, *SI International Systems / HQ Air Force Space Command*; L. Parker Temple III, C.E. Edgar, *The Aerospace Corporation*2531

The GIOVE-A Satellite: From Design to In-orbit Commissioning
G. Gatti, A. Garutti, G. Mandorlo, *European Space Agency, The Netherlands*; J. Paffet, A. Bradford, E. Rooney, *SSTL*2542

Real Time GPS Positioning of LEO Satellites Mitigating Pseudorange Multipath Through Neural Networks
P. Ramos-Bosch, *Technical University of Catalonia, Spain*.....2548

GPS Receiver With Soft-correlator Approach for Leo-Orbits
G. Vyasraj, R. Vishwanath, R. Nayak, *Accord Software & Systems Pvt. Ltd., India*2555

A Dual Frequency GPS Receiver (L1/L2c or L1/Lp) for Space Applications in LEO and GEO Orbit
S. Serre, C. Mehlen, C. Boyer, *Alcatel Alenia Space, France*; P. Holsters, G. Seco-Granados, A. Garcia-Rodriguez, *European Space Agency (ESA), The Netherlands*; J-L. Issler, M. Grondin, *French Space Agency, CNES, France*.....2563

Autonomous Formation Flying RF Sensor Development for the PRISMA Mission
L. Lestarquit, J. Harr, T. Grelier, E. Peragin, *CNES, France*; N. Wilhelm, C. Mehlen, C. Peyrotte, *Alcatel Alenia Space, France*2571

Integrated Adjustment of LEO and GPS With PANDA in Precision Orbit Determination
C. Shi, J. Geng, J. Liu, *Wuhan University, China*; M. Ge, *GFZ Potsdam*2579

F5: Galileo Integrity, Multi-constellation RAIM

On the use of Multiconstellation-RAIM for Aircraft Approaches
P.B. Ober, *Integricom, The Netherlands*; D. Harriman, *Lockheed Martin STASYS Ltd.*2587

Further Development of Galileo-GPS RAIM for Vertical Guidance
A. Ene, *Stanford University*.....2597

Receiver Integrity Monitoring in Case of Multiple Failures
I. Martini, R. Wolf, *IfEN GmbH, Germany*; G.W.Hein, *University FAF Munich, Germany*2608

Sequential RAIM Designed to Detect Combined Step Ramp Pseudo-Range Error
A. Clot, C. Macabiau, *ENAC, France*; I. Nikiforov, *UTT*; B. Roturier, *DGAC DSNA/DTI/SO, France*2621

GALILEO Integrity: The Ground Segment Computation Algorithm Perspective
C. Hernández, C. Catalán, M. A. Fernández, A. J. Gavín, E. Sardón, J. R. Martín, *GMV S.A., Spain*2634

The Need for Developing Global Integrity Standards and the Opportunity of a Global Multi-constellation Service
H. Favin-Lévêque, *Astrium Services, France*; H. Trantenberg, *Astrium Satellites GmbH, Germany*; B. Boutteau, A. Bidaux, *Astrium Services, France*2646

A General Method for Accurate Assessment of GNSS FDE Holes
S. Feng, W.Y. Ochieng, *Imperial College London, U.K.*2658

Making GNSS Integrity Simple and Efficient - A New Concept Based on Signal-in-Space Error Bounds
J. Mach, I. Deuster, R. Wolf, W. Werner, *IfEN GmbH, Germany*2666

A6: GNSS-Inertial Navigation 2

Characterization of Inertial Sensor Measurements for Navigation Performance Analysis
J.H. Wall, D.M. Bevly, *Auburn University*2678

IADIRA: Inertial Aided Deeply Integrated Receiver Architecture
P.F. Silva, J.S. Silva, A. Caramagno, *Deimos Engenharia S.A., Portugal*;
M. Wis, M.E. Parès, I. Colomina, *Institut de Geomatica*; A. Fernández, J. Diez, *Deimos Space, S.L., Portugal*; V. Gabaglio, *Galileo Joint Undertaking*2686

A Software Defined Real-time Ultra-tightly Coupled (UTC) GNSS-INS Architecture
W. Woessner, J. Noronha, A. Jovancevic, S. Ganguly, *Center for Remote Sensing, Inc.*2695

A Man Motion Navigation System Using High Sensitivity GPS, MEMS IMU and Auxiliary Sensors
C.J. Mather, P.D. Groves, M.R. Carter, *QinetiQ, Ltd., U.K.*2704

Enhanced MEMS-INS/GPS Integration System
S.Y. Cho, B.D. Kim, Y.S. Cho, W.S. Choi, *Electronics and Telecommunications Research Institute, South Korea*2715

Stochastic and Geometric Observability of Aided Inertial Navigators
Y. Shao, D. Gebre-Egziabher, *University of Minnesota Twin Cities*2723

Performance Studies of Nonlinear Filtering Methods in INS/GPS In-Motion Alignment
M. Nishiyama, *Ritsumeikan University, Japan*; S. Fujioka, *Sanyo Electric Co., Ltd.*; Y. Kubo, T. Sato, S. Sugimoto, *Ritsumeikan University, Japan*2733

B6: Surveying and Geodesy

Sub-millimeter Precision GPS Survey System at the Holloman High Speed Test Track
J.C. Hughes, J.A. Banks, A.J. Kerkhoff, B.W. Tolman, J.R. Wyant, *The University of Texas at Austin*; R.E. Ellison, *National Geospatial-Intelligence Agency*2743

Core Wall Survey Control System

D.M. Hayes, *Samsung Besix Arabtech, UAE*; I.R. Sparks, *Connell Wagner, Australia*;
J.M. van Cranenbroeck, *Leica Geosystems AG, Switzerland*.....2754

Modernizing the Brazilian Active Control Network

L.P.S. Fortes, S.M.A. Costa, M.A.A. Lima, J.A. Fazan, *Brazilian Institute of Geography and Statistics, Brazil*; J.F. Galera-Monico, *São Paulo State University, Brazil*;
M. C. Santos, *University of New Brunswick, Canada*; P. Tétreault,
Natural Resources Canada2759

Comparison of Tropospheric Decorrelation Errors in the Presence of Severe Weather Conditions in Different Areas and Over Different Baseline Lengths

J. Huang, F. van Graas, *Ohio University*2769

Self-Calibrating Receivers for Precision Phase Observations

S. Ganguly, N. Bhatia, A. Jovancevic, A. Brown, M. Kirchner, D. Saxena, J. Noronha,
S. Zigic, *Center for Remote Sensing, Inc.*.....2788

Geodetic Antenna Calibration Test in the Antarctic Environment

D.A. Grejner-Brzezinska, E. Vazquez, *The Ohio State University*; L. Hothem,
United States Geological Survey.....2798

Tropospheric Effects in Monitoring Super High Buildings With GPS

W.J. Dai X.L. Ding, Z.W. Li, *Hong Kong Polytechnic University, Hong Kong*; K.C.S. Kwok,
S. Campbell, *The Hong Kong University of Science and Technology, Hong Kong*2807

Assessment of Digital Terrain Models for Multipath Prediction at Geodetic GNSS Installations

J.P. Weiss, P. Axelrad, S. Anderson, *University of Colorado, Boulder*.....2815

A Non-differential Approach to the Estimation of GNSS-derived Accelerations. Galileo's Foreseen Impact on Airborne Gravimetry

J.J. Rosales, I. Colomina, *Institute of Geomatics, Spain*2824

Using SmartStation and GPS Integrated With INS, to Map Underground Pipes and Cables

A. Taha, X. Meng, G. W. Roberts, C. Hide, J-P. Montillet,
The University of Nottingham, U.K.2832

C6: Software Receivers 2 (Applications)

Integrating the GP2021 and Linux in Open Source GPS

F.A. Niles, *Consultant*.....2841

The Namuru Open GNSS Research Receiver

P.J. Mumford, K. Parkinson, A. Dempster, *The University of New South Wales, Australia* ..2847

Block-Repetitive Iterated Processing for Software GPS Receiver: Dichotomized Search of Correlation Peak	
C. Yang, <i>Sigtem Technology, Inc.</i> ; M. Miller, T. Nguyen, <i>Air Force Research Laboratory / SNRN</i>	2856
Open Signals, Open Software: Two Years of Collaborative Analysis Using the GPS Toolkit	
R.B. Harris, T. Craddock, T. Conn, T. Gaussiran, E. Hagen, A. Hughes, J. Little, R. Mach, S. Nelsen, B. Renfro, B. Tolman, <i>ARL/The University of Texas at Austin</i>	2865
Geodetic Baseline GPS Processing by a Simple Sequential Technique	
M. Vermeer, M. Väisänen, <i>Helsinki University of Technology, Finland</i>	2877
GeoZigBee: A Wireless GPS Wristwatch Tracking Solution	
A. Brown, P. Brown, J. Griesbach, <i>NAVSYS Corporation</i> ; T. Boulton, <i>University of Colorado at Colorado Springs</i>	2883
Extended Kalman Filter-Based Deeply Integrated GNSS/Low-Cost INS for Reliable Navigation Under GNSS Weak Interrupted Signal Conditions	
N.I. Ziedan, <i>The University of Calgary, Canada</i>	2889
Testing GPS L5 Acquisition and Tracking Algorithms Using a Hardware Simulator	
C. Mongrédien, G. Lachapelle, M.E. Cannon, <i>The University of Calgary, Canada</i>	2901
Generalization of the Dual Frequency Method of Multipath Calibration for Global Reference Networks	
R.B. Harris, E.G. Lightsey, <i>The University of Texas at Austin</i>	2914
Providing Corrections From Space Based Augmentation System to Non-Aviation Users via Internet	
S-S. Jan, <i>National Cheng Kung University, Taiwan</i>	2925
D6: Indoor Positioning 2	
Theoretical and Practical Sensitivity Limits for Assisted GNSS Receivers Using Legacy and Future GNSS Signals	
L.R. Weill, <i>California State University, Fullerton / Magellan Systems Japan, Inc.</i>	2930
Innovative Techniques for GPS Indoor Positioning Using a Snapshot Receiver	
D. Jiménez-Baños, N. Blanco-Delgado, G. López-Risueño, G. Seco-Granados, A. Garcia-Rodríguez, <i>European Space Agency, ESA, The Netherlands</i>	2944
Evaluation of Assisted GPS (AGPS) Performance Using Simulator and Field Tests	
S. Singh, <i>The University of Calgary, Canada</i>	2956
Continuous Fine Time Aiding to a GPS Receiver in Tracking Mode in a GSM Terminal	
P. Duffett-Smith, P. Hansen, <i>Cambridge Positioning Systems Ltd., U.K.</i> ; A.R. Pratt, <i>Orbstar Consultants, U.K.</i> ; R. Faragher, <i>University of Cambridge, U.K.</i>	2968

INS-Assisted High Sensitivity GPS Receivers For Degraded Signal Navigation
G. Gao, G. Lachapelle, *The University of Calgary, Canada*2977

Real Time Pedestrian Navigation System
D. Kubrak, C. Macabiau, *Ecole Nationale del'Aviation Civile/TéSA, France*;
M. Monnerat, *Alcatel Alenia Space, France*2990

Indoor Navigation Test Results using an Integrated GPS/TOA/Inertial Navigation System
A. Brown, Y. Lu, *NAVSYS Corporation*2999

Comparative A-GPS and 3G-Matrix Testing in a Dense Urban Environment
P. Duffett-Smith, R. Rowe, *Cambridge Positioning Systems Ltd., U.K.*3006

E6: Aviation Applications

An Improved Sensor Level Integrity Algorithm for GPS/INS Integrated System
U.I. Bhatti, *Imperial College London, U.K.*3012

New Applications of Measurement Redundancy in High Performance Relative Navigation Systems for Aviation
S. Khanafseh, B. Kempny, B. Pervan, *Illinois Institute of Technology*3024

Combining Inertial Navigation System With GPS Precise Point Positioning: Flight Test Results
A.Q. Le, J.F.M. Lorga, *Delft University of Technology, The Netherlands*3035

Architectures for Combined Standard Positioning System/Precise Positioning System User Equipment
D.A. Stratton; *Rockwell Collins, Inc.*3043

Wind Estimation and Airspeed Calibration Using the UAV with a Single-Antenna GNSS Receiver and Airspeed Sensor
A. Cho, J. Kim, S. Lee, C. Kee, *Seoul National University, South Korea*3050

Ionospheric Code Delay Estimation in a Single Frequency Case for Civil Aviation
C. Ouzeau, *ENAC/TéSA/DTI, France*; F. Bastide, *Sofréavia/DTI, France* ;
C. Macabiau, *ENAC, France*; B. Roturier, *DSNA-DTI, France*3059

Alert Limits: Do we Need Them for CAT III?: Deriving GBAS Requirements for Consistency with CAT III Operations
B. Clark, B. DeCleene, *Federal Aviation Administration*3070

F6: Novel Applications

GPS-Guided Autonomous Lawnmower With Scanning Laser Obstacle Detection

D. Bates, F. van Graas, *Ohio University*3082

Miami Metro GPS Team

C. Miller, K. Pickering, B. Samic, J. Morton, M.M. Miller, *Miami University*.....3089

Tracking System for Locating Stolen Currency

R. Fuller, P. Grimm, *Geotrax*3094

GPS Tracking Performance Under Avalanche Deposited Snow

J.B. Schleppe, G. Lachapelle, *The University of Calgary, Canada*.....3105

Audio Nomad

D. Woo, N. Mariette, J. Salter, C. Rizos, *University of New South Wales, Australia*;
N. Helyer, *Sonic Objects: Sonic Architecture*.....3117

From “Star Trekking” to “Star Tracking” – The Path Towards a Viable Tricorder via the DAGR-based Situation Data Advisor

J.T. Kelly, *Rockwell Collins Inc.*3124

Real-Time Target Localization Using a Gimbaled Camera for a Single-Antenna GPS-Based UAV

S. Shon, B. Lee, J. Kim, C. Kee, *Seoul National University, South Korea*3134

Design of an Integrated GPS Receiver for the Processing of Reflected GPS Signals

L-C. Shen, C-L. Tseng, J-C. Juang, *National Cheng Kung University, Taiwan*;
C-C. Chang *Yuda University, Taiwan*3140

The Performance and Simulation of an OFDMA Pseudolite Indoor Geolocation System

I.F. Proгри, W. Ortiz, *California State Polytechnic University*; W.R. Michalson, *Worcester Polytechnic Institute*; J. Wang, *University of New South Wales, Australia*3149
