

# 2006 National Technical Meeting of the Institute of Navigation

## Table of Contents

### Plenary Session

<b>Beyond Navigation—Mapping the Earth’s Gravity Field by GPS and INS</b> K.P. Schwarz, <i>The University of Calgary, Canada</i> -----	1
<b>Bringing Precision to Inertial Navigation Systems</b> J. Lowell, <i>DARPA Defense Sciences Office</i> -----	18
<b>MILLIMETER GPS: Innovation in High Precision Position Solutions</b> C. Goad, <i>Topcon Positioning Systems, Inc.</i> -----	29
<b>Making Robot Planes Useful for Scientific Investigation of Earth, Past and Present UAV Flight Program at NASA Dryden Flight Research Center</b> C. Jennison, <i>NASA Dryden Flight Research Center</i> -----	53
<b>A1: Interference and Spectrum Management</b>	
<b>Optimum Element Distribution for Circular Adaptive Antenna Systems</b> J.A. Ulrey, I.J. Gupta, <i>The Ohio State University</i> -----	76
<b>New Spectral Measurements of GNSS Signals</b> T. Grelier, R. Ries, J-L. Issler, <i>CNES, France</i> ; F. Counturier, <i>ANFR, France</i> -----	82
<b>Determining and Shaping GNSS Symbol PSDs for Effective Spectrum Reuse</b> D. Benson, <i>The MITRE Corporation</i> -----	92
<b>Interplex Modulation for Navigation Systems at the L1 Band</b> E. Rebeyrol, <i>ENAC/TeSA, France</i> ; C. Macabiau, <i>ENAC, France</i> ; L. Ries, J-L. Issler, <i>CNES, France</i> ; M. Bousquet, <i>Supaero, France</i> ; M-L. Boucheret, <i>Enseeiht, France</i> -----	100
<b>GPS L5 Signal Acquisition and Tracking Under Unintentional Interference or Jamming</b> I.F. Progri, <i>California State Polytechnic University</i> -----	112
<b>A Case for Updating the GPS Standard Positioning Service Performance Standard</b> J.W. Lavrakas, <i>Overlook Systems Technologies, Inc.</i> -----	122

## **A2: Location Based Services & Indoor Navigation/Multipath Mitigation**

### **User Level Integrity as an Enabler of GNSS Applications**

A.L. Mark, J. Autran, S. Golmayo, *GMV, S.A., Spain* ----- 129

### **Receiver Autonomous Mitigation of GPS Non-Line-of-Sight Multipath Errors**

A. Morrison, S. Krishnan, A. Anpalagan, *Ryerson University, Canada*; B. Grush, *Applied Location Corporation, Canada*----- 141

### **Vehicular Navigation Using a Tight Integration of Aided-GPS and Low-Cost MEMS Sensors**

D. Kubrak, C. Macabiau, *ENAC/TeSA, France*; M. Monnerat, *Alcatel Alenia Space, France*; M-L. Boucheret, *Ecole Nationale Supérieure de Telecommunications, France* ----- 149

### **Fine Time Aiding in Unsynchronised Cellular Systems: The Benefits for GPS Integration in Mobile Phones**

P. Duffett-Smith, *Cambridge Positioning Systems Ltd*; T. Pratt, *Orbstar Consultants, U.K.* ----- 159

### **Fine Time Aiding and Pseudo-Synchronisation of GSM Networks**

T. Pratt, *Orbstar Consultants, U.K.*; R. Faragher, P. Duffett-Smith, *University of Cambridge, U.K.*----- 167

### **The Simulation and Implementation of the Acquisition of a 1-D C-CDMA Indoor Geolocation System**

Y.Y. Chung, M. Dedeaux, J. Miyamoto, S. Galicia, J. Lim, I.F. Proгри, R. Cockrum, *California State Polytechnic University* ----- 174

## **A3: Marine Navigation Applications**

### **Future of IALA DGNSS**

N. Ward, *International Association of Marine Aids to Navigation/Lighthouse Authorities, U.K.*----- 184

### **Application of Integrated Satellite DGPS/GPRS Navigation and Hydrographic Systems for Safe Sailing on Great Mazurian Lakes in Poland**

D. Popielarczyk, S. Oszczak, *University of Warmia and Mazury, Poland* ----- 188

### **Analysis and Evaluation of Various Ionospheric Models for Potential Use in the NDGPS Service**

D. Dodd, *University of Southern Mississippi*; S.B. Bisnath, *Harvard-Smithsonian Center for Astrophysics*; A. Cleveland, M. Parsons, *U.S. Coast Guard* ----- 195

<b>Development of a Marine Mammal Marker (MAMARK) for In-Situ Environmental Monitoring</b> G.H. Elkaim, E.B. Decker, G. Oliver, <i>University of California Santa Cruz</i> ; B. Wright, <i>Boulder Creek</i> -----	206
---	-----

<b>A Study on Detection of Sea Level Variation Using GPS Signal Reflected by Sea Surface</b> T. Yoshihara, S. Saito, N. Fujii, T. Sakai, <i>Electronic Navigation Research Institute (ENRI), Japan</i> -----	217
---	-----

<b>Method for Detecting and Tracking Ships Using Navigational Image Sequence as an Application of Integrated Navigation Systems</b> M. Shimpo, <i>Mitsubishi Electric Corp., Japan</i> ; M. Hirasawa, X. Yu, Y. Arvelyna, M. Oshima, <i>Tokyo University of Marine Science and Technology, Japan</i> -----	224
---	-----

## **A4: Scientific, Timing & Space Applications**

<b>Verification of a Real-time Attitude Determination Algorithm Through Development of 48 Channel GPS Attitude Receiver Hardware</b> J. Jang, C. Kee, <i>Seoul National University, South Korea</i> -----	236
--	-----

<b>TOPSTAR 3000 GPS Receiver on Board DEMETER Micro-satellite: Results of the First Year in Orbit Successful Operation</b> M. Grondin, J-L. Issler, M-C. Charmeau, A. Lamy, D. Laurichesse, P. Raizonville, M-A. Clair, T. Cussac, <i>French Space Agency (CNES)</i> ; C. Mehlen, C. Boyer, N. Wilhelm, H. Favaro, <i>Alcatel Alenia Space</i> -----	244
---	-----

<b>Investigation of New Processing Techniques for Geostationary Satellite Positioning</b> B. Chibout, C. Macabiau, A-C. Escher, <i>ENAC/Tesa, France</i> ; L. Ries, J-L. Issler, <i>CNES, France</i> ; S. Corazza, <i>Alcatel Alenia Space</i> ; M. Bousquet, <i>Supaero</i> -----	250
---	-----

<b>Dilution of Precision-Based Lunar Navigation Assessment for Dynamic Position Fixing</b> O.S. Sands, J.W. Connolly, B.W. Welch, <i>NASA Glen Research Center</i> ; J.R. Carpenter, <i>NASA Goddard Space Flight Center</i> ; T.A. Ely, <i>NASA Jet Propulsion Laboratory</i> ; K. Berry, <i>NASA Goddard Space Flight Center</i> -----	260
---	-----

<b>Performance Analysis of the Tracking Loop Design of the Electra Transceiver</b> A. Mogensen, T. Campbell, E.G. Lightsey, <i>University of Texas at Austin</i> -----	269
---	-----

## **B1: Algorithms and Methods 1**

<b>Altitude Hold Algorithm for ILL-Conditioned GPS Positioning</b> C-W. Chen, L-S. Wang, F-R. Chang, <i>National Taiwan University, Taiwan</i> ; C-C. Chen, <i>Evermore Technology, Inc., Taiwan</i> -----	278
---	-----

<b>A Reference Point-based Precise Relative Positioning Method Using a Single Frequency Receiver</b> E. Kim, T. Walter, J.D. Powell, <i>Stanford University</i> -----	283
--	-----

<b>Generalized Divergence-Free Carrier Smoothing with Applications to Dual Frequency Differential GPS</b>	
G.A. McGraw, <i>Rockwell Collins</i> -----	293
<b>A New Algorithm to Reduce AGPS Acquisition TTFF</b>	
H.A. El Natour, <i>Ecole Nationale de l'Aviation Civile/TeSA, France</i> ; M. Monnerat, <i>Alcatel Alenia Space, France</i> ; A-C. Escher, C. Macabiau, <i>Ecole Nationale de l'Aviation Civile, France</i> ; M-L. Boucheret, <i>Ecole Nationale Supérieure de Telecommunications, France</i> -----	301
<b>Post-Correlator Modeling for Fast Simulation and Joint Performance Analysis of GNSS Code and Carrier Tracking Loops</b>	
A.R. Golshan, <i>ARINC Engineering Services, LLC.</i> -----	312
<b>Neural Networks Based Approach for Data Fusion in Multi-frequency Navigation Receivers</b>	
M. Musso, A.F. Cattoni, C.S. Regazzoni, <i>University of Genova, Italy</i> -----	319
<b>B2: Augmentation Systems: GBAS and SBAS 1</b>	
<b>GBAS Alert Limits Compared to ILS Collision Risk Model Navigation System Error Assumptions</b>	
T. Murphy, <i>Boeing Commercial Airplanes</i> -----	327
<b>Development of an Error Model for Locally-Achieved Performance of WAAS</b>	
R. Niles, C.A. Shively, <i>The MITRE Corporation/CAASD</i> -----	342
<b>EGNOS Flight Trials, Evaluation of EGNOS Performance and Prospects</b>	
H.P.J. Veerman, <i>NLR (National Aerospace Laboratory), Netherlands</i> ; P. Rosenthal, <i>Thales ATM GmbH, Germany</i> -----	358
<b>Prototype of Satellite-Based Augmentation System and Evaluation of the Ionospheric Correction Algorithms</b>	
T. Sakai, K. Matsunaga, K. Hoshinoo, <i>Electronic Navigation Research Institute, Japan</i> ; T. Walter, <i>Stanford University</i> -----	368
<b>Progress of the Asia-Pacific GNSS Test Bed</b>	
N. Pringvanich, P. Abhakara, L.M. Herold, <i>Aeronautical Radio of Thailand</i> -----	380
<b>Performance of Loran-C 9th Pulse Modulation Techniques</b>	
L. Hartshorn, P. Swaszek, <i>University of Rhode Island</i> ; G. Johnson, M. Wiggins, <i>Alion, Science and Technology</i> ; R. Hartnett, <i>U.S. Coast Guard Academy</i> -----	384
<b>Pseudorange Correction Prediction Using Artificial Neural Network</b>	
O.A. Alim, <i>Alexandria University, Egypt</i> ; A. El-Rabbany, <i>Ryerson University</i> ; R. Rashsd, M. Mohasseb, <i>Arab Academy for Science &amp; Technology and Maritime Transport, Egypt</i> -----	396

## **B3: Aviation Systems and Precision Approach**

### **BALOR Model Validity for the Airport ASF Mapping Methodology**

G. Johnson, R. Shalaev, C. Oates, *Alion Science & Technology*; P.F. Swaszek, *University of Rhode Island*; R. Hartnett, *U.S. Coast Guard Academy*----- 400

### **Ranging Source Fault Integrity Concepts for a Local Airport Monitor for WAAS**

C.A. Shively, *The MITRE Corporation/CAASD* ----- 413

### **Galileo-GPS RAIM for Vertical Guidance**

A. Ene, J. Blanch, T. Walter, *Stanford University*----- 432

### **Formulation of a Time-Varying Maximum Allowable Error for Ground-Based Augmentation Systems**

J. Rife, E. Phelts, *Stanford University* ----- 441

### **GNSS Airborne Multipath Errors Distribution Using the High Resolution Aeronautical Channel Model and Comparison to SARPs Error Curve**

C. Macabiau, L. Moriella, M. Raimondi, *ENAC, France*; C. Dupouy, *STNA* ; A. Steingass, A. Lehner, *DLR* ----- 454

### **Early Operational Experience With New Capabilities Enabled by GBAS Landing Systems (GLS)**

T. Murphy, J. Ackland, T. Imrich, T. Lapp, R. Freidman, *Boeing Commercial Airplanes*----- 468

## **B4: High Precision Applications**

### **Modeling of INS Position and Velocity Errors Using Radial Basis Function Neural Networks for INS/GPS Integration**

L. Semeniuk, A. Noureldin, *Royal Military College of Canada* ----- 479

### **Efficient and Cost-Effective Generation of Precise Digital Terrain Model (DTM) with the Use of GPS and GSM/GPRS Technology**

A. Cieccko, B. Oszczak, S. Oszczak, *University of Warmia and Mazury, Poland* ----- 490

### **Detecting the Displacement of the Islands in the Red Sea, Gulf of Suez, and Gulf of Aqaba by GPS**

H. El-Saadawy, *Arab Academy for Science & Technology & Maritime, Egypt*----- 497

### **Real-Time MEMS Based INS/GPS Integrated Navigation System for Land Vehicle Navigation Application**

Y. Yang, X. Niu, N. El-Sheimy, *University of Calgary, Canada* ----- 501

### **Use of Residual DOP and Genetic Algorithm in Weighted-Least-Square GPS Positioning**

C-C. Lin, L-S. Wang, F-R. Chang, *National Taiwan University, Taiwan*; C-C. Chen, *Evermore Technology, Inc., Taiwan* ----- 508

**Hight-Accuracy Airborne GPS/INS Positioning Augmented by Pseudolite**  
J.J. Wang, J. Wang, *University of New South Wales, Australia*; D.Sinclair, L. Watts,  
QASCO Surveys Pty., Lt., Australia ----- 515

**Improving MEMS IMU/GPS Systems for Accurate Land-Based Navigation Applications**  
S. Nassar, Z. Syed, X. Niu, N. El-Sheimy, *The University of Calgary, Canada*----- 523

## **C1: Algorithms and Methods 2**

**Single-site Carrier Phase Based Troposphere Integrity Monitoring**  
Y. Zhang, C. Bartone, *Ohio University* ----- 530

**Analysis of Aircraft Longitudinal Long-Period Oscillation by Hilbert-Huang Transform**  
W-J. Ma, *National Taiwan University, Taiwan*; W. Tang, *Ching Yun University, Taiwan*; F-R. Chang, *National Taiwan University, Taiwan* ----- 543

**3dM — A GPS Receiver Antenna Site Evaluation Tool**  
G.J. Rigden, J.R. Elliott, *Electro Magnetic Applications, Inc.* ----- 554

**UNB Neutral Atmosphere Models: Development and Performance**  
R. Leandro, M. Santos, R. Langley, *University of New Brunswick, Canada*----- 564

**A New Improved RAIM Method Based on the Optimally Weighted Average Solution (OWAS) Under the Assumption of a Single Fault**  
Y.C. Lee, *The MITRE Corporation* ----- 574

## **C2: Emerging Navigation Technologies**

**Two-Dimensional Stochastic Projections for Tight Integration of Optical and Inertial Sensors for Navigation**  
M. Veth, J. Raquet, *Air Force Institute of Technology*----- 587

**Seamless and Reliable Personal Navigator**  
D.A. Grejner-Brzezinska, C.K. Toth, Y. Jwa, S. Moafipoor, *The Ohio State University*;  
J. Kwon, *University of Seoul, South Korea*----- 597

**Application of Fast Orthogonal Search Techniques for Accuracy Enhancement of Inertial Sensors for Land Vehicle Navigation**  
J. Armstrong, A. Noureldin, D. McGaughey, *Royal Military College of Canada* ----- 604

**Performance Analysis of an Integrated GPS/LORAN-C Tracking System**  
J. Carroll, *U.S. DOT Volpe National Transportation Systems Center*----- 615

**Position and Attitude Sensing by Directional Triangulation**  
P. Bierre, *Cartesia*----- 629

<b>Performance of TOA and TDOA in a Non-homogeneous Transmitter Network Combining GPS and Terrestrial Signals</b>	
J-Y. Do, M. Rabinowitz, P. Enge, <i>Stanford University</i> -----	642

<b>Small, Low-Power, Low-Cost IMU for Personal Navigation and Stabilization Systems</b>	
V.A. Kozlov, V.M. Agafonov, J. Bindler, <i>MET Tech, Inc.</i> -----	650

<b>Adaptive Hybrid Standard/Unscented Kalman Filtering Mechanization for GPS/MEMS IMU Integration</b>	
D. An, D. Liccardo, J. Rios, <i>Crossbow Technology, Inc.</i> -----	656

### **C3: GPS Modernization, Galileo and QZSS**

<b>Accuracy and Monitoring Improvements From the GPS Legacy Accuracy Improvement Initiative</b>	
T. Creel, <i>National Geospatial-Intelligence Agency</i> ; A.J. Dorsey, <i>Lockheed-Martin</i> ; P.J. Mendicki, <i>Aerospace Corporation</i> ; J. Little, R.G. Mach, B.A. Renfro, <i>The University of Texas at Austin</i> -----	664

<b>L1C Signal Design Options</b>	
J. Betz, <i>The MITRE Corporation</i> ; C.R.Cahn, <i>Independent Consultant</i> ; P.A. Dafesh, <i>The Aerospace Corporation</i> ; C.J. Hegarty, <i>The MITRE Corporation</i> ; K.W. Hudnut, <i>U.S. Geological Survey</i> ; A.J. Jones, <i>U.S. Air Force, GPS NAVSTAR Joint Program Office</i> ; R. Keegan, <i>Independent Consultant</i> ; K. Kovach, <i>ARINC Engineering Services</i> ; L.S. Lenahan, <i>U.S. Air Force, GPS NAVSTAR Joint Program Office</i> ; H.H. Ma, J.J. Rushanan, <i>The MITRE Corporation</i> ; T.A. Stansell, <i>Stansell Consulting</i> ; C.C. Wang, <i>The Aerospace Corporation</i> ; S.K. Yi, <i>ARINC Engineering Services</i> -----	685

<b>Phase Noise in GNSS Transmission/Reception System</b>	
E. Rebeyrol, <i>ENAC/TeSA, France</i> ; C. Macabiau, <i>ENAC, France</i> ; L. Ries, J-L. Issler, <i>CNES, France</i> ; M. Bousquet, <i>Supaero, France</i> ; M-L. Boucheret, <i>Enseeiht, France</i> -----	698

<b>Impact of SISMA Computation Algorithm on User Integrity Performance</b>	
P. Paimblanc, C. Macabiau, <i>ENAC, France</i> ; B. Lobert, M. Van Den Bossche, <i>Alcatel Space, France</i> -----	709

<b>Optimal and Near-optimal Detectors for Acquisition of the GPS L5 Signal</b>	
C.J. Hegarty, <i>The MITRE Corporation</i> -----	717

### **C4: Augmentation Systems: GBAS and SBAS 2**

<b>Preparation for GBAS at Braunschweig Research Airport — First Flight Test Results</b>	
P. Hecker, P. Schachtebeck, T. Feuerle, U. Bestmann, <i>Institute of Flight Guidance, Germany</i> ; C. Butzmuehlen, <i>IntegNav GmbH, Germany</i> -----	726

<b>Evaluation of Two Types of Dual-Frequency Differential GPS Techniques Under Anomalous Ionosphere Conditions</b>	
H. Konno, S. Pullen, J. Rife, P. Enge, <i>Stanford University</i>	735
<b>Field Data Analysis for a Range-Based Local Airport Monitor for WAAS</b>	
J. Seo, J. Rife, S. Pullen, T. Walter, P. Enge, <i>Stanford University</i>	748
<b>GNSS Availability Analysis in Taiwan — a Markov Model Approach</b>	
H-S. Wang, <i>National Taiwan Ocean University, Taiwan</i> ; P-C. Hsiao, <i>Industrial Technology Research Institute</i>	759

## **D1: Autonomous Vehicle Navigation**

<b>Passive Navigation Using Local Magnetic Field Variations</b>	
J.M. Wilson, R.J. Kline-Schoder, M.A. Kenton, P.H. Sorensen, O.H. Clavier, <i>Creare, Inc.</i>	770
<b>Development of Precise GPS/INS/Wheel Speed Sensor/Yaw Rate Sensor Integrated Vehicular Positioning System</b>	
J. Gao, M.G. Petovello, M.E. Cannon, <i>The University of Calgary, Canada</i>	780
<b>The Physical Attributes of Autonomous GPS Mobile Navigation</b>	
M.E. Elder, <i>Raytheon Company</i>	793
<b>How Can the Effects of Reflected GPS Multipath Signals be Eliminated on an Autonomous Mobile Vehicle?</b>	
S. Elder, <i>Chino Hills High School</i> ; M. Elder, <i>NorthCentral University</i>	798
<b>An Autonomous Robotic Pseudolite Navigation System</b>	
R. Robles, J. Betz, J. Schupp, J. Leal, M.J. Brown, I.F. Progni, <i>California State Polytechnic University</i>	803
<b>Intelligence Vehicle-Base Station Navigation System "VSB/BSV"</b>	
C. Peng, <i>Florida Institute of Technology</i>	813

## **D2: Carrier-Phase Positioning**

<b>RTOD: A Real-time Precise Orbit &amp; Clock Determination System</b>	
D. Price, A. Batchelor, <i>Thales Research &amp; Technology (UK) Ltd., U.K.</i> ; P. Toor, <i>Thales Positioning Limited, U.K.</i>	825
<b>Analyzing the Impacts of Galileo and Modernized GPS on Precise Point Positioning</b>	
X. Shen, <i>University of Calgary/Challenger Geomatics Ltd., Canada</i> ; Y. Gao, <i>University of Calgary, Canada</i>	837
<b>Self-Differential GPS-What Are the Limits?</b>	
E.M. Somerville, J.F. Raquet, <i>Air Force Institute of Technology</i>	847

<b>GPS and Galileo Performance Evaluations for Multiple Reference Network Real-Time Positioning</b>	
S. Phalke, M.E. Cannon, <i>The University of Calgary, Canada</i> -----	858
<b>Performance Improvement of Network RTK Positioning</b>	
I. Geisler, Leica Geosystems AG, Switzerland-----	869
<b>Rover Processing with Network RTK and Quality Indicators</b>	
P. Alves, H. Kotthoff, I. Geisler, O. Zelzer, H.-J. Euler, Leica Geosystems AG, Switzerland-----	881
<b>D3: Receiver and Antenna Technologies</b>	
<b>A Fast Time-recursive Matched Filter for DS-SS Communications</b>	
D. Akopian, S. Aghaian, <i>The University of Texas at San Antonio</i> ; H. Valio, <i>Nokia Corporation</i> -----	890
<b>A New Technology for GNSS Signal Fast Acquisition Within Three Seconds: Applicable to Current GNSS Receivers</b>	
H. Jun, C. Kee, <i>Seoul National University, South Korea</i> -----	895
<b>Fine Frequency Estimation in Weak Signals for GPS Receivers</b>	
P.K. Sagiraju, D. Akopian, <i>The University of Texas at San Antonio</i> ; H. Valio, <i>Nokia Corporation, Finland</i> -----	908
<b>Code Tracking Errors for Double Delta Discriminators with Narrow Correlator Spacings and Bandlimited Receivers</b>	
T.N. Morrissey, <i>Zeta Associates, Inc.</i> ; K.W. Shallberg, <i>GREI</i> ; B. Townsend, <i>Roberton Enterprises Ltd.</i> -----	914
<b>Implementation and Testing of a Real-Time Software-Based GPS Receiver for x86 Processors</b>	
S. Charkhandeh, M.G. Petovello, R. Watson, G. Lachapelle, <i>The University of Calgary, Canada</i> -----	927
<b>Comparative Analysis Via Simulation of Two Null-Steering Approaches for the Multipath Limiting Antenna for LAAS</b>	
M.S. Sharawi, D.N. Aloii, <i>Oakland University</i> -----	935
<b>Performance of a GPS Receiver in the Presence of Clock Jitter</b>	
S. Nadig, A. Raghupathy, <i>Texas Instruments, India</i> -----	949
<b>Performance Bounds for Carrier-to-Noise Ratio Estimation in GPS Receivers</b>	
K. Ramasubramanian, S. Nadig, <i>Texas Instruments, India</i> -----	953

## E1: Integrated Multi-sensor Navigation & Guidance Systems

- Low-cost Tightly Coupled GPS/INS Integration Based on a Nonlinear Kalman Filtering Design**  
Y. Li, J. Wang, C. Rizos, P. Mumford, W. Ding, *University of New South Wales, Australia* ----- 958
- ASF Effect Analysis Using an Integrated GPS/eLORAN Positioning System**  
N. Luo, G. Mao, G. Lachapelle, M.E. Cannon, *University of Calgary, Canada*----- 967
- Performance Comparison of the Nonlinear Bayesian Filters Supporting GPS/INS Integration**  
Y. Yi, D.A. Grejner-Brzezinska, *The Ohio State University* ----- 977
- Kalman Filter Design Strategies for Code Tracking Loop in Ultra-Tight GPS/INS/PL Integration**  
D. Li, J. Wang, *The University of New South Wales, Australia* ----- 984
- INS/GPS Sensitivity Analysis Using Different Kalman Filter Approaches**  
S. Nassar, X. Niu, P. Aggarwal, N. El-Sheimy, *The University of Calgary, Canada* ----- 993
- The Effect of the Incorrect Covariances of the Measurement Noises in SDINS**  
J. Seo, J.G. Lee, C.G. Park, *Seoul National University, South Korea*-----1002
- Driver Assistance And Awareness Applications Using Navigation System and Map Database**  
F. Ibrahim, *Visteon Corporation*-----1012
- Stochastic Characteristics of Temperature-Dependent MEMS-based Inertial Sensor Error**  
M. El-Diasty, *York University, Canada*; A. El-Rabbany, *Ryerson University, Canada*; S. Pagiatakis, *York University, Canada* -----1017

## E2: Weather Monitoring

- Analysis of Mid-Latitude Space Weather Events and Their User Impacts**  
A. Coster, *MIT Haystack Observatory*; S. Skone, *University of Calgary, Canada*;  
B. Taylor, *University of Texas*; M. Colerico, *MIT Haystack Observatory* -----1028
- The GPS Segment of the AFRL-SCINDA Global Network and the Challenges of Real-Time TEC Estimation in the Equatorial Ionosphere**  
C.S. Carrano, *AER/Radex, Inc.*; K.M. Groves, *Air Force Research Laboratory* -----1036

## **E3: Military Systems Applications**

### **An Improved GPS Sensor Technology — Fast Acquisition and Sub-meter Precision at High Dynamics**

D.G. Powell, *TM Tech Inc.*; A.R. Pratt, *QinetiQ Ltd.*; J.H. Merts,  
*46th Test Wing Eglin A*-----1048

### **G-STAR™ GPS Anti-Jam Technology**

P. Siu, C. Apker, J. McMillen, S. Sorber, *Lockheed Martin System Integration*-----1057

### **Navigation Bias Shifts Due to GPS Constellation Changes**

F.S.G. Von Zuben, C.T. Marlow, *Lockheed Martin Aeronautics Company* -----1064

### **A Low Cost, Single GPS Frequency (L1), MEMS Based, Attitude and Positioning Determination System For Weapon Testing**

H. Baker, S. Goodrich, *46th Test Wing, Eglin Air Force Base* -----1068

### **A C-CDMA Transmitter Design**

D. Abdel-Masih, P. Cam, M. Hernandez, A. Bawany, R. Madrid, I.F. Proгри,  
R. Cockrum, *California State Polytechnic University Pomona* -----1081

## **E4: Rapid Geointelligence Acquisition From Airborne Platforms (Co-sponsored by ISPRS WG 1/2 “SAR and LIDAR Systems”)**

### **Performance Evaluation of Optech's ALTM 3100: Study on Geo-referencing Accuracy**

R.V. Ussyshkin, B. Smith, A. Fidera, *Optech Inc., Canada*-----1089

### **An Evaluation of INU and DGPS Measurement Fusion for Single Pass and Repeat Pass Interferometric Mapping Radars**

R. Muellerschoen, S. Hensley, *Jet Propulsion Laboratory  
California Institute of Technology*-----1094

### **Important Aspects of Direct Navigation-Based Georeferencing of Imaging Sensors on the Mapping Processes**

C. Toth, D.A. Grejner-Brzezinska, *The Ohio State University*-----1105
