

ION GNSS 2008 Meeting Proceedings

Table of Contents

How To Use This Index: Scroll down or use the bookmarks in the left-hand frame to move to a new location in this index. (A **red paper title** indicates a student paper sponsored by the ION Satellite Division. A yellow highlighted paper title indicates an **Award for Best Paper Presentation of Session**.)

Viewing of the text and graphics and the ease of readability will depend on the quality and/or consistency of the author original file.

PLENARY SESSION

GPS and GNSS in the Future PNT Environment

The Honorable John G. Grimes, *Assistant Secretary of Defense for Networks and Information Integration and Department of Defense Chief Information Officer* ----- 1

GLONASS in a Multi-GNSS World

Mr. Yury Nosenko, *Deputy Head of the Federal Space Agency, Russia* ----- 7

European GNSS Programmes and the Future of GNSS

Mr. Paul Verchoef, *European Commission, Belgium* ----- 20

A1: GNSS-Inertial Navigation Systems 1

Reduced Inertial Sensor System (RISS)/GPS Integration using Particle Filtering for Land Vehicles

J. Georgy, U. Iqbal, M. Bayoumi, *Queen's University, Canada*; A. Noureldin, *Royal Military College/Queen's University, Canada* ----- 30

On-line Tuning of an Extended Kalman Filter for INS/GPS Navigation Applications

C. Goodall, N. El-Sheimy, Z. Syed, *The University of Calgary, Canada* ----- 38

Flight Testing and Data Evaluation of MEMS INS/GPS Hybridisation Filters - First Results

M. Steen, P.M. Schachtebeck, R. Plate, P. Hecker, *Institute of Flight Guidance, (IFF), Germany*; S. Monrocq, *Thales Avionics, France* ----- 48

Development of a Frequency Response INS/GPS System Model Based on LSSA for Bridging GPS Outage

M. El-Diasty, S. Pagiatakis, *York University, Canada* ----- 57

Cycle Slip Detection and Fixing by MEMS IMU/GPS Integration for Mobile Environment RTK-GPS

T. Takasu, A. Yasuda, *Tokyo University of Marine Science and Technology, Japan* ----- 64

Performance Improvement of Integrated MEMS/GNSS Systems

J-R. De Boer, V. Calmettes, J-Y. Tournet, *Université de Toulouse, France*; B. Lesot, *Thales Avionics, France* ----- 72

Novel Positioning Algorithms for RFID Assisted 2D MEMS INS Systems

M. Zhu, *School of Mathematical and Geospatial Sciences, RMIT University, Australia* ----- 80

Host-based Tight-integration of MEMS Dead-Reckoning and GPS

R. Zanutta, F. van Diggelen, *Broadcom Corporation* ----- 88

B1: Integrity Multi-constellation RAIM

Enhancements of the Range Consensus Algorithm (RANCO)

G. Schroth, M. Rippl, *German Aerospace Center, Germany*; A. Ene, J. Blanch, *Stanford University*; B. Belabbas, *German Aerospace Center, Germany*; T. Walter, P. Enge, *Stanford University*; M. Meurer, *German Aerospace Center, Germany* ----- 93

Influence of GNSS Integrity Monitoring on Single and Multiple Fault Event Probabilities

J. Rife, *Tufts University* ----- 104

A Sensitivity-based Method for Fault Detection and Identification

Y. Wu, *Wuhan University, China*; J. Wang, *University of New South Wales, Australia* ----- 116

Multi-Constellation RAIM for Simultaneous Double-Fault Satellite Scenarios

Z. Miaoyan, Z. Jun, Q. Yong, *Beihang University, China* ----- 123

Evaluation of Multi-system Integrity Algorithm

P.F. Silva, *DEIMOS, Portugal*; M. Marcote, N. Schaeffer, *DEIMOS, Spain*; J.F.M. Lorga, *DEIMOS, Portugal*; A. Fernández, *DEIMOS, Spain* ----- 132

RAIM Performance in the Post SA Era:

T. Murphy, M. Harris, *Boeing Commercial Airplanes* ----- 139

A New Method for Detection, Identification and Mitigation of Outliers in Receiver Autonomous Integrity Monitoring (RAIM)

H. Isshiki, *School of Naval Architecture and Ocean Engineering, University of Ulsan, South Korea* 151

C1: GNSS Receiver Algorithms

Signal Compression for an Efficient and Simplified GNSS Signal Parallel Acquisition

M. Fantino, M. Pini, P. Mulassano, *Istituto Superiore Mario Boella, Italy*; G. Girau, M. Nicola, A. Nordio, *Politecnico di Torino, Italy* ----- 159

Direct P(Y)/M-code Acquisition Based on Time-Frequency Folding Technique	
H. Li, M. Lu, Z. Feng, <i>Dept. of Electronic Engineering, Tsinghua University, China</i>	----- 167
Reduced Complexity Circuits for Serial Code Phase Search Acquisition	
G. Girau, L. Lo Presti, <i>Politecnico di Torino, Italy</i> ; M. Fantino, <i>Istituto Superiore Mario Boella, Italy</i>	----- 174
Bayesian Direct Position Estimation	
P. Closas, <i>Technical University of Catalunya, Spain</i> ; C. Fernández-Prades, <i>Centre Tecnologic de Telecomunicacions de Catalunya, Spain</i> ; D. Bernal, J.A. Fernández-Rubio, <i>Technical University of Catalunya, Spain</i>	----- 183
Noise Floor Independent Delay Lock Loop Discriminator	
G. Xie, X. Yuan, <i>SiRF Technology, Inc.</i>	----- 191
GNSS Receiver with Vector Based FLL-Assisted PLL Carrier Tracking Loop	
S. Kiesel, C. Ascher, D. Gramm, G.F. Trommer, <i>University of Karlsruhe, Germany</i>	----- 197
HOTSTART EVERY TIME - Compute the Ephemeris on the Mobile	
P.G. Mattos, <i>STMicroelectronics R&D Ltd., UK</i>	----- 204
A Dynamic Satellite Search Scheduling for GNSS Super Constellation	
K-T. Chen, <i>MediaTek Inc., Taiwan</i>	----- 112
Pull-out Probability and Tracking Threshold Analysis for High Dynamics GNSS Carrier Loops	
P.A. Roncagliolo, J.G. García, C.H. Muravchik, <i>Universidad Nacional de La Plata, Argentina</i>	----- 221
Block Correlator for Tracking GPS/GNSS Signals	
P.K. Sagiraju, P. Kashyap, D. Akopian, <i>The University of Texas at San Antonio</i>	----- 229
Filtering IF Samples to Reduce the Computational Load of Frequency Domain Acquisition in GNSS Receivers	
S.U. Qaisar, N.C. Shivaramaiah, A.G. Dempster, C. Rizos, <i>University of New South Wales, Australia</i>	----- 236
D1: Atmospheric Effects on GNSS 1	
The Study of Typhoon Path in Taiwan Region using Precise Point Positioning Technique	
W-C. Peng, Y-H. Lee, K-W. Chiang, M. Yang, <i>National Cheng Kung University, Taiwan</i>	----- 244
Troposphere Modeling for Precise GPS Rapid Static Positioning in Mountainous Areas	
P. Wielgosz, S. Cellmer, Z. Rzepecka, <i>University of Warmia and Mazury, Poland</i> ; D.A. Grejner-Brzezinska, <i>The Ohio State University</i>	----- 253
Estimation of Troposphere Decorrelation Using the Combined Zenith-dependent Parameter	
Y-W. Ahn, D. Kim, P. Dare, <i>University of New Brunswick, Canada</i> ; J. Park, <i>Korea Astronomy and Space Science Institute, South Korea</i>	----- 261
Assessing Space-based GNSS Technology for Meteorological Studies in Australia	
E. Fu, <i>Surveying Positioning and Navigation Research Group, RMIT University, Australia</i>	----- 271

Real-Time Detection of Ionospheric Scintillations and Potential Applications
I. Rodríguez, C. Hernández, A. Curiel, C. Catalán, L. Fernández, E. Sardón, *GMV, Spain* -----277

Diffraction Tomography of the Disturbed Ionosphere Based on GPS Scintillation Data
M.L. Psiaki, *Cornell University*; G.S. Bust, *ASTRA*; A.P. Cerruti, P.M. Kintner, Jr., S.P. Powell, *Cornell University* -----289

Evaluating GPS Receiver Robustness to Ionospheric Scintillation
J.C. Hinks, *Cornell University*; T.E. Humphreys, *Coherent Navigation*; B. O'Hanlon, M.L. Psiaki, P.M. Kintner, Jr., *Cornell University* -----309

The MIM-Principle Where GNSS and Radio Astronomy Collide
E. Noordam, *Netherlands Defense Academy, The Netherlands* -----321

F1: Network-Based RTK

Real-Time, Wide-Area, Precise Kinematic Positioning Using Data from Internet NTRIP Streams
O.L. Colombo, *UMBC-GEST/NASA Goddard Space Flight Center* -----327

Incorporation of Network Information in Multiple GNSS Processing Environment
H-J. Euler, *inPosition GmbH, Switzerland*; J. Wirth, *HSR Hochschule fuer Technik, Switzerland* ----338

The Relationship Between Network RTK Solutions MAC, VRSTM, PRS, FKP and i-MAX
F. Takac, O. Zelzer, *Leica Geosystems AG, Switzerland* -----348

User Terminal/Local Element System for Network Based Positioning using RTK/EGNOS in Urban Environment
A. Defina, K. Charqane, F. Dominici, G. Marucco, *Istituto Superiore Mario Boella, Italy*; C. Porporato, M. De Agostino, A.M. Manzano, *(LEGEND) Politecnico di Torino, Italy* -----356

Transferring Ambiguity Levels Between Network Corrections
P. Alves, P.M. Grgich, *Leica Geosystems AG, Switzerland* -----368

Algorithms to Calibrate and Compensate for GLONASS Biases in GNSS RTK Receivers Working with 3rd Party Networks
A. Boriskin, G. Zyryanov, *MagellanGPS, Russia* -----376

Toward the Ultimate RTK: The Last Challenges in Long-Range Real-Time Kinematic Applications
D. Kim, R.B. Langley, *University of New Brunswick, Canada* -----385

Precise Point Positioning with Ambiguity Resolution in Real-Time
L. Mervart, Z. Lukes, C. Rocken, T. Iwabuchi, *GPS Solutions Inc.* -----397

Investigating the Impact of the Commercial GSM/GPRS Communications on the Availability of the Network Based RTK GNSS Service

J. Aponte, X. Meng, T. Moore, C. Hill, *The University of Nottingham, UK*; M. Burbidge, *Leica Geosystems Ltd., UK* -----406

Panel Discussion: Program Updates 1: Global and Regional Systems

GPS Program Update

D.W. Madden, *Global Systems Wing, USAF* -----412

GLONASS Status and Progress

S. Revnivikh, *Central Research Institute of Machine Building and Head of PNT Information Analysis Center, Federal Space Agency, Russia* -----431

Galileo Programme Status

M. Falcone, *European Space Agency, France* -----453

Quasi-Zenith Satellite System (QZSS) Program Update

K. Terada, *Japan Aerospace Exploration Agency, Japan* -----493

A2a: Multi-sensor Navigation, Guidance and Control Systems

Modeling and Analysis of Measurement Time Synchronization Error in Transfer Alignment

C-J. Kim, H-S. Kim, H-W. Park, *Agency for Defense Development, South Korea* -----528

Wireless Localization and Navigation with the Signal of Opportunity by Exploiting Doppler Frequency

S.K. Balaga, H. Xu, L. Yang, *University of Florida* -----537

A Model-Aided AHRS for Micro Aerial Vehicle Application

N. Dadkhah, B. Mettler, D. Gebre-Egziabher, *University of Minnesota, Twin Cities* -----545

Rapid Initialization of SINS for Land Vehicle-based Vertically-launched Missiles

Z. Xu, *Southeast University, Nanjing, China/University of New South Wales, Australia*; Y. Li, C. Rizos, *University of New South Wales, Australia*; X. Xu, *Southeast University, China* -----554

A2b: Timing and Scientific Applications

Precise Time Transfer and Ranging Experiment using ETS-VIII Satellite

Y. Takahashi, F. Nakagawa, H. Kunimori, J. Amagai, S. Tsuchiya, R. Tabuchi, S. Hama, *National Institute of Information and Communications Technology, Japan*; H. Noda, *Japan Aerospace Exploration Agency, Japan* -----560

Ultra-stable Oscillators: Limits of GNSS Coherent Integration

P.O. Gaggero, *University of Neuchatel, Switzerland*; D. Borio, *University of Calgary, Canada* -----565

A Picosecond Accuracy Timing System Based on L1-only GNSS Receivers for a Large Aperture Array Radar

G. Stenberg, T. Lindgren, J. Johansson, *Luleå University of Technology, Sweden* -----576

Real-time Clock Estimation for Precise Orbit Determination of LEO-Satellites	
A. Hauschild, O. Montenbruck, <i>DLR, German Space Operations Center, Germany</i>	----- 581
Precise Timing using a High Sensitivity Receiver in Indoor Environments	
E. Anyaegbu, J.P. Bickerstaff, P. Fleming, G. Whitworth, <i>ST-NXP Semiconductors GPS UK Ltd., UK</i>	590

C2: Multipath

Differences in Multipath Propagation Between Urban and Suburban Environments	
A. Steingass, A. Lehner, <i>German Aerospace Center (DLR), Germany</i>	----- 602

Impact of Near-Field Effects on the GNSS Position Solution	
F. Dilssner, <i>Logica, Germany</i> ; G. Seeber, <i>Universität Hannover, Germany</i> ; G. Wübbena, M. Schmitz, <i>Geo++[®], Germany</i>	----- 612

A New Wavelet-Based Multipath Mitigation Technique	
M. Elhabiby, A. Elghazouly, N. El-Sheimy, <i>The University of Calgary, Canada</i>	----- 625

Performance of GNSS Time of Arrival Estimation Techniques in Multipath Environments	
A. Broumandan, T. Lin, <i>University of Calgary, Canada</i>	----- 632

Particle Filtering Strategies for Efficient Multipath Mitigation	
P. Closas, <i>Technical University of Catalunya, Spain</i> ; C. Fernández-Prades, <i>Centre Tecnologic de Telecomunicacions de Catalunya, Spain</i> ; J. A. Fernández-Rubio, D. Bernal, <i>Technical University of Catalunya, Spain</i>	----- 644

BOC/MBOC Multicorrelator Receiver with Least-Squares Multipath Mitigation Technique	
F.D. Nunes, <i>Instituto de Telecomunicações and IST, Portugal</i> ; F.M.G. Sousa, <i>Instituto de Telecomunicações and ISEL, Portugal</i> ; J.M.N. Leitão, <i>Instituto de Telecomunicações and IST, Portugal</i>	----- 652

Demonstration of Synthetic Phased Array Antenna for Carrier/Code Multipath Mitigation	
T. Pany, B. Eissfeller, <i>University FAF Munich, Germany</i>	----- 663

Analysis of Early Late Phase for Multipath Mitigation	
O.M. Mubarak, <i>The University of New South Wales, Australia</i>	----- 669

A Geometrical Approach for Maximum Likelihood Estimation of Multipath	
N. Blanco-Delgado, F.D. Nunes, J.M. Xavier, <i>Instituto Superior Tecnico, Portugal</i>	----- 679

GPS Multipath Parameterization using the Extended Kalman Filter and a Dual LHCP/RHCP Antenna	
A. Izadpanah, C. O'Driscoll, G. Lachapelle, <i>University of Calgary, Canada</i>	----- 689

D2: Space and Satellite Applications

A Demonstration of L2C Tracking from Space for Atmospheric Occultations	
--	--

T.K. Meehan, C. Ao, B. Iijima, D. Robison, *Jet Propulsion Laboratory*; D. Hunt, C. Rocken, B. Schreiner, S. Sokolovskiy, *University Corporation for Atmospheric Research* ----- 698

MMS-IRAS TRL-6 Testing

G.W. Heckler, L.B. Winternitz, *Goddard Space Flight Center*; W.A. Bamford, *Emergent Space Technologies* ----- 702

Next Space-VLBI Mission, VSOP-2, and the Precise Orbit Determination with GNSS Navigation and SLR

Y. Asaki, H. Takeuchi, M. Yoshikawa, *Institute of Space and Astronautical Science, Japan* ----- 710

Lessons Learned from the use of GPS in Space; Application to the Orbital use of GALILEO

J-L. Issler, A. de Latour, L. Ries, L. Lestarquit, M. Grondin, J. Dantepal, *CNES, France* ----- 719

First Spaceborne Demonstration of Galileo Signals for GNSS Reflectometry

P.J. Jales, R.M. Weiler, C. Underwood, *Surrey Space Centre, UK*; M. Unwin, *Surrey Satellite Technology Ltd, UK* ----- 736

Integer Ambiguity Free Attitude Determination from GNSS Carrier Phase Double Differences by Means of a Hyper-Dome Quaternion Search Grid

R.V.F. Lopes, A.R. da Silva, H.K. Kuga, *Instituto Nacional de Pesquisas Espaciais, Brazil* ----- 746

Zero-difference Ambiguity Fixing for Spaceborne GPS Receivers

D. Laurichesse, F. Mercier, J.P. Berthias, P. Broca, L. Cerri, *Centre National d'Etudes Spatiales, France* ----- 758

Test Results from a Precise Positioning and Attitude Determination System for Microsatellites using a Software-Defined Radio

Alison Brown, P. Brown, B. Mathews, *NAVSYS Corporation* ----- 769

Nonlinear Fixed-Point Smoothers and their Application for GPS Orbit Determination

C. Yang, *Sigtem Technology, Inc.*; T. Nguyen, M. Miller, *Air Force Research Laboratory* ----- 775

Improved Orbit Estimation using GPS Measurements for Conjunction Analysis

A.R. Muldoon, G.H. Elkaim, *University of California Santa Cruz* ----- 786

Cost Effective & Innovative Approach to Recover from Data Corruptions Due to Radiation Effects in GPS Receivers in Leo-Orbits

G. Vyasraj, B.N. Raghothama, J.K. Ray, *Accord Software & Systems Pvt. Ltd., India* ----- 795

E2: Novel Applications

Development and Field-Testing of a GPS-Based Mountain Pass Road Opening Driver Assistance System

K.S. Yen, M.T. Darter, T.A. Lasky, B. Ravani, *University of California – Davis* ----- 802

Navigation and Sensor Integration in an Autonomous Lawnmower

A. Webb, B. Birkmire, J. Baugher, K.S. Rattan, S. Thomas, J. Gallagher, *Wright State University* ---- 813

Mini-Urban Challenge
C.C. Miller, C.A. New, *Air Force Research Laboratory* ----- 819

Adaptive Sensing for Improving Detection of Unexploded Ordnances with a Sigma-Point Information Filter
A.Y. Chen, *Stanford University* ----- 826

Mitigating Geomagnetic Noise in Airborne Magnetic Surveys using GPS
S. Skone, *University of Calgary, Canada* ----- 837

A New GPS-Enhanced High Resolution Weather Service
T. Iwabuchi, C. Rocken, *GPS Solutions Inc.* ----- 843

An Energy Scavenging and Autonomous Surface Vehicle for Littoral Surveillance
G.H. Elkaim, *University of California, Santa Cruz*; C.O. Lee Boyce, *Stanford University* ----- 852

Cooperative LBS for Secure Transport System
A. Tomatis, P. Cataldi, *Politecnico di Torino, Italy*; G. Pau, *University of California, Los Angeles*; P. Mulassano, *Istituto Superiore Mario Boella, Italy*; F. DAVIS, *Politecnico di Torino, Italy* ----- 861

Micro-Navigation Satellite Network Design and Analysis
B. Kang, J-H. Lee, C-H. Won, *Electrical and Computer Engineering, Temple University* ----- 867

F2: Galileo Signal Structure, GPS/Galileo Interoperability

A Triple Estimating Receiver of Multiplexed Binary Offset Carrier(MBOC) Modulated Signals
M.S. Hodgart, R.M. Weiler, *University of Surrey, UK*; M. Unwin, *Surrey Satellite Technology Ltd., UK* ----- 877

Revised PRN Code Structures for Galileo E1 OS
S. Wallner, J.A. Avila-Rodriguez, J-H. Won, G. Hein, *University FAF Munich, Germany*; J-L. Issler, *CNES, France* ----- 887

An Interference Impact Assessment Model for GNSS Signals
B. Motella, *Istituto Superiore Mario Boella, Italy*; S. Savasta, D. Margaria, F. DAVIS, *Politecnico di Torino, Italy* ----- 900

GNSS Offline Signal Quality Assessment
M. Soellner, C. Kurzhals, G. Hechenblaikner, *EADS Astrium; Germany*; M. Rapisarda, T. Burger, *European Space Agency, The Netherlands*; S. Erker, J. Furthner, U. Grunert, *German Aerospace Center, DLR, Germany* ----- 909

Mitigating the Impact of GNSS Signals in the Radio Astronomy Band 1610.6-1613.8 MHz
O. Julien, *Ecole Nationale de l'Aviation Civile, France*; J-L. Issler, *Centre Nationale d'Etudes Spatiales, France* ----- 921

Interference Effects on Galileo E5b and E6 Frequencies Observed in the Galileo Test and Development Environment GATE

G. Heinrichs, E. Lohnert, B. Ott, E. Wittmann, <i>IFEN GmbH, Germany</i> -----	933
C-Band User Terminal Concepts and Acquisition Performance Analysis for European GNSS Evolution Programme	
J-H. Won, B. Eissfeller, B. Lankl, <i>University FAF Munich, Germany</i> ; A. Schmitz-Peiffer, <i>EADS-Astrium, Germany</i> ; E. Colzi, <i>ESA-ESTEC, Netherlands</i> -----	940
Galileo Signal Fading in an Indoor Environment	
A. Teuber, M. Paonni, V. Kropp, G.W. Hein, <i>University FAF Munich, Germany</i> -----	952
AltBOC for Dummies or Everything You Always Wanted To Know About AltBOC	
L. Lestarquit, G. Artaud, J-L Issler, <i>CNES, France</i> -----	961
GPS-GALILEO, Urban Interoperability Performance with the GPS-GALILEO Time Offset	
B. Bonhoure, I. Vanschoenbeek, M. Boschetti, J. Legenne, <i>CNES, France</i> -----	971
Consequences of MBOC Approximation by BOC Modulation	
F. Macchi, M.G. Petovello, G. Lachapelle, <i>University of Calgary, Alberta, Canada</i> -----	982
Panel Discussion: Program Updates 2: Assured Integrity Systems and Services	
Ground Based Augmentation System (GBAS) Local Area Augmentation System (LAAS) Program Status	
C. Rodriguez, <i>Federal Aviation Administration</i> -----	994
Wide Area Augmentation System (WAAS) Program Status	
D. Lawrence, <i>Federal Aviation Administration</i> -----	1009
Status of MSAS MTSAT Satellite-based Augmentation System	
H. Manabe, <i>Japan Civil Aviation Bureau, Japan</i> -----	1032
EGNOS Status Update	
D. Flament, <i>European Space Agency, France</i> ; C. Seynat, <i>European GNSS Supervisory Authority, Belgium</i> -----	1060
Recent Progress on Aviation Integrity	
Per Enge, <i>Stanford University</i> -----	1089
B3a: Aviation Applications	
EUROCONTROL Policy on GNSS	
F. Salabert, A. Hendriks, R. Rawlings, R. Farnworth, <i>EUROCONTROL, Belgium</i> -----	1109
Availability of GNSS Performance to Support ADS-B	
M. Harris, T. Murphy, <i>Boeing Commercial Airplanes</i> -----	1116

EGNOSATC: A Prototype for the Generation of NOTAM for European EGNOS Flight Procedures

M.D. Mota, J. Cegarra, D. Zapata, J.M. Bermúdez, *GMV, Spain*; E.J. González, *AENA, Spain* ----- 1124

Performance of a Doppler- Aided GPS Navigation System for Aviation Application under Ionospheric Scintillation

T-Y. Chiou, J. Seo, T. Walter, P. Enge, *Stanford University*----- 1139

Ionospheric Error Estimation in a Degraded Single Frequency Mode for Civil Aviation

C. Ouzeau, *ENAC/TéSA/ENAC/DTI, France*; C. Macabiau, *ENAC, France*; B. Roturier, *DSNA-DTI, France*; M. Mabilieu, *EGIS AVIA, France*; L. Azoulai, *Airbus, France*; J. Levan, F. Besse, *ENAC, France* ----- 1148

B3b: Unmanned Aerial Vehicles Applications

Near Real-Time Geo-Referenced UAV Imagery Collection and Web-Based Processing on a Server for Targeting and Mapping

Alison Brown, B. Bockius, D. Wetlesen, J. Dalrymple, *NAVSYS Corporation* ----- 1159

Estimating Angle of Attack and Sideslip Under High Dynamics on Small UAVs

J. Perry, A. Mohamed, B. Johnson, R. Lind, *University of Florida* ----- 1165

Fully Automatic Taxiing, Takeoff and Landing of a UAV Only with a Single-Antenna GPS Receiver

A. Cho, J. Kim, S. Lee, D. Kim, C. Kee, *Seoul National University, South Korea*; J.C. Doe, *GPS Systems* ----- 1174

Performance Evaluation of Low Cost Multi-Antenna GPS/INS for Small UAVs

H. Hirokawa, R. Ohata, *Mitsubishi Electric Corporation, Japan/Kamakura Works, Japan*; T. Suzuki, *Waseda University, Japan*; t. Ebinuma, *Tokyo University of Marine Science and Technology, Japan* 1182

C3: New Products Announcements

Smart Positioning with Fastrax's Software GPS Receiver Solution

S. Söderholm, T. Jokitalo, K. Kaisti, H. Kuusniemi, H. Naukkarinen, *Fastrax, Finland* ----- 1193

A Single Die GPS, with Indoor Sensitivity - The NXP GNS7560

T. Haddrell, J.P. Bickerstaff, *ST-NXP Wireless UK Ltd., UK*; M. Conta, *ST-NXP Wireless, USA* --- 1201

Achieving 30 cm Autonomous Positioning Accuracy with Nexteq Single-Frequency GPS Receivers

Y. Zhang, S. Lee, C. Chen, *Nexteq Navigation Corporation, Canada* ----- 1210

Galileo Receiver Testing with the GNSS Signal Generator NSG 5100

S. Martin, S. Diefenbach, D. Felbach, M. v. Voithenberg, *EADS Astrium Germany*; H. Dietz, R. Sasum, *EADS RST, Germany* ----- 1217

A Versatile Solution for Testing GPS/Inertial Navigation Systems

N. Fedora, *Spirent Federal Systems Inc.*; C. Ford, P. Boulton, *Spirent Communications plc, UK* --- 1227

Performance Evaluation of the Multi-Constellation and Multi-Frequency GNSS RF Navigation Constellation Simulator NavX[®]-NCS

G. Heinrichs, M. Irsigler, R. Wolf, *IFEN, GmbH, Germany*; G. Prokoph, *Work Microwave GmbH, Germany* ----- 1237

magicGNSS: Precise GNSS Products Out of the Box

R. Píriz, A. Mozo, P. Navarro, D. Rodríguez, *GMV, Spain* ----- 1242

Galileo Performance Analysis Software for Test User Receivers

S. Romero, J. Diez, A. Fernández, *DEIMOS Space, Spain*; A. Van den Berg, M. Simsky, K. Van Wassenhove, *Septentrio Satellite Navigation, Belgium*; R. Morgan-Owen, J.C. de Mateo, M. Hollreiser, *ESA, The Netherlands* ----- 1252

GPStream: A Low Bandwidth Architecture to Deliver or Autonomously Generate Predicted Ephemeris

E. Derbez, R. Lee, *RX Networks Inc., Canada* ----- 1258

Continuous GNSS Performance Monitoring, Prediction and Information Services via GalTeC

W. Ehret, H. Su, E. Kubitz, O. Glaser, *Thales, Germany*; E. Blomenhofer, *NavPos Systems, Germany* 1265

D3: Algorithms and Methods 1

New Approach for Integer Ambiguity Resolution using Interval Analysis

E. van Kampen, E. de Weerd, Q.P. Chu, J.A. Mulder, *Delft University of Technology, The Netherlands* 1278

Enhanced Integer Bootstrapping for Single Frequency GPS Attitude Determination

J.T. Pinchin, *University of Canterbury, New Zealand* ----- 1290

Optimization of Position Domain Relative RAIM

Y.C. Lee, *The MITRE Corporation/CAASD* ----- 1299

Precise Point Positioning with Ambiguity Resolution using the Decoupled Clock Model

P. Collins, F. Lahaye, P. Héroux, *Natural Resources Canada*; S. Bisnath, *York University, Canada* 1315

Optimising the Algorithm Design for High-integrity Relative Navigation using Carrier-phase Relative GPS Integrated with INS

P.D. Groves, C.R. Offer, C.J. Mather, G.W. Pulford, I.A. Ashokaraj, A.A. Macaulay, *QinetiQ, UK* 1323

New Approaches to IMU Modelling and INS/GPS Integration for UAV-based Earth-Observation

P. Molina, M. Wis, M.E. Parés, M. Blázquez, *University Politechnic of Catalunya, Spain*; J.C. Tatjer, *University of Barcelona, Spain*; I. Colomina, *University Politechnic of Catalunya, Spain* ----- 1335

INS/GPS Integration Using Gaussian Sum Particle Filter

Y. Kubo, *Ritsumeikan University Japan/ University of New South Wales, Australia*; J. Wang, *University of New South Wales, Australia* ----- 1345

A Robust Filtering Scheme for Attitude/Rate Estimation with GNSS Signals
J.G. García, P.A. Roncagliolo, C.H. Muravchik, *Universidad Nacional de La Plata, Argentina* ---- 1353

Integrity Monitoring of Carrier Phase Measurements using Particle Filtering
E. Lee, M.B. Heo, G.W. Nam, *Korea Aerospace Research Institute, South Korea*; Y.J. Lee, *Konkuk University, South Korea* ----- 1365

E3: Land Applications

Improving user Experience in Assisted Land Navigation using Sub-optimal Sensor Configuration Installed on a Cell Phone
G. Dutta, H. Mullur, J.C. Roh, S. Rao, S. Hosur, *Texas Instruments, India* ----- 1371

Twin IMU-HSGPS Integration for Pedestrian Navigation
J.B. Bancroft, G. Lachapelle, M.E. Cannon, M. Petovello, *University of Calgary, Canada* ----- 1377

GNSS Aided In Situ Human Lower Limb Kinematics During Running
S.P. Kwakkel, G. Lachapelle, M.E. Cannon, *University of Calgary, Canada* ----- 1388

A Solution for Combined GPS/GLONASS Navigation in Conditions of Limited Satellite Visibility
C-S. Cai, *University of Calgary, Canada* ----- 1398

Instantaneous RTK Positioning Based on User Velocity Measurements
N. Kubo, *Tokyo University of Marine Science and Technology, Japan*; S. Pullen, *Stanford University* 1406

A Hybrid System for Navigation in GPS-challenged Environments: Case Study
C. Rizos, *University of New South Wales, Australia*; D.A. Grejner-Brzezinska, C.K. Toth, *The Ohio State University*; A.G. Dempster, Y. Li, N. Politi, *University of New South Wales, Australia*; J. Barnes, *University of New South Wales, Australia / Locata Corp., Australia* ----- 1418

Precise Point Positioning with Single-Frequency Mass Market Receivers
A. Somieski, E. Favey, C. Bürgi, *u-blox AG, Switzerland* ----- 1429

The Usefulness of Internet-based (NTrip) RTK for Navigation and Intelligent Transportation Systems
M. Uradzinski, *University of Warmia and Mazury, Poland*; D. Kim, R.B. Langley, *University of New Brunswick, Canada* ----- 1437

A Zonal Regional Augmentation System Applying on Railway and Inland Waterway
W. Zhipeng, Z. Jun, L. Qiang, *School of Electronic Information Engineering, Beihang University, China* ----- 1446

Performance of Hourly Precise Point Positioning with Ambiguity Resolution
J. Geng, X. Meng, N. Teferle, A. Dodson, *IESSG, University of Nottingham, UK*; M. Ge, *Ge GFZ Potsdam, Germany*; C. Shi, J. Liu, *GNSS Center, Wuhan University, China* ----- 1455

Quality Assessment of DTM Generated from RTK GPS Data on Area with Various Sky Views
A.N. Matori, *Universiti Teknologi PETRONAS, Malaysia*; D. Atunggal SP, B.K. Cahyono,
Universiti Teknologi PETRONAS, Malaysia / Gadjah Mada University, Indonesia ----- 1462

F3: Galileo & GPS/Galileo Reference & User Receivers

GALANT - Architecture Design and First Results of A Novel Galileo Navigation Receiver Demonstrator With Array Antennas
M. Cuntz, H. Denks, A. Konovaltsev, A. Hornbostel, A. Dreher, M. Meurer, *German Aerospace Center (DLR), Germany* ----- 1470

Performance of an L1/E5 GNSS Receiver using a Direct Conversion Front-End Architecture
R.M. Weiler, *Surrey Space Centre, UK*; P. Blunt, *QinetiQ Ltd., UK*; P. Jales, *Surrey Space Centre, UK*;
M. Unwin, *Surrey Satellite Technology Ltd., UK*; S. Hodgart, *Surrey Space Centre, UK* ----- 1478

A New Unambiguous Tracking Technique for Sine-BOC(2n,n) Signals
Z. Yao, *Department of Electronic Engineering, Tsinghua University, China* ----- 1490

Exploiting the Secondary Codes to Improve Signal Acquisition Performance in Galileo Receivers
N.C. Shivaramaiah, A.G. Dempster, C. Rizos, *University of New South Wales, Australia* ----- 1497

A Novel Low-Complexity Acquisition Method for Next Generation GNSS Signals
P-H. Lee, D-H. Liu, *National Taiwan University, Taiwan*; W-L. Mao, *National Formosa University, Taiwan*;
H-W. Tsao, F-R. Chang, *National Taiwan University, Taiwan*; H-C. Yeh, K-T. Chen, *MediaTek Inc., Taiwan* ----- 1507

The IRGAL Project: Innovation and Research on Galileo in Piedmont
M. Pini, M. Fantino, P. Mulassano, *Istituto Superiore Mario Boella, Italy*; L. Lo Presti, *Politecnico di Torino, Italy*; L. Bragagnini, *Consorzio Torino Time, Italy* ----- 1514

Matched Filter MBOC Tracking by Accumulation
J. Diez, *DEIMOS Space, Spain*; J.S. Silva, *DEIMOS Engenharia, Portugal*; A. Fernández, *DEIMOS Space, Spain* ----- 1520

Multipath and Tracking Performance of Galileo Ranging Signals Transmitted by GIOVE-B
A. Simsky, D. Mertens, J-M. Sleewaegen, W. De Wilde, *Septentrio, Belgium*; M. Hollreiser, M. Crisci,
ESA/ESTEC, The Netherlands ----- 1525

Panel Discussion: Intellectual Property Issues in the Development and Use of GNSS and Services

Intellectual Property, Patents & Air Force Contracts
D.G. Ehrhart, *HQ AFMC/JA* ----- 1537

Impact of KSR v. Telefle on GPS Patents
J.M. Conlin, *Robins Kaplan, Miller & Ciresi L.L.P.*: ----- 1554

A4: Algorithms for Multi-sensor Fusion

An ANN Embedded POS Algorithm for a Low Cost MEMS INS/GPS Integrated System

H-W. Chang, C-Y. Li, *Department of Geomatics, National Cheng Kung University, Taiwan* ----- 1570

Land-Based Navigation Aiding by Fusion with Airborne Sensory Data

T. Hassan, N. El-Sheimy, *The University of Calgary, Canada* ----- 1582

GPS/INS Integrity Monitoring Using a Modified GPB1 Filter Bank

J. Wendel, *MBDA, Germany*; O. Meister, R. Moenikes, *University of Karlsruhe, Germany* ----- 1589

Robust Design for GNSS Integration

J.L. Farrell, *VIGIL, Inc.* ----- 1596

Hybrid Extended Particle Filter (HEPF) for INS/GPS Integrated System

P. Aggarwal, *University of Calgary, Canada* ----- 1600

Integrating GPS and Loran for Integrity in Safety of Life Applications

B.B Peterson, *Peterson Integrated Geopositioning*; S. Lo, L. Boyce, P. Enge, *Stanford University* 1619

Performance of a Low-cost Real-time Navigation System using Single-frequency GNSS Measurements Combined with Wheel-tick Data

Ch. Hollenstein, E. Favey, Ch. Schmid, A. Somieski, D. Ammann, *u-blox AG, Switzerland* ----- 1610

Incorporating Obstructions in GDOP Mapping Through the use of LiDAR Data

K. Amolins, *University of New Brunswick, Canada* ----- 1631

A New Method for Electronic Compass Magnetometer Calibration for Improving Azimuth Calculation in Magnetometer/GPS Integrated System

H. Guo, *Nanchang University, China*; D. Kim, R. Langley, *University of New Brunswick, Canada*; M. Yu, C. Zou, W. Huang, *Jiangxi Normal University, China* ----- 1641

B4: GPS & GLONASS Modernization, QZSS, and Other GNSS 1

The New L2C GPS Code: Signal and Positioning Quality Analysis

M. De Agostino, M. Piras, C. Porporato, *Politecnico di Torino, Italy* ----- 1649

Performance Evaluation of L2C Data/Pilot Combined Carrier Tracking

K. Muthuraman, *University of Calgary, Canada*; R. Klukas, *University of British Columbia Okanagan, Canada*; G. Lachapelle, *University of Calgary, Canada* ----- 1658

Evaluation of the New WAAS L5 Signal

H. Rho, R.B. Langley, *University of New Brunswick, Canada* ----- 1667

Investigation of Upload Anomalies Affecting IIR Satellites in October 2007

K. Kovach, J. Berg, V. Lin, *The Aerospace Corporation* ----- 1679

Evaluation of Compass Ambiguity Resolution Performance Using Geometric-Based Techniques with Comparison to GPS and Galileo
W. Cao, K. O'Keefe, M.E. Cannon, *University of Calgary, Canada* ----- 1688

Development of Ultimate Seamless Positioning System Based on QZSS IMES
D. Manandhar, K. Okano, M. Ishii, H. Torimoto, *GNSS Technologies Inc., Japan*; S. Kogure, *Japan Aerospace Exploration Agency, Japan*; H. Maeda, *Lighthouse Technology and Consulting, Japan* 1698

C-Band User Terminal Tracking Loop Stability Analysis for European GNSS Evolution Programme
J-H. Won, B. Eissfeller, *University FAF Munich, Germany*; A. Schmitz-Peiffer, *EADS-Astrium, Germany*; E. Colzi, *ESA-ESTEC, Netherlands* ----- 1706

Multichannel Dual Frequency GLONASS Software Receiver
S. Abbasian Nik, M.G. Petovello, *University of Calgary, Canada* ----- 1719

C4: Indoor Positioning

Comparison of Assisted and Stand-Alone Methods for Increasing Coherent Integration Time for Weak GPS Signal Tracking
P.L. Kazemi, C. O'Driscoll, *University of Calgary, Canada* ----- 1730

Differential Joint Data/Pilot Acquisition Strategies for Indoor Galileo E1 Signal
T.H. Ta, L. Lo Presti, F. Dovis, D. Margaria, R. Lesca, *Politecnico di Torino, Italy* ----- 1741

A New Statistical Model of the Indoor Propagation Channel for Satellite Navigation
M. Paonni, V. Kropp, A. Teuber, G.W. Hein, *University FAF Munich, Germany* ----- 1748

Combined L1 / L2C Tracking Scheme for Weak Signal Environments
C. Gernot, K. O'Keefe, G. Lachapelle, *University of Calgary, Canada* ----- 1758

Ubiquitous WiFi/GNSS Positioning System - TOA Based Distance Estimation
K. Bagdonas, K. Borre, *Aalborg University, Denmark* ----- 1773

DINGPOS: A Hybrid Indoor Navigation Platform for GPS and GALILEO
J.A. López-Salcedo, *Universitat Autònoma de Barcelona, Spain*; Y. Capelle, *Thales Alenia Space, France*; M. Toledo, *GMV, Spain*; G. Seco, J. López Vicario, *Universitat Autònoma de Barcelona, Spain*; D. Kubrak, M. Monnerat, *Thales Alenia Space, France*; A. Mark, *GMV, Spain*; D. Jiménez, *European Space Agency, The Netherlands* ----- 1780

Effects of Oversampling and Multipath on Navigation Using OFDM Signals of Opportunity
C. Schexnayder, J. Raquet, R. Martin, J. Velotta, *Air Force Institute of Technology* ----- 1792

Augmentation of Low-cost GPS/MEMS INS with UWB Positioning System for Seamless Outdoor/Indoor Positioning
M. Tanigawa, J.D. Hol, F. Dijkstra, H. Luinge, P. Slycke, *Xsens Technologies, The Netherlands* --- 1804

Active RFID Fingerprinting for Indoor Positioning

G. Retscher, Q. Fu, *Vienna University of Technology, Austria* ----- 1812

GPS Position Aiding in a Cellular Telephone without the Network

M.R. Jarvis, R.W. Rowe, P.J. Duffett-Smith, *Cambridge Silicon Radio, UK*; A.R. Pratt, *Orbstar Consultants, UK* ----- 1821

D4: Algorithms and Methods 2

RTK Relative Positioning Algorithms for Long Baselines with Estimating Ionospheric and Tropospheric Delays

S. Fujita, H. Imono, Y. Kubo, S. Sugimoto, *Ritsumeikan University, Japan* ----- 1829

SiRF InstantFix II Technology

W. Zhang, V. Venkatasubramanian, H. Liu, M. Phatak, S. Han, *SiRF Technology Inc.* ----- 1840

Determination of Minimum Data Required to Achieve Desired Location Performance

S.M. Deshpande, M. Chansarkar, M. Chowdhary, *SiRF Technology, Inc.* ----- 1848

Short-term Stability of GNSS Satellite Clocks and its Effects on Precise Point Positioning

A. Hesselbarth, L. Wanninger, *Dresden University of Technology, Germany* ----- 1855

GPS Precise Absolute Positioning via Kalman Filtering

B.W. Tolman, *Applied Research Laboratories The University of Texas at Austin* ----- 1864

Models and Algorithms Evaluation on GPS Kinematic Precise Point Positioning

C. Hu, *Tongji University, China*; W. Chen, *Hong Kong Polytechnic University, China*; J. Wu, *Tongji University, China* ----- 1875

A Time-Relative Approach for Precise Positioning with a Miniaturized L1 GPS Logger

J. Traugott, , *Technische Universität München, Germany*; G Dell’Omo, *TechnoSmart, Italy*; A.L Vyssotski, *University Zürich-Irchel, Switzerland*; D. Odijk, *Delft University of Technology, The Netherlands*; G. Sachs, *Technische Universität München, Germany* -----1883

ATOM: Super Compact and Flexible Format to Store and Transmit GNSS Data

I. Artushkin, A. Boriskin, D. Kozlov, *Magellan, Russia* ----- 1895

E4: GNSS Space Based Augmentation Systems

WAAS Benefits of GEO Ranging

T. Schempp, J. Burke, A. Rubin, *Raytheon Co.* ----- 1903

A Simple Algorithm for Dual Frequency Ground Monitoring Compatible with ARAIM

J. Blanch, T. Walter, P. Enge, *Stanford University* ----- 1911

Modeling Ionospheric Spatial Threat Based on Dense Observation Datasets for MSAS

T. Sakai, K. Matsunaga, K. Hoshinoo, *Electronic Navigation Research Institute, Japan*; T. Walter, *Stanford University* ----- 1918

A New Modeling Scheme of Satellite Ephemeris and Clock Errors for Korean WADGPS Test Bed	
D. Kim, H. Yun, K. Sohn, C. Kee, <i>Seoul National University, South Korea</i>	----- 1929
Reconstructing the WAAS Undersampled Ionosphere Gradient Threat Model for the WAAS Expansion into Mexico	
E. Paredes, N. Pandya, <i>Raytheon</i> ; L. Sparks, A. Komjathy, <i>Jet Propulsion Laboratory, California Institute of Technology</i>	----- 1938
Architecture of an FAA Certified TSO-C145c Precision Approach Receiver	
R.A. Nayak, J.K. Ray, <i>Accord Software & Systems Pvt Ltd., India</i>	----- 1948
Enhanced SBAS Integration Method using Combination of Multiple SBAS Corrections	
H Yun, D. Kim, S. Jeon, B. Park, C. Kee, <i>Seoul National University, South Korea</i>	----- 1955
Performance Assessment of a Local Area Monitoring System in Asia Pacific Region	
C-H. Chen, S-S. Jan, <i>Dept. of Aeronautics and Astronautics, National Cheng Kung University, Taiwan</i>	1962
Off-line, On-line and On-target FD/FDE Test Results for Approach Phases in an Aviation Receiver	
J.K. Ray, R.A. Nayak, <i>Accord Software & Systems Pvt Ltd., India</i>	----- 1971
Panel Discussion: Global Influences of GNSS	
U.S. Space-Based PNT International Cooperation	
A.A. Wong, <i>U.S. Department of State</i>	----- 1979
International Committee on Global Navigation Satellite Systems (ICG) 2008 Activities	
S. Gadimova, <i>United Nations Office for Outer Space Affairs</i>	----- 1994
Global Influence of GNSS	
W. Machado, <i>Foundation SDTP, Brazil</i>	----- 2004
GNSS: Impacts, Prospects and Challenges in Africa	
A.B. Rabiou, <i>Space Physics Laboratory, Department of Physics, Federal University of Technology, Nigeria</i>	----- 2046
Panel Discussion: Is the European Galileo Receiver Industry Competitive in the Worldwide GNSS Market?	
The Worldwide Receivers Market	
G.G. Calini, <i>European Supervisory Authority GSA, Belgium</i>	----- 2077
Versatile OEM GNSS Receivers for Demanding Applications	
P.A. Grognard, <i>Septentrio Satellite Navigation NV, Belgium</i>	----- 2107
A5: GNSS-Inertial Navigation Systems 2	

Analysis of Low-cost GPS/INS Integration for Bistatic SAR Experiments
S. Knedlik, J. Zhou, Z. Dai, E. Edwan, O. Loffeld, *University of Siegen, Germany* ----- 2115

A Comparison of the Performance of a Non-Coherent Deeply Integrated Navigation Algorithm and a Tightly Coupled Navigation Algorithm
M. Lashley, *Navigation Technology Associates, Inc.*; D. Bevely, *Auburn University* ----- 2123

Improving the Performance of Portable Navigation Devices by Using Partial IMU Based GPS/INS Integration Technology
X. Niu, S. Han, *SiRF Technology Inc.* ----- 2130

Particle Filtering Algorithm for Ultra-tight GNSS/INS Integration
D. Bernal, P. Closas, J.A. Fernández-Rubio, *Technical University of Catalonia, Spain* ----- 2137

Improvement of GNSS Signal Acquisition Using Low-Cost Inertial Sensors
D. Kubrak, M. Monnerat, *Thales Alenia Space, France*; G. Artaud, L. Ries, *CNES, France* ----- 2145

Integrating External Position Information with GPS using Existing GPS Processing Software for Precision Agriculture Applications
A. Cole, *University of New South Wales, Australia* ----- 2156

Modified Gaussian Sum Nonlinear Filters for INS/GPS Integrated Systems
M. Nakagawa, H. Okuno, *Ritsumeikan University, Japan*; T. Sato, *Toyota Industries Corporation, Japan*; Y. Kubo, S. Sugimoto, *Ritsumeikan University, Japan* ----- 2165

B5: GPS & GLONASS Modernization, QZSS, and Other GNSS 2

Design of a Regional Navigation Satellite System Constellation Using Genetic Algorithms
H.I. Ozdemir, *TUAF*; J.F. Raquet, G.B. Lamont, *Air Force Institute of Technology* ----- 2177

Assessment on the use of C-Band for GNSS within the European GNSS Evolution Programme
A. Schmitz-Peiffer, L. Stopfkuchen, F. Soualle, J-J. Floch, R. King, *EADS Astrium GmbH, Germany*; A. Fernandez, *Deimos S.L., Spain*; R. Jorgensen, *TICRA, Denmark*; B. Eissfeller, J.A. Avila-Rodriguez, S. Wallner, J-H. Won, T. Pany, M. Anghileri, B. Lankl, T. Schüler, *University FAF Munich, Germany*; E. Colzi, *ESA-ESTEC, The Netherlands* ----- 2189

Analysis of GPS Monitor Station Exclusions with Architecture Evolution Plan
B.J. Stanton, R. Strother, W.P. Petrofski, *SI International, Inc. HQ Air Force Space Command* ---- 2199

GPS Pseudorange Measurement Calibration
M.D. Menn, X.T. Tran, *The Aerospace Corporation* ----- 2209

Evaluation of Positioning Accuracy with Differential GPS/GLONASS
H. Yamada, T. Takasu, N. Kubo, A. Yasuda, *Tokyo University of Marine Science and Technology, Japan* ----- 2221

The Impact of Compass/Beidou-2 on Future GNSS: A Perspective From Asia
Y-S. Huang, M-L. Tsai, *Department of Geomatics, National Cheng-Kung University, Taiwan* ----- 2227

The Constellation Design of Taiwan's Regional Navigation Satellite System
H-C. Chen, Y-S. Huang, M-L. Tsai, K-W. Chiang, *National Cheng-Kung University, Taiwan* ----- 2239

GPS III Integrity Concept
K. Kovach, *The Aerospace Corporation*; J. Dobyne, *ARINC Engineering Services*; M. Crews, *U.S. Air Force*; C. Miles, *Federal Aviation Administration* ----- 2250

C5: Software Receivers (GNSS)

Implementation and Analysis of an SDR Processor for GNSS Software Correlators
G. Kappen, V. Pieper, L. Kurz, T.G. Noll, *RWTH Aachen University, Germany* ----- 2258

C5. 2. A Real-Time Software Receiver for the GLONASS L1 Signals: S. Peng, B.M. Ledvina, *Virginia Tech* ----- 2268

System Aspects and Practical Results for Precise Car Navigation with Modern Civil Signals using a Software Receiver
D. Sanromà Güixens, D. Dötterböck, T. Pany, B. Eissfeller, *University FAF Munich, Germany* --- 2280

Design and Analysis of Reconfigurable Embedded GNSS Receivers using Model-Band Design Tools
S. Ramakrishnan, G.X. Gao, D. De Lorenzo, T. Walter, P. Enge, *Stanford University*; D. Akos, *University of Colorado at Boulder* ----- 2293

Optimum Digital Filters for GNSS Tracking Loops
P.L. Kazemi, *University of Calgary, Canada* ----- 2304

C5. 6. Assessing the Spoofing Threat: Development of a Portable GPS Civilian Spoofer: T.E. Humphreys, B.M. Ledvina, *Virginia Tech* ----- 2314

FPGA-Optimized GNSS Receiver Implementation Techniques
H.S. Cobb, *Novariant, Inc.* ----- 2326

Real-time Multipath Monitoring and Characterization with a Variable Spacing Correlator on a FPGA-Based Software GNSS Receiver
J-C. Guay, B. Sauriol, M-A. Fortin, *Ecole De Technologie Supérieure, Canada* ----- 2332

Snapshot Positioning for Unaided GPS Software Receivers
Y. Qian, X. Cui, M. Lu, Z. Feng, *Tsinghua University, China* ----- 2343

C5. 3. Comparison of GPS Tracking Loop Performance in Weak Signal Condition with Nonlinear Filtering Techniques: J-H. Song, K-H. Kim, G-I. Gee, *Konkuk University, South Korea* ----- 2351

D5: Atmospheric Effects on GNSS 2

Assessment of the Higher Order Ionosphere Error on Position Solutions
Y.T. Morton, *Miami University*; F. van Graas, *Ohio University*; Q. Zhou, J. Herdtner,
Miami University ----- 2361

Mitigation of the Ionospheric Range Error in Single-frequency GNSS Applications
C. Mayer, N. Jakowski, J. Beckheinrich, E. Engler, *German Aerospace Center, Germany* ----- 2370

Local Models in Ionosphere VTEC Estimation Based on GNSS Regression Models
S. Fujita, H. Yamamoto, Y. Kubo, S. Sugimoto, *Ritsumeikan University, Japan* ----- 2377

Retrieving Vertical Ionosphere Electron Density Profile with an Improved Abel Inversion Algorithm
G. Ouyang, J. Wang, *University of New South Wales, Australia* ----- 2390

Evaluation of Deep Signal Fading Effects Due to Ionospheric Scintillation on GPS Aviation Receivers
J. Seo, T. Walter, T-Y. Chiou, J. Blanch, P. Enge, *Stanford University* ----- 2397

Inter-frequency Bias Estimation for the GPS Monitor Station Network
D. Holaschutz, *Booz Allen Hamilton*; R.H. Bishop, R.B. Harris, B. Tolman, *The University of Texas at Austin* ----- 2405

A New Technique to Improve the Electron Density Retrieval Accuracy: Application to FORMOSAT-3/COSMIC Constellation
M.A. Aragon-Angel, *Technical University of Catalonia (UPC), Spain* ----- 2416

Investigation of Scintillation Characteristics for High Latitude Phenomena
S. Skone, F. Man, F. Ghafoori, R. Tiwari, *University of Calgary, Canada* ----- 2425

Regional TEC Model using Improved Neural Network and its Application in Single Frequency Precise Point Positioning
C. Xu, *Department of Geography, Minjiang University, China*; Z. Li, X. Hua, Q. Fan, *School of Geodesy & Geomatics, Wuhan University, China* ----- 2434

E5a: GNSS Civil Interference and Spectrum Aspects

NASA RNSS Spectrum Protection Activities
B.L. Brodsky, *Overlook Systems Technologies*; J.E. Hollansworth, J.J. Miller, *National Aeronautics and Space Administration*; A.J. Oria, *Overlook Systems Technologies* ----- 2440

The L5 Demo Payload on GPS Mission IIR-20
T.D. Powell, C.E. Edgar, H. Ozisik, *The Aerospace Corporation*; M. McFadden, D. Reigh, R. Spieth, *Lockheed Martin*; J. Irvine, G. Vautin, *ITT Space Systems Division* ----- 2450

GNSS Receiver Testing Focussing on Strong Interference by use of a Hardware Signal Simulator
H. Denks, A. Hornbostel, *German Aerospace Center; Germany*; J-M. Perré, *Thales Avionics* ----- 2455

E5b: Marine Applications

Precise Positioning of Ships and Buoys in the Open Ocean - Results from a 3-Month Indian Ocean Cruise, and a tsunami Buoy off Japan's Coast

C. Rocken, T. Iwabuchi, Z. Lukes, L. Mervart, *GPS Solutions Inc., USA*; M. Fujita, *JAMSTEC, Japan*; M. Kanzaki, *Nippon GPS Solutions, Japan* ----- 2465

A Study on the Dissemination of Network-Based DGPS Corrections for e-Navigation

K.Y. Seo, S.H. Park, J.K. Choi, S.H. Suh, *Korea Ocean Research and Development Institute, South Korea* ----- 2473

A Feasibility Study on L1/L2C Software RSIM for Maritime DGPS

S.H. Park, D.J. Cho, K.Y. Seo, S.H. Suh, *Korea Ocean Research and Development Institute, South Korea* ----- 2479

Integrating Monolithic Ring Laser Gyros with Legacy Shipboard Navigation and Weapons Systems to Improve Inertial Navigation System Performance

W.R. Woodward, R. Webb, *UrsaNav*; D.J. Weber, R.F. Weingaertner, *Kearfott Corporation, Guidance & Navigation Division* ----- 2485

F5: Galileo System Design and Services

Galileo System Performance for Different Users and Constellations

V. Oehler, J.M. Krueger, H.L. Trautenberg, J. Daubrawa, *EADS Astrium, Germany* ----- 2493

Galileo Ground Mission Segment Architecture and Performances

B. B. kleine Schlarmann, M. Hollreiser, F. Amarillo, *European Space Agency, The Netherlands* -- 2505

Study on a Galileo Signal and Service Plan for C-band

J-A. Avila-Rodriguez, S. Wallner, J-H. Won, B. Eissfeller, *University FAF Munich, Germany*; A. Schmitz-Peiffer, J-J. Floch, *EADS Astrium, Germany*; E. Colzi, J.L. Gerner, *ESA-ESTEC, The Netherlands* ----- 2515

The Galileo Key Management Facilities

N. Shave, M. Potter, A. Coen, *Logica, UK* ----- 2530

The ESA "GNSS+" Project. Inter-satellite Ranging and Communication Links in the Frame of the GNSS Infrastructure Evolutions

M. Sánchez, J.A. Pulido, *DEIMOS Space, Spain*; F. Amarillo, J-L. Gerner, *European Space Agency/ ESTEC, The Netherlands* ----- 2538

Improved Integrity Concept for Future GNSS Evolutions

C. Catalán, C. Hernández, A. Mozo, L. Fernández, *GMV, Spain*; F. Amarillo, *European Space Agency, The Netherlands* ----- 2547

Assessment of Galileo Real Data with BayNavTech Performance Assessment Facility

M. Kirchner, J. Vilzmann, *EADS Astrium, Germany* ----- 2558

Realising the Galileo Service Centre at IOV - A Design and Implementation Overview
A. Coen, M. Roberts, *Logica, UK* ----- 2574

Improving the Signal-In-Space Monitoring Accuracy of a Galileo External Regional Integrity System using Co-located Receiver Baselines
A.J. Deem, Y. Feng, *Queensland University of Technology, Australia* -----2565

A6: Alternatives and Backups to GNSS

Pseudolite Navigation for Rotorcraft and Ground-Based Vehicles
D.W. Brekke, *The Boeing Company*; D. Wilson, Andrew Brown, *Center for Remote Sensing, Inc.* 2583

The Loran Coverage Analysis Simulation Tool
S.C. Lo, *Stanford University*; B.B. Peterson, *Peterson Integrated Geopositioning*; C.O. Lee Boyce Jr., P.K. Enge, *Stanford University* ----- 2595

Urban Positioning using Signals of Opportunity
G. Gerten, A. Gorski, *Analytical Graphics Inc.* ----- 2606

Active RFID for Positioning using Trilateration and Location Fingerprinting Based on RSSI
Q. Fu, *Institute of Geodesy and Geophysics, Vienna University of Technology, Austria* ----- 2613

Seamless Outdoor-to-Indoor Pedestrian Navigation using GPS and UWB
D.S. Chiu, K.P. O'Keefe, *University of Calgary, Canada* ----- 2626

Aerial Navigation in GPS-denied Environments using a Closed-feedback Error Loop Between the Navigation and Imaging Sensors
D.A. Grejner-Brzezinska, C.K. Toth, Y-J. Lee, J. Oh, *The Ohio State University* ----- 2638

Locata Performance in the Presence of WiFi Interference: Test Results
F.A. Khan, C. Rizos, A.G. Dempster, *University of New South Wales, Australia* ----- 2645

Development and Flight Test of a Robust Optical-Inertial Navigation System Using Low-Cost Sensors
M.B. Nielsen, J.F. Raquet, M. Veth, M. Pachter, *Air Force Institute of Technology* ----- 2650

Passive Positioning System Based on Double GEO Satellites and Error Correction Models
R. Li, *Beihang University, China*; Y. Wang, *Aviation Data Communication Corporation, China*;
J. Zhang, Y. Zhu, *BeiHang University, China* ----- 2662

B6: Modeling and Simulation

Determination of the Spectral Separation Between Signals and its Effect on GNSS Receiver Performance. A More Pragmatic Approach
D. Fernandez-Prim, M. Schoenhuber, O. Koudelka, *Joanneum Research, Institute of Applied Systems Technology, Austria* ----- 2669

Design and Implementation of a Multi-Signal-Structure GNSS Signal Simulator Using Low IF Digital Quadrature Modulation
Y. Kou, B. Zhang, Y. Zhao, Beihang University, China ----- 2677

Integrating High Resolution Terrain Data into Global PDOP Calculations
M.A. Staley, *U.S. Air Force Space Command*; M.A. Brilleslyper, *U.S. Air Force Academy* ----- 2692

Dilution of Precision Factor in Medium Earth Orbit Search and Rescue Systems
R. Paiement, M. Caron, X. Tang, *Communications Research Centre Canada* ----- 2700

B6. 4. Real-Time Data Disseminator (RTD2) for Simulation Systems and Integration Testing: B. Gerten, Prenap; G. Gerten, Analytical Graphics Inc. ----- 2706

GNSS Signal Analysis and Monitoring Tools Developed within the SWAN Project
E. Falletti, B. Motella, *Istituto Superiore Mario Boella, Italy*; D. Margaria, *CNIT-Politecnico di Torino, Italy*; L. Giugno, *Wiser, Italy*; M. Luise, *CNIT-Universita degli Studi di Pisa, Italy*; R. Marracci, *Intecs, Italy*; F. Longo, *Agenzia Spaziale Italiana, Italy* ----- 2712

Real-Time Environment and Sensors Simulator for Rail Applications
P. D'Angelo, S. Gómez de Agüero, D. De Castro, A. Fernández, J. Diez, *DEIMOS Space Spain*; A. Albanese, L. Foglia, *Thales Alenia Space Italia, Italy* ----- 2724

SEXTANT: A High-Fidelity Navigation Simulation Testbed
K.M. Betts, B.K. DeKock, *SAIC, Space Development Division*; D.L. Reed, J. Gewehr, D.E. Bezanson, *SAIC Space Systems Division* ----- 2732

C6: GNSS Antenna and Radio Technology

A Dual Stacked Reflector Antenna that Produces Equal Strength Circular Polarized L-Band Signals Everywhere on Earth for GPS Satellite Applications
Y.U. Kim, F.M. Czopek, *The Boeing Company* ----- 2740

A New Approach to Cellphone GPS Antennas
T. Haddrell, M. Phocas, *ST-NXP Wireless, UK*; N. Ricquier, *NXP Semiconductors Belgium* ----- 2747

An Analysis of Multipath Mitigation Techniques Suitable for Geodetic Antennas
R. Granger, S. Simpson, *Roke Manor Research Ltd., UK* ----- 2755

Simulations of Antennas Mounted on Rotorcrafts
I.J. Gupta, K.A. Griffith, *The Ohio State University* ----- 2766

Adaptive Array Phase Control using an Integrated Software GPS Signal Processing Architecture
S.K. Kalyanaraman, *Rockwell Collins*; M.S. Braasch, *Ohio University* ----- 2772

C6. 6. Mitigation of Continuous and Pulsed Radio Interference with GNSS Antenna Arrays: A. Konovaltsev, German Aerospace Center, Germany ; D.S. De Lorenzo, Stanford University; A. Hornbostel, German Aerospace Center, Germany; P. Enge, Stanford University ----- 2786

Optimum Adaptive Filtering for GNSS Antenna Arrays
A.J. O'Brien, I.J. Gupta, *The Ohio State University* ----- 2796

Post-Processing Dynamic GNSS Antenna Array Calibration and Deterministic Beamforming
S. Backén, D.M. Akos, M.L. Nordenvaad, *Luleå University of Technology, Sweden* ----- 2806

Interference Mitigation Technique using DOA Information of Interferences for the GPS Receiver
G.W. Lee, D.W. Lim, *Chungnam National University, South Korea*; C. Park, *Chungbuk National University, South Korea*; D-H. Hwang, S.J. Lee, *Chungnam National University, South Korea* ---- 2815

D6: Multiple-Frequency GNSS Algorithms

Generation of Third Code and Phase Signals Based on Dual-Frequency GPS Measurements
B. Li, *Tongji University, China/Queensland University of Technology, Australia* ----- 2820

Three Carrier Ambiguity Resolution: Generalised Problems, Models, Methods and Performance Analysis using Semi-Generated Triple Frequency GPS Data
Y. Feng, *Queensland University of Technology, Australia*; B. Li, *Tongji University, China / Queensland University of Technology, Australia* ----- 2831

Performance Evaluation of GPS/Galileo Multiple-frequency RTK Positioning Using a Single-difference Processor
W. Cao, K. O'Keefe, M.E. Cannon, *University of Calgary, Canada* ----- 2841

Towards Single Epoch Ambiguity Resolution with Galileo Multiple Frequency using Improved Cascading Ambiguity Resolution (CAR) Method
W. Chen, S. Ji, X. Ding, Y. Chen, *Hong Kong Polytechnic University, China*; C. Hu, *Tongji University, China* ----- 2850

GPS+GLONASS RTK: Making the Choice Between Civilian and Military L2 GLONASS
F. Boon, J-M. Sleewaegen, A. Simsky, W. De Wilde, *Septentrio Satellite Navigation, Belgium* ---- 2860

Improving Performances of Classic Three Carrier Ambiguity Resolution (TCAR) Algorithms for Galileo using GTCAR
J. Simon, B. Martin Peiro, M. Toledo, *GMV, Spain* ----- 2868

Estimation of GPS/GLONASS System Time Difference with Application to PPP
C-S. Cai, Y. Gao, *University of Calgary, Canada* ----- 2880

E6: GNSS Ground Based Augmentation Systems

Validation of the Offset Precision Approach with Vertical Guidance to Landing using LAAS as Sole Means of Navigation
Y-R. Huang, J. Fagan, Y-Z. Xue, *University of Oklahoma*; G. McCartor, *Federal Aviation Administration* ----- 2888

Solutions to Issues of GBAS using SBAS Ranging Source Signals
S. Saito, N. Fujii, S. Saito, *Electronic Navigation Research Institute, Japan*; K. Suzuki, T. Ono, *NEC Corporation, Japan* ----- 2894

High Performance Navigation Algorithms for Aviation - Results of Approach and Airport Surface Movement Tests

W. Schuster, J. Bai, W. Ochieng, *Imperial College London, UK*; P.M. Schachtebek, M. Steen, *Institut fuer Flugfuehrung, Technische Universität Braunschweig, Germany* ----- 2901

Trimble's Marine Reference Station Modernization

K.E. Ferguson, M.K. Albright, M. Brandl, *Trimble Terrasat GmbH, Germany* ----- 2909

Continuity and Integrity Aspects of an Integrated GBAS/INS Navigation System

M. Steen, T. Feuerle, U. Bestmann, M. Stanisak, P. Hecker, *Technische Universität, Germany* ---- 2920

Cascade Dual Frequency Smoothing Performance Evaluation Study

R. Xue, J. Zhang, Y. Zhu, *School of Electronic Information Engineering, Beihang University, China* --2929

Ionospheric Spatial Gradient Monitoring by using a Long Baseline Monitor with Integrity Algorithms

J. Kim, M-S. Jeong, *Korea Aerospace University, South Korea*; J. Ahn, Y.J. Lee, *Konkuk University, South Korea* ----- 2938

Performance Assessment for GBAS CAT III using GPS and Galileo

B. Belabbas, P. Rémi, M. Meurer, *DLR German Aerospace Center, Germany* ----- 2945

PORIMA - Precise Predicted Orbit Based Receiver Integrity Monitoring Algorithms

H. Su, W. Ehret, *Air Systems Division/Thales ATM GmbH, Germany* ----- 2953

Receiver Carrier-to-Noise Ratio Monitoring Based on Improved Cumulative Sum(CUSUM) Method

L. Xia, Z. Xuejun, X. Rui, *School of Electronic Information & Engineering, Beihang University, China* ---- 2962

F6: Surveying and Geodesy

An Optimal Design for Server-Based RTK Systems

S. Lim, C. Rizos, *University of New South Wales, Australia* ----- 2969

Modeling 3D Deformation using Terrestrial LiDAR:

S. Selvarajan, A. Mohamed, G. Barnes, *University of Florida* ----- 2975

Triple Frequency RF Front End for GNSS Instrumentation Receiver Applications

S. Gunawardena, Z. Zhu, F. van Grass, *Ohio University* -----2984

Deformation Monitoring with Single Frequency L1 Receivers

T. Iwabuchi, J. Johnson, S. Cummins, C. Rocken, *GPS Solutions Inc., USA*; Y. Iotake, M. Kanzaki, *Nippon GPS Solutions, Japan* ----- 3000

Software-based GNSS L1 Interferometric Positioning

B.J. Muth, *Delft University of Technology, The Netherlands* ----- 3009

Multiple UWB Range Assisted GPS RTK in Hostile Environments

G. MacGougan, K. O'Keefe, D.S. Chiu, *University of Calgary, Canada* ----- 3020

Coen Here

Integrating Absolute Gravimetry into the Canadian Spatial Reference System: Current Efforts and Priorities

J.A. Henton, J. Silliker, J.O. Liard, M. Bérubé, M.R. Craymer, R. Duval, C. Gagnon, *Natural Resources Canada, Canada* ----- 3048
